TITLE 1. GENERAL PROVISIONS
CHAPTER 1. GENERAL PROVISIONS

Sec. 1.001. PURPOSE OF CODE. (a) This code is enacted as a part of the state's continuing statutory revision program, begun by the Texas Legislative Council in 1963 as directed by the legislature in the law codified as Section 323.007, Government Code. The program contemplates a topic-by-topic revision of the state's general and permanent statute law without substantive change.

(b) Consistent with the objectives of the statutory revision program, the purpose of this code is to make the law encompassed by this code more accessible and understandable by:

- (1) rearranging the statutes into a more logical order;
- (2) employing a format and numbering system designed to facilitate citation of the law and to accommodate future expansion of the law;
- (3) eliminating repealed, duplicative, unconstitutional, expired, executed, and other ineffective provisions; and
- (4) restating the law in modern American English to the greatest extent possible.

Acts 1995, 74th Leg., ch. 165, Sec. 1, eff. Sept. 1, 1995.

Once each calendar year, each constituent agency may audit a nonconstituent municipality's records relating to the excess airport revenue at the sole expense of the constituent agency.

(b) The department may contract with a governmental or private entity to maintain, control, hold, restore, enhance, develop, or redevelop property for the mitigation of a past, present, or future adverse environmental effect arising from the construction, maintenance, or operation of a rail facility without regard to whether the need for mitigation has already been established for a particular project.

the use or operation of all or part of a rail facility or system.

(b) The department shall encourage to the maximum extent practical the participation of private enterprise in the operation of rail facilities and systems.

(c) A lease agreement shall provide for the department's monitoring of a rail operator's service and performance.

(d) The department may enter into an agreement with a rail operator to sell all or any part of state-owned rail facilities on terms the department considers to be in the best interest of the state.

Added by Acts 2003, 78th Leg., ch. 1325, Sec. 4.01, eff. June 21, 2003.

Sec. 91.105. PLACEMENT OF UTILITY FACILITIES, LINES, AND EQUIPMENT. (a) A utility has the same right to place its facilities, lines, or equipment in, over, or across right-of-way that is part of a state-owned rail facility as the utility has with respect to the right-of-way of a state highway under Chapter 181,

Utilities Code. A utility shall notify the department of the utility's intention to exercise authority over right-of-way that is part of state-owned rail facilities.

(b) On receipt of notice under Subsection (a), the department may designate the location in the right-of-way where the utility may place its facilities, lines, or equipment.

(c) The department may require a utility to relocate the utility's facilities, lines, or equipment, at the utility's expense, to allow for the expansion or relocation of rail facilities owned by the state. A relocation under this subsection must be accomplished pursuant to Subsections (e)-(j). The department shall pay for the cost of the relocation. If a utility facility is replaced, the cost of replacement is limited to an amount equal to the cost of replacing the facility with a comparable facility, less the net salvage value of the replaced facility.

(d) A utility may use and operate a facility required to be relocated under this section at the new location for the same period and on the same terms as the utility had the right to do at the previous location of the facility.

(e) If the department determines that a public utility facility must be relocated, the utility and the department shall negotiate in good faith to establish reasonable terms and conditions concerning the responsibilities of the parties with regard to sharing of information about the project and the planning and implementation of any necessary relocation of a public utility facility.

(f) The department shall use its best efforts to provide an affected utility with plans and drawings of the project that are sufficient to enable the utility to develop plans for, and determine the cost of, the necessary relocation of the public utility facility. If the department and the affected utility enter into an agreement after negotiations under Subsection (e), the terms and conditions of the agreement govern the relocation of public utility facilities covered by the agreement.

(g) If the department and an affected utility do not enter into an agreement under Subsection (e), the department shall provide to the affected utility:

(1) written notice of the department's determination that the public utility facility must be removed;

(2) a final plan for relocation of the public utility facility; and

(3) reasonable terms and conditions for an agreement with the utility for the relocation of the public utility facility.

(h) Not later than the 90th day after the date a utility receives the notice from the department, including the plan and agreement terms and conditions under Subsection (g), the utility shall enter into an agreement with the department that provides for the relocation.

(i) If the utility fails to enter into an agreement within the 90-day period under Subsection (h), the department may relocate the public utility facility at the sole cost and expense of the utility less any reimbursement of costs that would have been payable to the utility under applicable law. A relocation by the department under this subsection shall be conducted in full compliance with applicable law, using standard equipment and construction practices compatible with the utility's existing facilities, and in a manner that minimizes disruption of utility service.

(j) The 90-day period under Subsection (h) may be extended:

(1) by mutual agreement between the department and the utility; or

(2) for any period during which the utility is negotiating in good faith with the department to relocate its facility.

(2) the condition threatens health, life, or property in the affected area.

(c) An order issued under Subsection (b) takes effect according to the order's terms, but the order may not take effect until

reasonable notice is given:

(1) in a newspaper of general circulation in the affected area;

(2) through television or radio serving the affected area;
or

(3) by circulating notices or posting signs at conspicuous places in the affected area.

(d) An order issued under Subsection (b) must expire not later than the 30th day after the date the order is issued.

(e) The director may amend, modify, or rescind an order issued under Subsection (b) while the order is effective.

(f) The director may issue one or more successive orders as necessary to protect health, life, or property in the affected area. Each successive order must expire not later than the 30th day after the date the successive order is issued.

(g) The department may not use department employees to operate rolling stock.

(h) The department may enter into a contract authorized by an order issued under Subsection (b) for a period not to exceed 90 days without using competitive bidding procedures otherwise required by law if the department attempts to negotiate with at least three qualified persons during the contracting process.

(i) Immediately after the department enters into a contract under this section, the department shall send a copy of the contract to the Legislative Budget Board. On request of the Legislative Budget Board, the department may send the copy in an electronic format.

(j) The department may use any available funds to implement this section, including:

(1) the undedicated portion of the state highway fund; and

SUBCHAPTER D. LIABILITY FOR INJURIES TO EMPLOYEES

Sec. 112.151. APPLICABILITY OF SUBCHAPTER. Notwithstanding any other law, this subchapter does not apply to the portion of a person's, receiver's, or corporation's operations that:

(1) consists solely of the fabrication, manufacture, repair, or storage of rail rolling stock; or

(2) uses rail cars solely as a part of its own internal manufacturing or production process.

Added by Acts 2009, 81st Leg., R.S., Ch. 85 (S.B. 1540), Sec. 2.03, eff. April 1, 2011.

Sec. 112.152. LIABILITY GENERALLY FOR INJURY TO OR DEATH OF EMPLOYEE. (a) A corporation, receiver, or other person operating a railroad in this state is liable for damages to a person who, while employed by the railroad operator, is injured as a result of:

(1) the negligence of an officer, agent, or employee of the railroad operator; or

(2) any defect or insufficiency due to the railroad operator's negligence in its cars, engines, appliances, machinery, track, roadbed, works, boats, wharves, or other equipment.

(b) If an employee dies as a result of the negligence, defect, or insufficiency described by Subsection (a), the railroad operator is liable to the employee's personal representative for the benefit of the employee's surviving spouse and children and the employee's parents or, if the employee is not survived by a spouse, child, or parent, to the employee's next of kin who is dependent on the employee.

(c) Damages recovered under Subsection (b) are not liable for the debts of the deceased and shall be divided among the persons entitled to the benefit of the action who are living, in shares the fact finder considers proper.

(d) An action under Subsection (b) may be brought without administration by all parties entitled to damages under that subsection, or by any one or more of those parties, for the benefit of all of those parties. If all parties entitled to recover are not before the court, the action may proceed for the benefit of the parties who are before the court.

Sec. 112.153. CONTRIBUTORY NEGLIGENCE. (a) In an action under Section 112.152, the employee's contributory negligence is not a bar to recovery but the fact finder shall reduce the employee's damages in proportion to the amount of contributory negligence attributable to the employee.

(b) An employee may not be found contributorily negligent in a case in which the railroad operator's violation of a statute enacted for the safety of employees contributed to the employee's injury or death.

(a) The plea of assumed risk is not available as a bar to recovery of damages in a suit brought in a court in this state against a corporation, receiver, or other person operating a railroad, interurban railway, or street railway in this state for the recovery of damages for the death of or personal injury to an employee caused by the wrong or negligence of the railroad or railway operator. An employee assumes the ordinary risk incident to the employee's employment but does not assume the risk resulting from any negligence of the employee's employer, regardless of whether the negligence is known to the employee.

(b) If in a suit described by Subsection (a) it is alleged and proven that the deceased or injured employee was negligent in

continuing in the service of the railroad or railway operator in view of the risk, dangers, and hazards of which the employee knew or must necessarily have known, in the ordinary performance of the employee's duties, that fact does not bar the employee's recovery, but is considered contributory negligence. If contributory negligence described by this subsection proximately caused or contributed to the cause of the death or injury, the damages recoverable by the employee or the employee's heirs or representatives shall be reduced only in proportion to the amount of negligence attributable to the employee.

(c) An employee of a railway company who is injured while engaged in the operation of a train in this state that is propelled by two or more engines is not considered to have assumed the risk of that injury if the injury is a result of the operation of two or more engines on the train rather than one.

(d) In an action against a railroad operator under Section 112.152, an employee may not be held to have assumed the risk of the employee's employment in a case in which the railroad operator's violation of a statute enacted for the safety of employees contributed to the employee's injury or death.

Sec. 112.156. LIABILITY OFFSET. In an action against a railroad operator under Section 112.152, the railroad operator may offset the railroad operator's liability by the amount of the railroad operator's contribution or payment to any insurance, relief benefit, or indemnity from which benefits have been paid to the injured employee or another person entitled to the benefits as a result of the injury or death that is the subject of the action.

Added by Acts 2009, 81st Leg., R.S., Ch. 85 (S.B. 1540), Sec. 2.03, eff. April 1, 2011.

Sec. 112.158. INJURY TO FELLOW SERVANT. (a) This section applies only to a corporation, receiver, or other person that controls or operates a railroad or street railway the line of which is located wholly or partly in this state.

(b) An entity described by Subsection (a) is liable for damages sustained by an employee of the entity while the employee is engaged in the work of operating the cars, locomotives, or trains of the entity as a result of the negligence of any other employee of the entity, regardless of whether the negligent employee and the employee who sustained the damages are considered fellow servants.

(c) Persons who are engaged in the common service of an entity described by Subsection (a) are considered fellow servants only if the persons are:

(1) employed in the same grade of employment;

(2) doing the same character of work or service; and

(3) working together at the same time and place and at the same piece of work for a common purpose.

(d) A person engaged in the service of an entity described by Subsection (a) is considered a vice principal of that entity if the person is entrusted by the entity with the authority of superintendence, control, or command of the other employees of the

entity, with the authority to direct any other employee in the performance of any duty of the employee.

(e) A vice principal of an entity described by Subsection (a) is not considered a fellow servant with other employees of the entity.

(f) A contract between an employer and employee that limits the employer's liability under this section in the event of the death of or injury to the employee or setting damages that may be recovered under this section is not valid or binding.

(g) This section does not impair or diminish the defense of contributory negligence if the injury of the employee is proximately caused by the employee's own contributory negligence.

(3) provide that properly platted access points to or from a controlled access highway that are located on undeveloped property are subject to the access management standards in effect at the time the points were platted regardless of when the initial request for access was submitted to the department, but only if:

(A) development of the property begins and the request for access at the platted locations is submitted to the department before the fifth anniversary of the date the plat was recorded; and

(B) the design of the highway facility in the vicinity of the platted access points did not materially change after the date the plat was recorded so as to significantly impact traffic patterns to the extent that the platted access points present a threat to public safety;

(A) denial of reasonable access to the property; and

(B) undue hardship on a business located on the property; and

(6) clarify that the remodeling or demolition and rebuilding of a business does not cause new access management standards to apply unless the department makes an affirmative finding in writing that the remodeled or rebuilt business will significantly impact traffic patterns to the extent that the current access location presents a threat to public safety.

(b) This section does not alter the rights of a person under another law of this state to compensation for damages caused by the exercise of the commission's powers.

Sec. 203.0521. ACQUISITION OF REMAINDER. (a) If a proposed acquisition of a tract of real property under Section 203.052 would leave the owner of the property a remainder of the tract, the department may negotiate for and purchase the remainder or any part of a severed real property if the department and the owner agree on terms for the purchase. The department shall offer, except as provided by Subsection (f), to purchase a remainder if the department determines that:

(1) an intangible legal right to receive a percentage of identified revenue attributable to the applicable segment of the toll project; or

(2) a right to use, without charge, a segment or part of the toll project.

(d) A right to receive revenue under Subsection (c)(1) is subject to any pledge of the revenue under the terms of a trust agreement securing bonds issued for the applicable segment of the toll project.

- (3) a segment of the state highway system that was

designated by the commission as a turnpike project or toll project before September 1, 2005.

(a-1) Notwithstanding Subsection (a)(3), the department and the utility shall share equally the cost of the relocation of a utility facility that is required by the improvement of a nontolled highway to add one or more tolled lanes.

(a-2) Notwithstanding Subsection (a)(3), the department and the utility shall share equally the cost of the relocation of a utility facility that is required by the improvement of a nontolled highway that has been converted to a turnpike project or toll project.

facility, or make a relocation of a utility facility, not eligible for reimbursement under Section 203.092 at the expense of the state upon a finding of the commission that:

- (1) relocation of the utility facility is essential to the timely completion of a state highway improvement project;
- (2) continuous service to utility customers is essential to the public well-being or the local economy;
- (3) a short-term financial condition would prevent a utility from being able to pay the cost of relocation in full or in part at the time of relocation or, if paid at that time, would adversely affect the utility's ability to operate or provide essential services to its customers; and
- (4) the affected utility has been contacted by the department and such utility and the department have reached an agreement that:
 - (A) appropriate safeguards are in place to ensure that relocation work activities are conducted safely in full compliance with applicable law and utility construction standards;
 - (B) relocation work can be coordinated between the department and the utility in a manner that will ensure that any disruption of utility service is minimized;
 - (C) the contractor, and any subcontractors, selected for relocation work activities are qualified to perform such work activities; and
 - (D) there exists a factual basis for the commission findings required under Subdivision (3).

(b) A utility whose facilities are relocated under Subsection (a) shall reimburse the department for any amount expended or advanced by the department for the relocation. The utility shall enter into an agreement with the department providing for reimbursement. The agreement shall:

- (1) require reimbursement of the amount expended plus interest to the department within five years from the date of completion of the work;
- (2) provide for reimbursement by a lump-sum payment or by installments;
- (3) require payment of interest at a rate of six percent per annum from the date of completion through the date of final payment; and
- (4) contain other terms and conditions as may be mutually

agreed upon by the department and the utility.

(c) In the absence of an agreement required by Subsection (b), a utility shall reimburse the department the full cost of relocation within 30 days of the date of completion of the work.

(d) All funds received by the department under this section shall be deposited in the state treasury to the credit of the state highway fund.

Added by Acts 1997, 75th Leg., ch. 876, Sec. 2, eff. Sept. 1, 1997.

Sec. 203.093. REIMBURSEMENT FROM STATE HIGHWAY FUND. (a) Reimbursement of the cost of relocation of the utility facility, as required by Section 203.092, may be made from the state highway fund to the utility owning the facility.

(b) This section applies notwithstanding anything to the contrary contained in another law or in a permit, agreement, or franchise issued or entered into by a department, commission, or political subdivision of this state.

Acts 1995, 74th Leg., ch. 165, Sec. 1, eff. Sept. 1, 1995. Amended by Acts 1997, 75th Leg., ch. 876, Sec. 3, eff. Sept. 1, 1997.

Sec. 203.0935. TIMELY AGREEMENT. (a) If the department determines that a facility of a utility must be relocated to accommodate an improvement to the state highway system, the utility and the department shall negotiate in good faith to establish reasonable terms and conditions concerning the responsibilities of the parties with regard to sharing of information about the highway improvement project and the planning and implementation of any necessary relocation of utility facilities.

(b) The department shall use its best efforts to provide an affected utility with plans and drawings of the highway improvement project that are sufficient to enable the utility to develop plans for, and determine the cost of, the necessary relocation of the facility of the utility. If the department and the affected utility enter into an agreement after negotiations under Subsection (a), the terms and conditions of the agreement shall govern the relocation of the utility's facility covered by the agreement.

(c) If the department and an affected utility do not enter into

an agreement under Subsection (a), the department shall provide to the affected utility:

(1) written notice of the department's determination that the utility facility must be removed;

(2) a final plan for relocation of the facility; and

(3) reasonable terms and conditions for an agreement with the utility for the relocation of the facility.

(d) Not later than the 90th day after the date that a utility receives the notice from the department, including the plan and agreement terms and conditions under Subsection (c), the utility shall enter into an agreement with the department that provides for the relocation.

(e) If the utility fails to enter into an agreement within the 90-day period under Subsection (d), the department may relocate the facility at the sole cost and expense of the utility less any reimbursement of costs that would have been payable to the utility under Section 203.092. A relocation by the department under this subsection shall be conducted in full compliance with applicable law, using standard equipment and construction practices compatible with the utility's existing facilities, and in a manner that minimizes disruption of utility service.

(f) The 90-day period under Subsection (d) may be extended:

(1) by mutual agreement between the department and the utility; or

(2) for any period of time during which the utility is negotiating in good faith with the department to relocate its facility.

Added by Acts 2003, 78th Leg., ch. 845, Sec. 1, eff. June 20, 2003.

Sec. 203.094. TIMELY RELOCATION. (a) A utility that is eligible for reimbursement under Section 203.092 or that is eligible for reimbursement under applicable law and the policies of the department for the cost of relocating facilities required by improvement of a segment of the state highway system not subject to Section 203.092 shall accomplish the relocation of the facility in a timely manner as specified in its relocation agreement with the department.

(b) The department may reduce the reimbursement to the utility

by 10 percent for each 30-day period or portion of a 30-day period by which the relocation exceeds the limit specified in the relocation agreement. If the department determines that a delay in relocation is the result of circumstances beyond the control of the utility, full reimbursement shall be paid.

(c) The time limit specified in the relocation agreement may not be less than 90 days.

Acts 1995, 74th Leg., ch. 165, Sec. 1, eff. Sept. 1, 1995.

Sec. 203.0941. UTILITY RELOCATION ELIGIBLE FOR FINANCIAL ASSISTANCE FROM WATER DEVELOPMENT BOARD. (a) The relocation of a utility facility required by improvement of any segment of the state highway system, for which a political subdivision receives financial assistance made available from either Subchapter D, F, G, or K, Chapter 17, Water Code, is not subject to the requirements of Sections 17.183(1)-(6), Water Code, if the political subdivision has agreed to allow the department to contract for the construction of the utility facility relocation.

(b) The department and the Texas Water Development Board may enter into a memorandum of understanding to facilitate administration of utility facility relocation that is required by state highway system improvement and that receives financial assistance from the Texas Water Development Board.

Added by Acts 1997, 75th Leg., ch. 876, Sec. 4, eff. Sept. 1, 1997.

Sec. 203.095. RULES. The department shall adopt rules to implement this subchapter.

Sec. 222.106. MUNICIPAL TRANSPORTATION REINVESTMENT ZONES. (a) In this section:

(1) the amount of a municipality's tax increment for a year is the amount of ad valorem taxes levied and collected by the municipality for that year on the captured appraised value of real property taxable by the municipality and located in a transportation reinvestment zone under this section;

(2) the captured appraised value of real property taxable by a municipality for a year is the total appraised value of all real property taxable by the municipality and located in a transportation reinvestment zone for that year less the tax increment base of the municipality; and

(3) the tax increment base of a municipality is the total appraised value of all real property taxable by the municipality and located in a transportation reinvestment zone for the year in which the zone was designated under this section.

(b) This section applies only to a municipality in which a transportation project is to be developed under Section 222.104 or 222.108.

(c) If the governing body determines an area to be unproductive and underdeveloped and that action under this section will further the purposes stated in Section 222.105, the governing body of the municipality by ordinance may designate a contiguous geographic area in the jurisdiction of the municipality to be a transportation reinvestment zone to promote one or more transportation projects.

(d) The governing body must comply with all applicable laws in the application of this chapter.

(e) Not later than the 30th day before the date the governing body of the municipality proposes to adopt an ordinance designating an area as a transportation reinvestment zone under this section, the governing body must hold a public hearing on the designation of the zone and its benefits to the municipality and to property in the proposed zone. At the hearing an interested person may speak for or against the creation of the zone or its boundaries. Not later than the seventh day before the date of the hearing, notice of the hearing

and the intent to create the zone must be published in a newspaper having general circulation in the municipality.

(f) Compliance with the requirements of this section constitutes designation of an area as a transportation reinvestment zone without further hearings or other procedural requirements.

(g) The ordinance designating an area as a transportation reinvestment zone must:

(1) describe the boundaries of the zone with sufficient definiteness to identify with ordinary and reasonable certainty the territory included in the zone;

(2) provide that the zone takes effect immediately on passage of the ordinance and that the base year shall be the year of passage of the ordinance or some year in the future;

(3) assign a name to the zone for identification, with the first zone designated by a municipality designated as "Transportation Reinvestment Zone Number One, (City or Town, as applicable) of (name of municipality)," and subsequently designated zones assigned names in the same form, numbered consecutively in the order of their designation;

(4) designate the base year for purposes of establishing the tax increment base of the municipality;

(5) establish a tax increment account for the zone; and

(6) contain findings that promotion of the transportation project or projects will cultivate the improvement, development, or redevelopment of the zone.

(h) From taxes collected on property in a zone, the municipality shall pay into the tax increment account for the zone the tax increment produced by the municipality, less any amount allocated under previous agreements, including agreements under Chapter 380, Local Government Code, or Chapter 311, Tax Code.

(i) All or the portion specified by the municipality of the money deposited to a tax increment account must be used to fund the transportation project or projects for which the zone was designated, as well as aesthetic improvements within the zone. Any remaining money deposited to the tax increment account may be used for other purposes as determined by the municipality. A municipality may issue bonds to pay all or part of the cost of a transportation project and may pledge and assign all or a specified amount of money in the tax increment account to secure repayment of those bonds.

(i-1) The governing body of a municipality may contract with a

public or private entity to develop, redevelop, or improve a transportation project in a transportation reinvestment zone and may pledge and assign all or a specified amount of money in the tax increment account to that entity. After a pledge or assignment is made, the governing body of the municipality may not rescind its pledge or assignment until the contractual commitments that are the subject of the pledge or assignment have been satisfied.

(i-2) To accommodate changes in the limits of a project for which a reinvestment zone was designated, the boundaries of a zone may be amended at any time, except that property may not be removed or excluded from a designated zone if any part of the tax increment account has been assigned or pledged directly by the municipality or through another entity to secure bonds or other obligations issued to obtain funding or development of a project, and property may not be added to a designated zone unless the governing body of the municipality complies with Subsections (e) and (g).

(j) Except as provided by Subsections (i-1) and (k), a transportation reinvestment zone terminates on December 31 of the year in which the municipality completes:

(1) all contractual requirements that included the pledge or assignment of all or a portion of money deposited to a tax increment account; or

(2) the repayment of money owed under an agreement for development, redevelopment, or improvement of the project or projects for which the zone was designated.

(k) A transportation reinvestment zone terminates on December 31 of the 10th year after the year the zone was designated, if before that date the municipality has not entered into a contract described in Subsection (i-1) or otherwise not used the zone for the purpose for which it was designated.

(l) Any surplus remaining in a tax increment account on termination of a zone may be used for other purposes as determined by the municipality.

Sec. 222.107. COUNTY TRANSPORTATION REINVESTMENT ZONES. (a)
In this section:

(1) the amount of a county's tax increment for a year is the amount of ad valorem taxes levied and collected by the county for that year on the captured appraised value of real property taxable by the county and located in a transportation reinvestment zone under this section;

(2) the captured appraised value of real property taxable by a county for a year is the total appraised value of all real property taxable by the county and located in a transportation reinvestment zone for that year less the tax increment base of the county; and

(3) the tax increment base of a county is the total appraised value of all real property taxable by the county and located in a transportation reinvestment zone for the year in which the zone was designated under this section.

(b) This section applies only to a county in which a transportation project is to be developed under Section 222.104 or 222.108.

(c) The commissioners court of the county, after determining that an area is unproductive and underdeveloped and that action under this section would further the purposes described by Section 222.105, by order or resolution may designate a contiguous geographic area in the jurisdiction of the county to be a transportation reinvestment zone to promote one or more transportation projects.

(d) The commissioners court must comply with all applicable laws in the application of this chapter.

(e) Not later than the 30th day before the date the commissioners court proposes to designate an area as a transportation reinvestment zone under this section, the commissioners court must hold a public hearing on the creation of the zone, its benefits to the county and to property in the proposed zone, and the possible abatement of ad valorem taxes or the grant of other relief from ad valorem taxes imposed by the county on real property located in the zone. At the hearing an interested person may speak for or against

the designation of the zone, its boundaries, or the possible abatement of or the relief from county taxes on real property in the zone. Not later than the seventh day before the date of the hearing, notice of the hearing and the intent to create a zone must be published in a newspaper having general circulation in the county.

(f) The order or resolution designating an area as a transportation reinvestment zone must:

(1) describe the boundaries of the zone with sufficient definiteness to identify with ordinary and reasonable certainty the territory included in the zone;

(2) provide that the zone takes effect immediately on adoption of the order or resolution and that the base year shall be the year of passage of the order or resolution or some year in the future;

(3) assign a name to the zone for identification, with the first zone designated by a county designated as "Transportation Reinvestment Zone Number One, County of (name of county)," and subsequently designated zones assigned names in the same form numbered consecutively in the order of their designation;

(4) designate the base year for purposes of establishing the tax increment base of the county;

(5) establish an ad valorem tax increment account for the zone; and

(6) contain findings that promotion of the transportation project or projects will cultivate the improvement, development, or redevelopment of the zone.

(g) Compliance with the requirements of this section constitutes designation of an area as a transportation reinvestment zone without further hearings or other procedural requirements.

(h) The commissioners court may:

(1) from taxes collected on property in a zone, pay into a tax increment account for the zone an amount equal to the tax increment produced by the county less any amounts allocated under previous agreements, including agreements under Section 381.004, Local Government Code, or Chapter 312, Tax Code;

(2) by order or resolution enter into an agreement with the owner of any real property located in the transportation reinvestment zone to abate all or a portion of the ad valorem taxes or to grant other relief from the taxes imposed by the county on the owner's property in an amount not to exceed the amount calculated under

Subsection (a)(1) for that year;

(3) by order or resolution elect to abate all or a portion of the ad valorem taxes imposed by the county on all real property in a zone; or

(4) grant other relief from ad valorem taxes on property in a zone.

(h-1) All abatements or other relief granted by the commissioners court in a transportation reinvestment zone must be equal in rate. In any ad valorem tax year, the total amount of the taxes abated or the total amount of relief granted under this section may not exceed the amount calculated under Subsection (a)(1) for that year, less any amounts allocated under previous agreements, including agreements under Chapter 381, Local Government Code, or Chapter 312, Tax Code.

(h-2) To further the development of the transportation project or projects for which the transportation reinvestment zone was designated, a county may assess all or part of the cost of the transportation project or projects against property within the zone. The assessment against each property in the zone may be levied and payable in installments in the same manner as provided by Sections 372.016-372.018, Local Government Code, provided that the installments do not exceed the total amount of the tax abatement or other relief granted under Subsection (h). The county may elect to adopt and apply the provisions of Sections 372.015-372.020 and 372.023, Local Government Code, to the assessment of costs and Sections 372.024-372.030, Local Government Code, to the issuance of bonds by the county to pay the cost of a transportation project. The commissioners court of the county may contract with a public or private entity to develop, redevelop, or improve a transportation project in the transportation reinvestment zone, including aesthetic improvements, and may pledge and assign to that entity all or a specified amount of the revenue the county receives from the tax increment or the installment payments of the assessments for the payment of the costs of that transportation project. After a pledge or assignment is made, the commissioners court of the county may not rescind its pledge or assignment until the contractual commitments that are the subject of the pledge or assignment have been satisfied. Any amount received from the tax increment or the installment payments of the assessments not pledged or assigned in connection with a transportation project may be used for other purposes as

determined by the commissioners court.

(i) In the alternative, to assist the county in developing a transportation project, if authorized by the commission under Chapter 441, a road utility district may be formed under that chapter that has the same boundaries as a transportation reinvestment zone created under this section.

(i-1) Repealed by Acts 2013, 83rd Leg., R.S., Ch. 114, Sec. 11, eff. September 1, 2013.

(j) In any ad valorem tax year, a road utility district formed as provided by Subsection (i) may impose taxes on property in the district at a rate that when applied to the property in the district would impose taxes in an amount equal to the amount of taxes abated by the commissioners court of the county under Subsection (h). Notwithstanding Section 441.192(a), an election is not required to approve the imposition of the taxes.

(k) A road utility district formed as provided by Subsection (i) may enter into an agreement to fund development of a project or to repay funds owed to the department. Any amount paid for this purpose is considered to be an operating expense of the district. Any taxes collected by the district that are not paid for this purpose may be used for any district purpose.

(k-1) To accommodate changes in the limits of a project for which a reinvestment zone was designated, the boundaries of a zone may be amended at any time, except that property may not be removed or excluded from a designated zone if any part of the tax increment or assessment has been assigned or pledged directly by the county or through another entity to secure bonds or other obligations issued to obtain funding or development of a project, and property may not be added to a designated zone unless the commissioners court of the county complies with Subsections (e) and (f).

(l) Except as provided by Subsection (m), a transportation reinvestment zone, a tax abatement agreement entered into under Subsection (h), or an order or resolution on the abatement of taxes or the grant of relief from taxes under that subsection terminates on December 31 of the year in which the county completes:

- (1) all contractual requirements that included the pledge or assignment of all or a portion of:
 - (A) money deposited to a tax increment account; or
 - (B) the assessments collected under this section; or
- (2) the repayment of money owed under an agreement for the

development, redevelopment, or improvement of the project or projects for which the zone was designated.

(m) A transportation reinvestment zone terminates on December 31 of the 10th year after the year the zone was designated, if before that date the county has not used the zone for the purpose for which it was designated.

Sec. 222.1071. COUNTY ENERGY TRANSPORTATION REINVESTMENT ZONES.

(a) A county shall determine the amount of the tax increment for a county energy transportation reinvestment zone in the same manner the county would determine the tax increment as provided in Section 222.107(a) for a county transportation reinvestment zone.

(b) A county, after determining that an area is affected

because of oil and gas exploration and production activities and would benefit from funding under Chapter 256, by order or resolution of the commissioners court:

(1) may designate a contiguous geographic area in the jurisdiction of the county to be a county energy transportation reinvestment zone to promote one or more transportation infrastructure projects, as that term is defined by Section 256.101, located in the zone; and

(2) may jointly administer a county energy transportation reinvestment zone with a contiguous county energy transportation reinvestment zone formed by another county.

(c) A commissioners court must:

(1) dedicate or pledge all of the captured appraised value of real property located in the county energy transportation reinvestment zone to transportation infrastructure projects; and

(2) comply with all applicable laws in the application of this chapter.

(d) Not later than the 30th day before the date a commissioners court proposes to designate an area as a county energy transportation reinvestment zone under this section, the commissioners court must hold a public hearing on the creation of the zone and its benefits to the county and to property in the proposed zone. At the hearing an interested person may speak for or against the designation of the zone, its boundaries, the joint administration of a zone in another county, or the use of tax increment paid into the tax increment account.

(e) Not later than the seventh day before the date of the hearing, notice of the hearing and the intent to create a zone must be published in a newspaper having general circulation in the county.

(f) The order or resolution designating an area as a county energy transportation reinvestment zone must:

(1) describe the boundaries of the zone with sufficient definiteness to identify with ordinary and reasonable certainty the territory included in the zone;

(2) provide that the zone takes effect immediately on adoption of the order or resolution designating an area and that the base year shall be the year of passage of the order or resolution designating an area or some year in the future;

(3) establish an ad valorem tax increment account for the zone or provide for the establishment of a joint ad valorem tax

increment account, if applicable; and

(4) if two or more counties are designating a zone for the same transportation infrastructure project or projects, include a finding that:

(A) the project or projects will benefit the property and residents located in the zone;

(B) the creation of the zone will serve a public purpose of the county; and

(C) details the transportation infrastructure projects for which each county is responsible.

(g) Compliance with the requirements of this section constitutes designation of an area as a county energy transportation reinvestment zone without further hearings or other procedural requirements.

(h) The county may, from taxes collected on property in a zone, pay into a tax increment account for the zone or zones an amount equal to the tax increment produced by the county less any amounts allocated under previous agreements, including agreements under Section 381.004, Local Government Code, or Chapter 312, Tax Code.

(i) The county may:

(1) use money in the tax increment account to provide:

(A) matching funds under Section 256.105; and

(B) funding for one or more transportation infrastructure projects located in the zone;

(2) apply for grants under Subchapter C, Chapter 256, subject to Section 222.1072;

(3) use five percent of any grant distributed to the county under Subchapter C, Chapter 256, for the administration of a county energy transportation reinvestment zone, not to exceed \$250,000;

(4) enter into an agreement to provide for the joint administration of county energy transportation reinvestment zones if the commissioners court of the county has designated a county energy transportation reinvestment zone under this section for the same transportation infrastructure project or projects as another county commissioners court; and

(5) pledge money in the tax increment account to a road utility district formed as provided by Subsection (n).

(j) Tax increment paid into a tax increment account may not be pledged as security for bonded indebtedness.

(k) A county energy transportation reinvestment zone terminates

on December 31 of the 10th year after the year the zone was designated unless extended by an act of the county commissioners court that designated the zone. The extension may not exceed five years. On termination of the zone, any money remaining in the tax increment account must be transferred to the road and bridge fund described by Chapter 256 for the county that deposited the money into the tax increment account.

(l) The captured appraised value of real property located in a county energy transportation reinvestment zone shall be treated as provided by Section 26.03, Tax Code.

(m) The commissioners court of a county may enter into an agreement with the department to designate a county energy transportation reinvestment zone under this section for a specified transportation infrastructure project involving a state highway located in the proposed zone.

(n) In the alternative, to assist the county in developing a transportation infrastructure project, if authorized by the commission under Chapter 441, a road utility district may be formed under that chapter that has the same boundaries as a county energy transportation reinvestment zone created under this section. The road utility district may issue bonds to pay all or part of the cost of a transportation infrastructure project and may pledge and assign all or a specified amount of money in the tax increment account to secure those bonds if the county:

(1) collects a tax increment; and

(2) pledges all or a specified amount of the tax increment to the road utility district.

(o) A road utility district formed as provided by Subsection (n) may enter into an agreement to fund development of a transportation infrastructure project or to repay funds owed to the department. Any amount paid for this purpose is considered to be an operating expense of the district. Any taxes collected by the district that are not paid for this purpose may be used for any district purpose.

Added by Acts 2013, 83rd Leg., R.S., Ch. 1372 (S.B. [1747](#)), Sec. 2, eff. September 1, 2013.

Sec. 222.1072. ADVISORY BOARD OF COUNTY ENERGY TRANSPORTATION

REINVESTMENT ZONE. (a) A county is eligible to apply for a grant under Subchapter C, Chapter 256, if the county creates an advisory board to advise the county on the establishment, administration, and expenditures of a county energy transportation reinvestment zone. The county commissioners court shall determine the terms and duties of the advisory board members.

(b) Except as provided by Subsection (c), the advisory board of a county energy transportation reinvestment zone consists of the following members appointed by the county judge and approved by the county commissioners court:

- (1) up to three oil and gas company representatives who perform company activities in the county and are local taxpayers; and
- (2) two public members.

(c) County energy transportation reinvestment zones that are jointly administered are advised by a single joint advisory board for the zones. A joint advisory board under this subsection consists of members appointed under Subsection (b) for each zone to be jointly administered.

(d) An advisory board member may not receive compensation for service on the board or reimbursement for expenses incurred in performing services as a member.

Added by Acts 2013, 83rd Leg., R.S., Ch. 1372 (S.B. [1747](#)), Sec. 2, eff. September 1, 2013.

Sec. 222.1075. PORT AUTHORITY TRANSPORTATION REINVESTMENT ZONE.

(a) In this section:

(1) "Port authority" means a port authority or navigation district created or operating under Section 52, Article III, or Section 59, Article XVI, Texas Constitution.

(2) "Port commission" means the governing body of a port authority or navigation district.

(3) "Port project" means a project that is necessary or convenient for the proper operation of a maritime port or waterway and that will improve the security, movement, and intermodal transportation of cargo or passengers in commerce and trade, including dredging, disposal, and other projects.

(b) In this section:

- (1) the amount of a port authority's tax increment for a

year is the amount of ad valorem taxes levied and collected by the port authority or by the commissioners court on behalf of the port authority for that year on the captured appraised value of real property taxable by the port authority and located in a transportation reinvestment zone under this section;

(2) the captured appraised value of real property taxable by a port authority for a year is the total appraised value of all real property taxable by the port authority and located in a transportation reinvestment zone for that year less the tax increment base of the port authority; and

(3) the tax increment base of a port authority is the total appraised value of all real property taxable by the port authority and located in a transportation reinvestment zone for the year in which the zone was designated under this section.

(c) The port commission of the port authority, after determining that an area is unproductive or underdeveloped and that action under this section would improve the security, movement, and intermodal transportation of cargo or passengers in commerce and trade, by order or resolution may designate a contiguous geographic area in the jurisdiction of the port authority to be a transportation reinvestment zone to promote a port project and for the purpose of abating ad valorem taxes or granting other relief from taxes imposed by the county on real property located in the zone.

(d) The port commission must comply with all applicable laws in the application of this chapter.

(e) Not later than the 30th day before the date the port commission proposes to designate an area as a transportation reinvestment zone under this section, the port commission must hold a public hearing on the creation of the zone, its benefits to the port authority and to property in the proposed zone, and the abatement of ad valorem taxes or the grant of other relief from ad valorem taxes imposed by the port authority on real property located in the zone. At the hearing an interested person may speak for or against the designation of the zone, its boundaries, or the abatement of or other relief from port authority taxes on real property in the zone. Not later than the seventh day before the date of the hearing, notice of the hearing and the intent to create a zone must be published in a newspaper having general circulation in the county in which the zone is proposed to be located.

(f) The order or resolution designating an area as a

transportation reinvestment zone must:

(1) describe the boundaries of the zone with sufficient definiteness to identify with ordinary and reasonable certainty the territory included in the zone;

(2) provide that the zone takes effect immediately on adoption of the order or resolution and that the base year shall be the year of passage of the order or resolution or some year in the future;

(3) assign a name to the zone for identification, with the first zone designated by a county designated as "Transportation Reinvestment Zone Number One, (name of port authority)," and subsequently designated zones assigned names in the same form numbered consecutively in the order of their designation;

(4) designate the base year for purposes of establishing the tax increment base of the port authority;

(5) establish an ad valorem tax increment account for the zone; and

(6) contain findings that promotion of a port project will improve the security, movement, and intermodal transportation of cargo or passengers in commerce and trade.

(g) Compliance with the requirements of this section constitutes designation of an area as a transportation reinvestment zone without further hearings or other procedural requirements.

(h) The port commission may:

(1) from taxes collected on property in a zone, including maintenance and operation taxes, pay into a tax increment account for the zone an amount equal to the tax increment produced by the port authority less any amounts allocated under previous agreements, including agreements under Chapter 312, Tax Code;

(2) from a tax increment account for the zone, repay any loan or other debt incurred to finance a port project under this section;

(3) by order or resolution enter into an agreement with the owner of any real property located in the transportation reinvestment zone to abate all or a portion of the ad valorem taxes or to grant other relief from the taxes imposed by the port authority on the owner's property in an amount not to exceed the amount calculated under Subsection (b)(1) for that year;

(4) by order or resolution elect to abate all or a portion of the ad valorem taxes imposed by the port authority on all real

property in a zone; or

(5) grant other relief from ad valorem taxes on property in a zone.

(i) All abatements or other relief granted by the port commission in a transportation reinvestment zone must be equal in rate. In any ad valorem tax year, the total amount of the taxes abated or the total amount of other relief granted under this section may not exceed the amount calculated under Subsection (b)(1) for that year, less any amounts allocated under previous agreements, including agreements under Chapter 312, Tax Code.

(j) To further the development of the port project for which the transportation reinvestment zone was designated, a port authority may assess all or part of the cost of the port project against property within the zone. The assessment against each property in the zone may be levied and payable in installments in the same manner as provided for municipal and county public improvement districts under Sections 372.016-372.018, Local Government Code, provided that the installments do not exceed the total amount of the tax abatement or other relief granted under Subsection (h). The port authority has the powers provided to municipalities and counties under Sections 372.015-372.020 and 372.023, Local Government Code, for the assessment of costs and Sections 372.024-372.030, Local Government Code, for the issuance of bonds by the port authority to pay the cost of a port project. The port commission of the port authority may contract with a public or private entity to develop, redevelop, or improve a port project in the transportation reinvestment zone, including aesthetic improvements, and may pledge and assign to that entity all or a specified amount of the revenue the port authority receives from installment payments of the assessments for the payment of the costs of that port project. After a pledge or assignment is made, if the entity that received the pledge or assignment has itself pledged or assigned that amount to secure bonds or other obligations issued to obtain funding for the port project, the port commission of the port authority may not rescind its pledge or assignment until the bonds or other obligations secured by the pledge or assignment have been paid or discharged. Any amount received from installment payments of the assessments not pledged or assigned in connection with the port project may be used for other purposes associated with the port project or in the zone.

(k) To accommodate changes in the limits of the project for

which a reinvestment zone was designated, the boundaries of a zone may be amended at any time, except that property may not be removed or excluded from a designated zone if any part of the assessment has been assigned or pledged directly by the port authority or through another entity to secure bonds or other obligations issued to obtain funding of the project, and property may not be added to a designated zone unless the port commission of the port authority complies with Subsections (e) and (f).

(l) Except as provided by Subsection (m), a tax abatement agreement entered into under Subsection (h), or an order or resolution on the abatement of taxes or the grant of other relief from taxes under that subsection, terminates on December 31 of the year in which the port authority completes any contractual requirement that included the pledge or assignment of assessments collected under this section.

(m) A transportation reinvestment zone terminates on December 31 of the 10th year after the year the zone was designated, if before that date the port authority has not used the zone for the purpose for which it was designated.

Added by Acts 2013, 83rd Leg., R.S., Ch. 1182 (S.B. 971), Sec. 1, eff. September 1, 2013.

Sec. 222.108. TRANSPORTATION REINVESTMENT ZONES FOR OTHER TRANSPORTATION PROJECTS. (a) A municipality or county may establish a transportation reinvestment zone for one or more transportation projects. If all or part of a transportation project is subject to oversight by the department, at the option of the governing body of the municipality or county, the department, to the extent permitted by law, shall delegate full responsibility for the development, design, letting of bids, and construction of the project, including project inspection, to the municipality or county. After assuming responsibility for a project under this subsection, a municipality or county shall enter into an agreement with the department that prescribes:

- (1) the development process;
- (2) the roles and responsibilities of the parties; and
- (3) the timelines for any required reviews or approvals.

(b) Any portion of a transportation project developed under

Subsection (a) that is on the state highway system or is located in the state highway right-of-way must comply with applicable state and federal requirements and criteria for project development, design, and construction, unless the department grants an exception to the municipality or county.

(c) The development, design, and construction plans and specifications for the portions of a project described by Subsection (b) must be reviewed and approved by the department under the agreement entered into under Subsection (a).

(d) In this section, "transportation project" includes:

- (1) transportation projects described by Section 370.003; and
- (2) port security, transportation, or facility projects described by Section 55.001(5).

Sec. 222.109. REDUCTION PROHIBITED. (a) A municipality or county may not be penalized with a reduction in traditional transportation funding because of the designation and use of a transportation reinvestment zone under this chapter. Any funding from the department committed to a project before the date that a transportation reinvestment zone is designated may not be reduced because the transportation reinvestment zone is designated in connection with that project.

(b) The department may not reduce any allocation of traditional transportation funding to any of its districts because a district contains a municipality or county that contains a transportation reinvestment zone designated under this chapter.

Added by Acts 2011, 82nd Leg., R.S., Ch. 475 (H.B. 563), Sec. 5, eff. September 1, 2011.

Sec. 222.110. SALES TAX INCREMENT. (a) In this section:

(1) "Sales tax base" for a transportation reinvestment zone means the amount of sales and use taxes imposed by a municipality under Section 321.101(a), Tax Code, or by a county under Chapter 323, Tax Code, as applicable, attributable to the zone for the year in which the zone was designated under this chapter.

(2) "Transportation reinvestment zone" includes a county energy transportation reinvestment zone.

(b) The governing body of a municipality or county may determine, in an ordinance or order designating an area as a transportation reinvestment zone or in an ordinance or order adopted subsequent to the designation of a zone, the portion or amount of tax increment generated from the sales and use taxes imposed by a municipality under Section 321.101(a), Tax Code, or by a county under Chapter 323, Tax Code, attributable to the zone, above the sales tax base, to be used as provided by Subsection (e). Nothing in this section requires a municipality or county to contribute sales tax increment under this subsection.

(c) A county that designates a portion or amount of sales tax increment under Subsection (b) must establish a tax increment account. A municipality or county shall deposit the designated portion or amount of tax increment under Subsection (b) to the entity's respective tax increment account.

(d) Before pledging or otherwise committing money in the tax increment account under Subsection (c), the governing body of a municipality or county may enter into an agreement, under Subchapter E, Chapter 271, Local Government Code, to authorize and direct the comptroller to:

(1) withhold from any payment to which the municipality or county may be entitled the amount of the payment into the tax increment account under Subsection (b);

(2) deposit that amount into the tax increment account; and

(3) continue withholding and making additional payments into the tax increment account until an amount sufficient to satisfy the amount due has been met.

(e) The sales and use taxes to be deposited into the tax

increment account under this section may be disbursed from the account only to:

(1) pay for projects authorized under Section 222.104 or 222.108; and

(2) notwithstanding Sections 321.506 and 323.505, Tax Code, satisfy claims of holders of tax increment bonds, notes, or other obligations issued or incurred for projects authorized under Section 222.104, 222.1071, or 222.108.

(1) be in an amount equal to the greatest annual amount to be paid the contractor under the contract and remain in effect for one year from the day work is resumed after any default by the contractor; or

(2) be in an amount equal to the amount to be paid the contractor during the term of the bond and be for a term of two years, renewable annually in two-year increments.

(b) In comparing bids submitted for road construction that require paving, the department, a county, or a municipality may give a preference to a bid that provides for using, as a part of the paving material, rubberized asphalt paving described by Subsection (a) if the cost of that paving material does not exceed by more than 15 percent the bid cost of alternative paving materials for the same job. The cost of the materials must be determined by a life-cycle cost benefit analysis.

Sec. 223.203. PROCESS FOR ENTERING INTO COMPREHENSIVE DEVELOPMENT AGREEMENTS. (a) If the department enters into a comprehensive development agreement, the department shall use a competitive procurement process that provides the best value for the department. The department may accept unsolicited proposals for a proposed project or solicit proposals in accordance with this section.

(b) The department shall establish rules and procedures for accepting unsolicited proposals that require the private entity to include in the proposal:

(1) information regarding the proposed project location, scope, and limits;

(2) information regarding the private entity's qualifications, experience, technical competence, and capability to develop the project; and

(3) any other information the department considers relevant or necessary.

(c) The department shall publish a notice advertising a request for competing proposals and qualifications in the Texas Register that includes the criteria to be used to evaluate the proposals, the relative weight given to the criteria, and a deadline by which proposals must be received if:

(1) the department decides to issue a request for qualifications for a proposed project; or

(2) the department authorizes the further evaluation of an unsolicited proposal.

(d) A proposal submitted in response to a request published under Subsection (c) must contain, at a minimum, the information required by Subsections (b)(2) and (3).

(e) The department may interview a private entity submitting an unsolicited proposal or responding to a request under Subsection (c). The department shall evaluate each proposal based on the criteria described in the request for competing proposals and qualifications and may qualify or shortlist private entities to submit detailed proposals under Subsection (f). The department must qualify or shortlist at least two private entities to submit detailed proposals for a project under Subsection (f) unless the department does not receive more than one proposal or one response to a request under

Subsection (c).

(e-1) Notwithstanding the requirements of this section, the department may prequalify a private entity to submit a detailed proposal to provide services under a design-build contract. The department is not required to publish a request under Subsection (c) for a design-build contract, and may enter into a design-build contract based solely on an evaluation of detailed proposals submitted in response to a request under Subsection (f) by prequalified private entities. The commission shall adopt rules establishing criteria for the prequalification of a private entity that include the precertification requirements applicable to providers of engineering services and the qualification requirements for bidders on highway construction contracts. Rules for design-build projects adopted pursuant to this subsection shall also provide for an expedited selection process that includes design innovation as a selection criterion.

(e-2) In this section, "design-build contract" means a comprehensive development agreement that includes the design and construction of a turnpike project, does not include the financing of a turnpike project, and may include the acquisition, maintenance, or operation of a turnpike project.

(f) The department shall issue a request for detailed proposals from all private entities qualified or shortlisted under Subsection (e) or prequalified under Subsection (e-1) if the department proceeds with the further evaluation of a proposed project. A request under this subsection may require additional information relating to:

- (1) the private entity's qualifications and demonstrated technical competence;
- (2) the feasibility of developing the project as proposed;
- (3) engineering or architectural designs;
- (4) the private entity's ability to meet schedules;
- (5) a financial plan, including costing methodology and cost proposals; or
- (6) any other information the department considers relevant or necessary.

(f-1) A private entity responding to a request for detailed proposals issued under Subsection (f) may submit alternative proposals based on comprehensive development agreements having different terms, with the alternative terms in multiples of 10 years, ranging from 10 years from the later of the date of final acceptance

of the project or the start of revenue operations by the private entity to 50 years from the later of the date of final acceptance of the project or the start of revenue operations by the private entity, not to exceed a total term of 52 years or any lesser term provided in a comprehensive development agreement.

(f-2) A private entity responding to a request for detailed proposals issued under Subsection (f) must identify:

(1) companies that will fill key project roles, including project management, lead design firm, quality control management, and quality assurance management; and

(2) entities that will serve as key task leaders for geotechnical, hydraulics and hydrology, structural, environmental, utility, and right-of-way issues.

(g) In issuing a request for detailed proposals under Subsection (f), the department may solicit input from entities qualified under Subsection (e) or any other person. The department may also solicit input regarding alternative technical concepts after issuing a request under Subsection (f). A technical solution presented with a proposal must be fully responsive to, and have demonstrated resources to be able to fulfill, all technical requirements for the project, including specified quality assurance and quality control program requirements, safety program requirements, and environmental program requirements. A proposal that includes a technical solution that does not meet those requirements is ineligible for further consideration.

(h) The department shall evaluate each proposal based on the criteria described in the request for detailed proposals and select the private entity whose proposal offers the apparent best value to the department.

(i) The department may enter into negotiations with the private entity whose proposal offers the apparent best value.

(j) If at any point in negotiations under Subsection (i) it appears to the department that the highest ranking proposal will not provide the department with the overall best value, the department may enter into negotiations with the private entity submitting the next highest ranking proposal.

(k) The department may withdraw a request for competing proposals and qualifications or a request for detailed proposals at any time. The department may then publish a new request for competing proposals and qualifications.

(1) The department may require that an unsolicited proposal be accompanied by a nonrefundable fee sufficient to cover all or part of its cost to review the proposal.

(1-1) A private entity selected for a comprehensive development agreement may not make changes to the companies or entities identified under Subsection (f-2) unless the original company or entity:

(1) is no longer in business, is unable to fulfill its legal, financial, or business obligations, or can no longer meet the terms of the teaming agreement with the private entity;

(2) voluntarily removes itself from the team;

(3) fails to provide a sufficient number of qualified personnel to fulfill the duties identified during the proposal stage; or

(4) fails to negotiate in good faith in a timely manner in accordance with provisions established in the teaming agreement proposed for the project.

(1-2) If the private entity makes team changes in violation of Subsection (1-1), any cost savings resulting from the change accrue to the state and not to the private entity.

(m) The department may pay an unsuccessful private entity that submits a responsive proposal in response to a request for detailed proposals under Subsection (f) a stipulated amount in exchange for the work product contained in that proposal. A stipulated amount must be stated in the request for proposals and may not exceed the value of any work product contained in the proposal that can, as determined by the department, be used by the department in the performance of its functions. The use by the department of any design element contained in an unsuccessful proposal is at the sole risk and discretion of the department and does not confer liability on the recipient of the stipulated amount under this section. After payment of the stipulated amount:

(1) the department owns with the unsuccessful proposer jointly the rights to, and may make use of any work product contained in, the proposal, including the technologies, techniques, methods, processes, ideas, and information contained in the project design; and

(2) the use by the unsuccessful proposer of any portion of the work product contained in the proposal is at the sole risk of the unsuccessful proposer and does not confer liability on the

department.

(n) The department may prescribe the general form of a comprehensive development agreement and may include any matter the department considers advantageous to the department. The department and the private entity shall finalize the specific terms of a comprehensive development agreement.

(o) Subchapter A of this chapter and Chapter 2254, Government Code, do not apply to a comprehensive development agreement entered into under this subchapter.

(p) All teaming agreements and subconsultant agreements must be executed and provided to the department before the execution of the comprehensive development agreement.

Sec. 223.204. CONFIDENTIALITY OF INFORMATION. (a) To encourage private entities to submit proposals under this subchapter, the following information is confidential, is not subject to disclosure, inspection, or copying under Chapter 552, Government Code, and is not subject to disclosure, discovery, subpoena, or other means of legal compulsion for its release until a final contract for a proposed project is entered into:

(1) all or part of a proposal that is submitted by a private entity for a comprehensive development agreement, except information provided under Sections 223.203(b)(1) and (2), unless the private entity consents to the disclosure of the information;

(2) supplemental information or material submitted by a private entity in connection with a proposal for a comprehensive development agreement, unless the private entity consents to the disclosure of the information or material; and

(3) information created or collected by the department or

its agent during consideration of a proposal for a comprehensive development agreement.

(b) After the department completes its final ranking of proposals under Section 223.203(h), the final rankings of each proposal under each of the published criteria are not confidential.

Sec. 223.205. PERFORMANCE AND PAYMENT SECURITY. (a) Notwithstanding Section 223.006 and the requirements of Subchapter B, Chapter 2253, Government Code, the department shall require a private entity entering into a comprehensive development agreement under this subchapter to provide a performance and payment bond or an alternative form of security in an amount sufficient to:

- (1) ensure the proper performance of the agreement; and
- (2) protect:
 - (A) the department; and
 - (B) payment bond beneficiaries who have a direct

contractual relationship with the private entity or a subcontractor of the private entity to supply labor or material.

(b) A performance and payment bond or alternative form of security shall be in an amount equal to the cost of constructing or maintaining the project.

(c) If the department determines that it is impracticable for a private entity to provide security in the amount described by Subsection (b), the department shall set the amount of the bonds or the alternative forms of security.

(d) A payment or performance bond or alternative form of security is not required for the portion of an agreement that includes only design or planning services, the performance of preliminary studies, or the acquisition of real property.

(e) The amount of the payment security must not be less than the amount of the performance security.

(f) In addition to or instead of a performance and payment bond, the department may require one or more of the following alternative forms of security:

- (1) a cashier's check drawn on a financial entity specified by the department;

(2) a United States bond or note;
(3) an irrevocable bank letter of credit; or

Sec. 223.206. OWNERSHIP OF HIGHWAY. (a) A state highway or another facility described by Section 223.201(a) that is the subject of a comprehensive development agreement with a private entity, including the facilities acquired or constructed on the project, is public property and shall be owned by the department.

(b) Notwithstanding Subsection (a), the department may enter into an agreement that provides for the lease of rights-of-way, the granting of easements, the issuance of franchises, licenses, or permits, or any lawful uses to enable a private entity to construct, operate, and maintain a project, including supplemental facilities. At the termination of the agreement, the highway or other facilities are to be in a state of proper maintenance as determined by the department and shall be returned to the department in satisfactory condition at no further cost.

(c) A highway asset or toll project that is used or leased by a private entity under Section 202.052 or 228.053 for a commercial purpose is not exempt from ad valorem taxation and is subject to local zoning regulations and building standards.

(d) The department may not enter into a comprehensive development agreement with a private entity under this subchapter that provides for the lease, license, or other use of rights-of-way or related property by the private entity for the purpose of constructing, operating, or maintaining an ancillary facility that is used for commercial purposes.

The department may not incur a financial obligation for a private entity that designs, develops, finances, constructs, maintains, or operates a state highway or other facility under this subchapter. The state or a political subdivision of the state is not liable for any financial or other obligations of a project solely because a private entity constructs, finances, or operates any part of the project.

Added by Acts 2005, 79th Leg., Ch. 281 (H.B. 2702), Sec. 2.21, eff. June 14, 2005.

Sec. 223.208. TERMS OF PRIVATE PARTICIPATION. (a) The department shall negotiate the terms of private participation under this subchapter, including:

- (1) methods to determine the applicable cost, profit, and project distribution among the private participants and the department;
- (2) reasonable methods to determine and classify toll rates and responsibility for the setting of tolls;
- (3) acceptable safety and policing standards; and
- (4) other applicable professional, consulting, construction, operation, and maintenance standards, expenses, and costs.

(b) A comprehensive development agreement entered into under this subchapter may include any provision that the department considers appropriate, including provisions:

- (1) providing for the purchase by the department, under terms and conditions agreed to by the parties, of the interest of a private participant in the comprehensive development agreement and related property, including any interest in a highway or other facility designed, developed, financed, constructed, operated, or maintained under the comprehensive development agreement;
- (2) establishing the purchase price for the interest of a private participant in the comprehensive development agreement and related property, which price may be determined in accordance with the methodology established by the parties in the comprehensive development agreement;

(3) providing for the payment of obligations incurred pursuant to the comprehensive development agreement, including any obligation to pay the purchase price for the interest of a private participant in the comprehensive development agreement, from any lawfully available source, including securing such obligations by a pledge of revenues of the commission or the department derived from the applicable project, which pledge shall have such priority as the department may establish;

(4) permitting the private participant to pledge its rights under the comprehensive development agreement;

(5) concerning the private participant's right to operate and collect revenue from the project; and

(6) restricting the right of the commission or the department to terminate the private participant's right to operate and collect revenue from the project unless and until any applicable termination payments have been made.

(c) The department may enter into a comprehensive development agreement under this subchapter with a private participant only if the project is identified in the department's unified transportation program or is located on a transportation corridor identified in the statewide transportation plan.

(d) Section 223.207 does not apply to the obligations of the department under a comprehensive development agreement.

(e) Notwithstanding anything in Section 201.112 or other law to the contrary, and subject to compliance with the dispute resolution procedures set out in the comprehensive development agreement, an obligation of the commission or the department under a comprehensive development agreement entered into under this subchapter to make or secure payments to a person because of the termination of the agreement, including the purchase of the interest of a private participant or other investor in a project, may be enforced by mandamus against the commission, the department, and the comptroller in a district court of Travis County, and the sovereign immunity of the state is waived for that purpose. The district courts of Travis County shall have exclusive jurisdiction and venue over and to determine and adjudicate all issues necessary to adjudicate any action brought under this subsection. The remedy provided by this subsection is in addition to any legal and equitable remedies that may be available to a party to a comprehensive development agreement.

(f) A comprehensive development agreement entered into under

this subchapter and any obligations incurred, issued, or owed under the agreement does not constitute a state security under Chapter 1231, Government Code.

(g) If the department enters into a comprehensive development agreement with a private participant that includes the collection by the private participant of tolls for the use of a toll project, the private participant shall submit to the department for approval:

(1) the methodology for:

- (A) the setting of tolls; and
- (B) increasing the amount of the tolls;

(2) a plan outlining methods the private participant will use to collect the tolls, including:

(A) any charge to be imposed as a penalty for late payment of a toll; and

(B) any charge to be imposed to recover the cost of collecting a delinquent toll; and

(3) any proposed change in an approved methodology for the setting of a toll or a plan for collecting the toll.

(h) A comprehensive development agreement with a private participant that includes the collection by the private participant of tolls for the use of a toll project may be for a term not longer than 50 years from the later of the date of final acceptance of the project or the start of revenue operations by the private participant, not to exceed a total term of 52 years. The comprehensive development agreement must contain an explicit mechanism for setting the price for the purchase by the department of the interest of the private participant in the comprehensive development agreement and related property, including any interest in a highway or other facility designed, developed, financed, constructed, operated, or maintained under the agreement.

Sec. 223.209. RULES, PROCEDURES, AND GUIDELINES GOVERNING SELECTION AND NEGOTIATING PROCESS. (a) The commission shall adopt rules, procedures, and guidelines governing selection of a developer for a comprehensive development agreement and negotiations to promote fairness, obtain private participants in projects, and promote confidence among those participants. The rules must contain criteria relating to the qualifications of the participants and the award of the contracts.

(b) The department shall have up-to-date procedures for participation in negotiations under this subchapter.

(c) The department has exclusive judgment to determine the terms of an agreement.

(2) "Design-build method" means a project delivery method by which an entity contracts with a single entity to provide both design and construction services for the construction, rehabilitation, alteration, or repair of a facility.

(3) "Highway project" means:

(A) a single highway facility between two defined points in a corridor; or

(B) two or more contiguous highway facilities.

Sec. 223.242. SCOPE OF AND LIMITATIONS ON CONTRACTS. (a) Notwithstanding the requirements of Subchapter A and Chapter 2254,

Government Code, the department may use the design-build method for the design, construction, expansion, extension, related capital maintenance, rehabilitation, alteration, or repair of a highway project.

(b) A design-build contract under this subchapter may not grant to a private entity:

- (1) a leasehold interest in the highway project; or
- (2) the right to operate or retain revenue from the operation of a toll project.

(b-1) A design-build contract under this subchapter may include a maintenance agreement requiring a design-build contractor to maintain a project for an initial term of not longer than five years. The maintenance agreement may authorize the department, in its sole discretion, to exercise options extending the term of the maintenance agreement for additional periods beyond the initial maintenance term with each additional period being not longer than five years. The department shall obtain pricing for the maintenance work for each maintenance term. The department may require separate pricing for the maintenance work to be performed for each year of a maintenance term.

(c) In using the design-build method and in entering into a contract for the services of a design-build contractor, the department and the design-build contractor shall follow the procedures and requirements of this subchapter.

(d) The department may enter into a design-build contract for a highway project with a construction cost estimate of \$150 million or more to the department.

(d-1) The department may not enter into more than three contracts under this section in each fiscal year.

(e) Money disbursed by the department to pay engineering costs for the design of a project incurred by the design-build contractor under a design-build contract may not be included in the amounts under Section 223.041:

- (1) required to be spent in a state fiscal biennium for engineering-related services; or
- (2) appropriated in Strategy A.1.1, Plan/Design/Manage or Strategy A.1.2, Contracted Planning and Design of the General Appropriations Act.

(f) The department shall not use the design-build method for the construction, expansion, extension, rehabilitation, alteration,

or repair of a highway project if the project is substantially designed, to the extent described by Section 223.246(a)(5), by the department or another entity other than the design-build contractor.

(g) The department shall not include more than one highway project in a design-build contract.

Sec. 223.243. USE OF ENGINEER OR ENGINEERING FIRM. (a) To act as the department's representative, independent of a design-build contractor, for the procurement process and for the duration of the work on a highway project, the department shall select or designate:

(1) an engineer;

(2) a qualified firm, selected in accordance with Section 2254.004, Government Code, who is independent of the design-build contractor; or

(3) a general engineering consultant that was previously selected by the department and is selected or designated in accordance with Section 2254.004, Government Code.

(b) The selected or designated engineer or firm has full responsibility for complying with Chapter 1001, Occupations Code.

Added by Acts 2011, 82nd Leg., R.S., Ch. 1345 (S.B. 1420), Sec. 34, eff. September 1, 2011.

Sec. 223.244. OTHER PROFESSIONAL SERVICES. (a) The department shall provide or contract for, independently of the design-build contractor, the following services as necessary for the acceptance of the highway project by the department:

(1) inspection services;

(2) construction materials engineering and testing; and

(3) verification testing services.

(b) The department shall ensure that the engineering services contracted for under this section are selected based on demonstrated competence and qualifications.

(c) This section does not preclude a design-build contractor from providing construction quality assurance and quality control under a design-build contract.

Added by Acts 2011, 82nd Leg., R.S., Ch. 1345 (S.B. 1420), Sec. 34, eff. September 1, 2011.

Sec. 223.245. REQUEST FOR QUALIFICATIONS. (a) For any highway project to be delivered through the design-build method, the department must prepare and issue a request for qualifications. A request for qualifications must include:

- (1) information regarding the proposed project's location, scope, and limits;
- (2) information regarding funding that may be available for the project;
- (3) criteria that will be used to evaluate the qualifications statements, which must include a proposer's qualifications, experience, technical competence, and ability to develop the project;
- (4) the relative weight to be given to the criteria; and
- (5) the deadline by which qualifications statements must be received by the department.

(b) The department shall publish notice advertising the issuance of a request for qualifications in the Texas Register and on the department's Internet website.

(c) The department shall evaluate each qualifications statement received in response to a request for qualifications based on the criteria identified in the request. The department may interview responding proposers. Based on the department's evaluation of qualifications statements and interviews, if any, the department shall qualify or short-list proposers to submit proposals.

(d) The department shall qualify or short-list at least two private entities to submit proposals under Section 223.246, but may not qualify or short-list more private entities than the number of private entities designated on the request for qualifications.

(e) The department may withdraw a request for qualifications or request for proposals at any time.

Added by Acts 2011, 82nd Leg., R.S., Ch. 1345 (S.B. 1420), Sec. 34, eff. September 1, 2011.

Sec. 223.246. REQUEST FOR PROPOSALS. (a) The department shall issue a request for proposals to proposers short-listed under Section 223.245. A request for proposals must include:

- (1) information on the overall project goals;
- (2) publicly available cost estimates for the design-build portion of the project;
- (3) materials specifications;
- (4) special material requirements;
- (5) a schematic design approximately 30 percent complete;
- (6) known utilities, provided that the department is not required to undertake an effort to locate utilities;
- (7) quality assurance and quality control requirements;
- (8) the location of relevant structures;
- (9) notice of any rules or goals adopted by the department relating to awarding contracts to disadvantaged business enterprises or small business enterprises;
- (10) available geotechnical or other information related to the project;
- (11) the status of any environmental review of the project;
- (12) detailed instructions for preparing the technical proposal required under Subsection (d), including a description of the form and level of completeness of drawings expected;
- (13) the relative weighting of the technical and cost proposals required under Subsection (d) and the formula by which the proposals will be evaluated and ranked; and
- (14) the criteria to be used in evaluating the technical proposals, and the relative weighting of those criteria.

(b) The formula used to evaluate proposals under Subsection (a)(13) must allocate at least 70 percent of the weighting to the cost proposal.

(c) A request for proposals must also include a general form of the design-build contract that the department proposes and that may be modified as a result of negotiations prior to contract execution.

(d) Each response to a request for proposals must include a sealed technical proposal and a separate sealed cost proposal submitted to the department by the date specified in the request for proposals.

(e) The technical proposal must address:

- (1) the proposer's qualifications and demonstrated technical competence, unless that information was submitted to the department and evaluated by the department under Section 223.245;
- (2) the feasibility of developing the project as proposed, including identification of anticipated problems;
- (3) the proposed solutions to anticipated problems;
- (4) the ability of the proposer to meet schedules;
- (5) the conceptual engineering design proposed; and
- (6) any other information requested by the department.

(f) The department may provide for the submission of alternative technical concepts by a proposer. If the department provides for the submission of alternative technical concepts, the department must prescribe a process for notifying a proposer whether the proposer's alternative technical concepts are approved for inclusion in a technical proposal.

(g) The cost proposal must include:

- (1) the cost of delivering the project; and
- (2) the estimated number of days required to complete the project.

(h) A response to a request for proposals shall be due not later than the 180th day after the final request for proposals is issued by the department. This subsection does not preclude the release by the department of a draft request for proposals for purposes of receiving input from short-listed proposers.

(i) The department shall first open, evaluate, and score each responsive technical proposal submitted on the basis of the criteria described in the request for proposals and assign points on the basis of the weighting specified in the request for proposals. The department may reject as nonresponsive any proposer that makes a significant change to the composition of its design-build team as initially submitted that was not approved by the department as provided in the request for proposals. The department shall subsequently open, evaluate, and score the cost proposals from proposers that submitted a responsive technical proposal and assign points on the basis of the weighting specified in the request for proposals. The department shall rank the proposers in accordance with the formula provided in the request for proposals.

(j) If the department receives only one response to a request for proposals, an independent bid evaluation by the department must confirm and validate that:

(1) the project procurement delivered value for the public investment; and

(2) no anticompetitive practices were involved in the procurement.

Added by Acts 2011, 82nd Leg., R.S., Ch. 1345 (S.B. 1420), Sec. 34, eff. September 1, 2011.

Sec. 223.247. NEGOTIATION. (a) After ranking the proposers under Section 223.246(i), the department shall first attempt to negotiate a contract with the highest-ranked proposer. The department may include in the negotiations alternative technical concepts proposed by other proposers, subject to Section 223.249.

(b) If the department is unable to negotiate a satisfactory contract with the highest-ranked proposer, the department shall, formally and in writing, end all negotiations with that proposer and proceed to negotiate with the next proposer in the order of the selection ranking until a contract is reached or negotiations with all ranked proposers end.

Added by Acts 2011, 82nd Leg., R.S., Ch. 1345 (S.B. 1420), Sec. 34, eff. September 1, 2011.

Sec. 223.248. ASSUMPTION OF RISKS AND COSTS. (a) Except as provided by Subsection (b), the department shall assume:

(1) all risks and costs associated with:

(A) changes and modifications to the scope of the project requested by the department;

(B) unknown or differing conditions at the site of the project;

(C) applicable environmental clearance and other regulatory permitting necessary for the project; and

(D) natural disasters and other force majeure events; and

(2) all costs associated with property acquisition, other than costs associated with acquiring a temporary easement or work area used for staging or constructing the project.

(b) A design-build contractor may assume some or all of the risks or costs described by Subsection (a) if the terms of the

assumption are reflected in the final request for proposals, including all supplements to the request.

Added by Acts 2011, 82nd Leg., R.S., Ch. 1345 (S.B. 1420), Sec. 34, eff. September 1, 2011.

Sec. 223.249. STIPEND AMOUNT FOR UNSUCCESSFUL PROPOSERS. (a) The department shall pay an unsuccessful proposer that submits a responsive proposal a stipend for the work product contained in the proposal that the department determines can be used by the department in the performance of the department's functions. The stipend must be a minimum of twenty-five hundredths of one percent of the contract amount and must be specified in the initial request for proposals, but may not exceed the value of the work product contained in the proposal that the department determines can be used by the department in the performance of the department's functions. If the department determines that the value of the work product is less than the stipend amount, the department shall provide the proposer with a detailed explanation of the valuation, including the methodology and assumptions used by the department in determining the value of the work product. After payment of the stipend, the department may make use of any work product contained in the unsuccessful proposal, including the techniques, methods, processes, and information contained in the proposal. The use by the department of any design element contained in an unsuccessful proposal is at the sole risk and discretion of the department and does not confer liability on the recipient of the stipend under this subsection.

(b) In a request for proposals, the department shall provide for the payment of a partial stipend in the event that a procurement is terminated before the execution of a design-build contract.

Added by Acts 2011, 82nd Leg., R.S., Ch. 1345 (S.B. 1420), Sec. 34, eff. September 1, 2011.

Sec. 223.250. PERFORMANCE OR PAYMENT BOND. (a) The department shall require a design-build contractor to provide:

- (1) a performance and payment bond;
- (2) an alternative form of security; or
- (3) a combination of the forms of security described by

Subdivisions (1) and (2).

(b) Except as provided by Subsection (c), a performance and payment bond, alternative form of security, or combination of the forms shall be in an amount equal to the cost of constructing or maintaining the project.

(c) If the department determines that it is impracticable for a private entity to provide security in the amount described by Subsection (b), the department shall set the amount of the security.

(d) A performance and payment bond is not required for the portion of a design-build contract under this section that includes design services only.

(e) The department may require one or more of the following alternative forms of security:

(1) a cashier's check drawn on a financial entity specified by the department;

(2) a United States bond or note;

(3) an irrevocable bank letter of credit provided by a bank meeting the requirements specified in the request for proposals; or

(4) any other form of security determined suitable by the department.

(f) Section 223.006 of this code and Chapter 2253, Government Code, do not apply to a bond or alternative form of security required under this section.

Added by Acts 2011, 82nd Leg., R.S., Ch. 1345 (S.B. 1420), Sec. 34, eff. September 1, 2011.

(b) If the acquisition is by eminent domain, the participation by the department shall be based on the final judgment if the department has been notified in writing before the filing of the suit and given prompt notice as to all action taken in the suit. (b) The department may make a purchase under Subsection (a)

only if the department first determines that the owner is unable to lease or rent the property because of the impending acquisition by the department.

(c) The consideration for the purchase of a lease right under this section may not exceed the fair market rental value of the property as determined by the department and shall be credited against the total compensation due the owner when the department acquires the property.

(b) The department shall allocate the distribution of funds to department districts in the region that are located in the boundaries of the metropolitan planning organization in which the project that is the subject of the comprehensive development agreement is located based on the percentage of toll revenue from users from each department district of the project. To assist the department in determining the allocation, each entity responsible for collecting tolls for a project shall calculate on an annual basis the percentage of toll revenue from users of the project from each department district based on the number of recorded electronic toll collections.

(c) The commission or the department may not:

(1) revise the formula as provided in the department's unified transportation program, or its successor document, in a manner that results in a decrease of a department district's allocation because of a payment under Subsection (a); or

(2) take any other action that would reduce funding allocated to a department district because of payments received under a comprehensive development agreement.

(d) A metropolitan planning organization may not take any action that would reduce distribution of funds or other resources to a department district because of the use of a payment or other revenue under Subsection (a).

To assist the department in determining the allocation, each entity responsible for collecting tolls for a project or system shall calculate on an annual basis the percentage of toll revenue from users of the project or system in each department district based on the number of recorded electronic toll collections.

(b) The commission may not revise the formula as provided in the department's unified transportation program, or its successor document, in a manner that results in a decrease of a district's allocation because of a payment under Subsection (a).

(c) The commission may not take an action under this section that violates, impairs, or is inconsistent with a bond order, trust agreement, or indenture governing the use of the surplus revenue.

(b) If the commission authorizes the department to charge a toll under Subsection (a), the department may enter into an agreement with a regional tollway authority described in Chapter 366, a transit authority described in Chapter 451, 452, or 453, a coordinated county transportation authority under Chapter 460, a regional mobility

(c) The commission may by order authorize the department or the entity contracted to operate the toll lane to set the amount of toll charges. Any toll charges shall be imposed in a reasonable and nondiscriminatory manner.

(d) Revenue generated from toll charges and collection fees assessed by an entity with whom the department contracts under this section shall be allocated as required by the terms of the agreement.

Sec. 228.008. TOLLS ON EXCLUSIVE LANE. The department may not charge a toll for the use of an exclusive lane unless:

(1) the lanes or multilane facility adjacent to the exclusive lane is tolled; or

(2) a vehicle that is authorized to use the tolled exclusive lane is authorized to use nontolled adjacent lanes or an adjacent nontolled multilane facility.

Sec. 228.010. ESTABLISHMENT OF TOLL SYSTEMS. (a) If the commission determines that the mobility needs of a region of this state could be most efficiently and economically met by jointly operating two or more toll projects in that region as one operational and financial enterprise, it may create a system composed of those projects. The commission may create more than one system in a region and may combine two or more systems in a region into one system. The department may finance, acquire, construct, and operate additional toll projects in the region as additions to or expansions of a system if the commission determines that the toll project could most efficiently and economically be acquired or constructed if it were part of the system and that the addition will benefit the system.

(b) The revenue of a system shall be accounted for separately and may not be commingled with the revenue of a toll project that is not part of the system or with the revenue of another system.

Sec. 228.011. TOLL PROJECTS IN CERTAIN COUNTIES. (a) This section applies only to a county acting under Chapter 284 for:

(1) the widening, expansion, reconstruction, and continued operation of existing toll projects of the county; or

(2) the development, construction, and operation of all or a portion of any of the following toll projects, a component of that project, or the functional equivalent of that project:

- (A) Beltway 8 Tollway East, between US 59 North and US 90 East;
- (B) Hardy Downtown Connector, consisting of the proposed direct connection from the Hardy Toll Road southern terminus at Loop 610 to downtown Houston;
- (C) State Highway 288, between US 59 and Grand Parkway South (State Highway 99);
- (D) US 290 Toll Lanes, between IH 610 West and the Grand Parkway Northwest (State Highway 99);
- (E) Fairmont Parkway East, between Beltway 8 East and Grand Parkway East (State Highway 99);
- (F) South Post Oak Road Extension, between IH 610 South and near the intersection of Beltway 8 and Hillcroft in the vicinity of the Fort Bend Parkway Tollway;
- (G) Westpark Toll Road Phase II, between Grand Parkway (State Highway 99) and FM 1463;
- (H) Fort Bend Parkway, between State Highway 6 and the Brazos River; and
- (I) Montgomery County Parkway, between State Highway 242 and the Grand Parkway (State Highway 99), and if the Grand Parkway project has not begun construction, a nontolled extension of the Montgomery County Parkway to allow a connection to Interstate Highway 45.

(b) The county is the entity with the primary responsibility for the financing, construction, and operation of a toll project located in the county. A county may develop, construct, and operate a project described in Subsection (a) at any time, regardless of whether it receives a first option notice from the commission or the department under Subsection (e).

(b-1) Consistent with federal law, the department shall assist the county in the financing, construction, and operation of a toll project in the county by allowing the county to use state highway right-of-way owned by the department and to access the state highway system. The commission or the department may not require the county to pay for the use of the right-of-way or access, except to reimburse the department as provided by this subsection. The county shall pay an amount to reimburse the department for the department's actual costs to acquire the right-of-way. If the department cannot determine that amount, the amount shall be determined based on the average historical right-of-way acquisition values for right-of-way

located in proximity to the project on the date of original acquisition of the right-of-way. Money received by the department under this subsection shall be deposited in the state highway fund and used in the department district in which the project is located.

(c) The department and the county must enter into an agreement that includes reasonable terms to accommodate the use of the right-of-way by the county and to protect the interests of the commission and the department in the use of the right-of-way for operations of the department, including public safety and congestion mitigation on the right-of-way.

(d) Subsection (b) does not limit the authority of the commission or the department to participate in the cost of acquiring, constructing, maintaining, or operating a project of the county under Chapter 284.

(e) Before the department may enter into a contract for the financing, construction, or operation of a proposed or existing toll project any part of which is located in the county, the commission or department shall provide the county the first option to finance, construct, or operate, as applicable, the portion of the toll project located in the county:

(1) on terms agreeable to the county; and

(2) in a manner determined by the county to be consistent with the practices and procedures by which the county finances, constructs, or operates a project.

(f) A county's right to exercise the first option under Subsection (e) is effective for six months after the date of the receipt by the county of written notice from the commission or the department meeting the requirements of Subsection (e) and describing in reasonable detail the location of the toll project, a projected cost estimate, sources and uses of funds, and a construction schedule. If a county exercises the first option with respect to a toll project, the county must enter into one or more contracts for the financing, construction, or operation of the toll project within two years after the date on which all environmental requirements necessary for the development of the project are secured and all legal challenges to development are concluded. A contract may include agreements for design of the project, acquisition of right-of-way, and utility relocation. If the county does not enter into a contract during the two-year period, the commission or the department may enter into a contract for the financing, construction, or

operation of the toll project with a different entity.

(g) An agreement entered into by the county and the department in connection with a project under Chapter 284 that is financed, constructed, or operated by the county and that is on or directly connected to a highway in the state highway system does not create a joint enterprise for liability purposes.

(h) If the county approves, the commission may remove any right-of-way to be used by a county under this section from the state highway system. If the right-of-way used by a county under this section remains part of the state highway system, the county must comply with department design and construction standards.

(i) Notwithstanding an action of a county taken under this section, the commission or department may take any action that is necessary in its reasonable judgment to comply with any federal requirement to enable this state to receive federal-aid highway funds.

(j) Notwithstanding any other law, the commission and the department are not liable for any damages that result from a county's use of state highway right-of-way or access to the state highway system under this section, regardless of the legal theory, statute, or cause of action under which liability is asserted.

Sec. 228.012. PROJECT SUBACCOUNTS. (a) The department shall create a separate account in the state highway fund to hold payments received by the department under a comprehensive development agreement and the surplus revenue of a toll project or system. The department shall create subaccounts in the account for each project, system, or region. Interest earned on money in a subaccount shall be deposited to the credit of that subaccount.

(b) The department shall hold money in a subaccount in trust for the benefit of the region in which a project or system is located and may assign the responsibility for allocating money in a subaccount to a metropolitan planning organization in which the

region is located for projects approved by the department. At the time the project is approved by the department money shall be allocated and distributed to projects authorized by Section 228.0055 or Section 228.006, as applicable.

(c) Not later than January 1 of each odd-numbered year, the department shall submit to the Legislative Budget Board and the Governor's Office of Budget, Planning, and Policy a report on cash balances in the subaccounts created under this section and expenditures made with money in those subaccounts. The report must be in the form prescribed by the Legislative Budget Board.

(d) The commission or the department may not:

- (1) revise the formula as provided in the department's unified transportation program or a successor document in a manner that results in a decrease of a department district's allocation because of the deposit of a payment into a project subaccount; or
- (2) take any other action that would reduce funding allocated to a department district because of the deposit of a payment into a project subaccount.

Sec. 228.013. DETERMINATION OF FINANCIAL TERMS FOR CERTAIN TOLL PROJECTS. (a) This section applies only to a proposed department toll project in which a private entity has a financial interest in the project's performance and for which:

- (1) funds dedicated to or controlled by a region will be used;
 - (2) right-of-way is provided by a municipality or county;
- or
- (3) revenues dedicated to or controlled by a municipality or county will be used.

(b) The distribution of a project's financial risk, the method of financing for a project, and the tolling structure and methodology must be determined by a committee consisting of the following members:

- (1) a representative of the department;
- (2) a representative of any local toll project entity, as defined by Section 371.001, for the area in which the project is located;
- (3) a representative of the applicable metropolitan planning organization; and
- (4) a representative of each municipality or county that has provided revenue or right-of-way as described by Subsection (a).

(b) A person that enters into an agreement with the department to provide services for a customer to pay an amount on an electronic toll collection customer account at a location other than a department office may collect from the customer a service charge in addition to the amount paid on the account.

(c) The commission by rule shall set the maximum amount a person may collect as a service charge under Subsection (b), which may not exceed \$3 for a payment transaction.

(1) impose tolls for the use of each toll project or system and the different segments or parts of each project or system; and

(2) notwithstanding anything in Chapter 202 to the contrary, contract with a person for the use of part of a toll project or system or lease part of a toll project or system for a gas station, garage, store, hotel, restaurant, railroad tracks, utilities, and telecommunications facilities and equipment and set the terms for the use or lease.

(b) The tolls shall be set so that, at a minimum, the aggregate of tolls from the toll project or system:

(1) provides a fund sufficient with other revenue and contributions, if any, to pay:

(A) the cost of maintaining, repairing, and operating the project or system; and

(B) the principal of and interest on the bonds issued under Subchapter C for the project or system as those bonds become due and payable; and

(2) creates reserves for the purposes listed under Subdivision (1).

(c) The tolls are not subject to supervision or regulation by any other state agency.

(d) The tolls and other revenue derived from the toll project or system for which bonds were issued, except the part necessary to pay the cost of maintenance, repair, and operation and to provide reserves for those costs as may be provided in the order authorizing the issuance of the bonds or in the trust agreement securing the bonds, shall be set aside at regular intervals as may be provided in the order or trust agreement in a sinking fund that is pledged to and charged with the payment of:

(1) interest on the bonds as it becomes due;

(2) principal of the bonds as it becomes due;

(3) necessary charges of paying agents for paying principal

and interest; and

(4) the redemption price or the purchase price of bonds retired by call or purchase as provided by the bonds.

Sec. 228.0545. ALTERNATIVE TOLLING METHODS. (a) As an alternative to requiring payment of a toll at the time a vehicle is driven or towed through a toll collection facility, the department may use video billing or other tolling methods to permit the registered owner of the vehicle to pay the toll at a later date.

(b) The department may use automated enforcement technology authorized under Section 228.058 to identify the registered owner of the vehicle for purposes of billing, collection, and enforcement activities.

(c) The department shall send by first class mail to the registered owner of the vehicle a written notice of the total amount due. The notice must specify the date, which may not be earlier than the 30th day after the date the notice is mailed, by which the amount due must be paid. The registered owner shall pay the amount due on or before the date specified in the notice.

(d) The department shall send the notice required under Subsection (c) and subsequent notices to:

(1) the registered owner's address as shown in the vehicle registration records of the Texas Department of Motor Vehicles or the analogous department or agency of another state or country; or

(2) an alternate address provided by the owner or derived through other reliable means.

Added by Acts 2011, 82nd Leg., R.S., Ch. 641 (S.B. 959), Sec. 3, eff. June 17, 2011.

Sec. 228.055. ADMINISTRATIVE FEE; NOTICE; OFFENSE. (a) In the event of nonpayment of the toll as required by Section 228.054 or 228.0545, on issuance of a written notice of nonpayment, the registered owner of the nonpaying vehicle is liable for the payment of both the proper toll and an administrative fee.

(b) The department may impose and collect the administrative fee, so as to recover the cost of collecting the unpaid toll, not to exceed \$100. The department shall send a written notice of nonpayment to the registered owner of the vehicle at that owner's address as shown in the vehicle registration records of the Texas Department of Motor Vehicles or the analogous department or agency of another state or country or at an alternate address provided by the owner or derived through other reliable means. The notice of nonpayment shall be sent by first class mail and may require payment not sooner than the 30th day after the date the notice was mailed. The registered owner shall pay a separate toll and administrative fee for each event of nonpayment under Section 228.054 or 228.0545.

(c) The registered owner of a vehicle for which the proper toll was not paid who is mailed a written notice of nonpayment under Subsection (b) and fails to pay the proper toll and administrative fee within the time specified by the notice of nonpayment commits an offense. Each failure to pay a toll or administrative fee under this subsection is a separate offense.

(d) It is an exception to the application of Subsection (a) or (c) if the registered owner of the vehicle is a lessor of the vehicle and not later than the 30th day after the date the notice of nonpayment is mailed provides to the department:

(1) a copy of the rental, lease, or other contract document covering the vehicle on the date of the nonpayment under Section 228.054 or the date the vehicle was driven or towed through a toll

collection facility that results in a notice issued under Section 228.0545, with the name and address of the lessee clearly legible; or

(2) electronic data, in a format agreed on by the department and the lessor, other than a photocopy or scan of a rental or lease contract, that contains the information required under Sections 521.460(c)(1), (2), and (3) covering the vehicle on the date of the nonpayment under Section 228.054 or the date the vehicle was driven or towed through a toll collection facility that results in a notice issued under Section 228.0545.

(d-1) If the lessor provides the required information within the period prescribed under Subsection (d), the department may send a notice of nonpayment to the lessee at the address provided under Subsection (d) by first class mail before the 30th day after the date of receipt of the required information from the lessor. The lessee of the vehicle for which the proper toll was not paid who is mailed a written notice of nonpayment under this subsection and fails to pay the proper toll and administrative fee within the time specified by the notice of nonpayment commits an offense. The lessee shall pay a separate toll and administrative fee for each event of nonpayment. Each failure to pay a toll or administrative fee under this subsection is a separate offense.

(e) It is an exception to the application of Subsection (a) or (c) if the registered owner of the vehicle transferred ownership of the vehicle to another person before the event of nonpayment under Section 228.054 occurred or before the date the vehicle was driven or towed through a toll collection facility that results in a notice issued under Section 228.0545, submitted written notice of the transfer to the department in accordance with Section 501.147, and, before the 30th day after the date the notice of nonpayment is mailed, provides to the department the name and address of the person to whom the vehicle was transferred. If the former owner of the vehicle provides the required information within the period prescribed, the department may send a notice of nonpayment to the person to whom ownership of the vehicle was transferred at the address provided by the former owner by first class mail before the 30th day after the date of receipt of the required information from the former owner. The department may send all subsequent notices of nonpayment associated with the vehicle to the person to whom ownership of the vehicle was transferred at the address provided by the former owner or an alternate address provided by the subsequent

owner or derived through other reliable means. The subsequent owner of the vehicle for which the proper toll was not paid who is mailed a written notice of nonpayment under this subsection and fails to pay the proper toll and administrative fee within the time specified by the notice of nonpayment commits an offense. The subsequent owner shall pay a separate toll and administrative fee for each event of nonpayment under Section 228.054 or 228.0545. Each failure to pay a toll or administrative fee under this subsection is a separate offense.

(f) An offense under this section is a misdemeanor punishable by a fine not to exceed \$250.

(g) The court in which a person is convicted of an offense under this section shall also collect the proper toll and administrative fee and forward the toll and fee to the department for deposit in the depository bank used for that purpose.

(h) Notwithstanding the requirement in Subsections (b), (d-1), and (e) for payment of a separate administrative fee for each event of nonpayment under Section 228.054 or 228.0545, the department may impose one administrative fee that covers multiple events of nonpayment.

(i) The department may contract, in accordance with Section 2107.003, Government Code, with a person to collect the unpaid toll and administrative fee before referring the matter to a court with jurisdiction over the offense.

Sec. 228.056. PRESUMPTIONS; PRIMA FACIE EVIDENCE; DEFENSES.

(a) In the prosecution of an offense under Section 228.054 or 228.055, proof that the vehicle was driven or towed through the toll collection facility without payment of the proper toll may be shown by a video recording, photograph, electronic recording, or other appropriate evidence, including evidence obtained by automated enforcement technology.

(b) In the prosecution of an offense under Section 228.055(c), (d-1), or (e):

(1) it is presumed that the notice of nonpayment was received on the fifth day after the date of mailing;

(2) a computer record of the Texas Department of Motor Vehicles of the registered owner of the vehicle is prima facie evidence of its contents and that the defendant was the registered owner of the vehicle when the underlying event of nonpayment under Section 228.054 occurred or on the date the vehicle was driven or towed through a toll collection facility that results in a notice issued under Section 228.0545; and

(3) a copy of the rental, lease, or other contract document, or the electronic data provided to the department under Section 228.055(d), covering the vehicle on the date of the underlying event of nonpayment under Section 228.054 or on the date the vehicle was driven or towed through a toll collection facility that results in a notice issued under Section 228.0545 is prima facie evidence of its contents and that the defendant was the lessee of the vehicle when the underlying event of nonpayment under Section 228.054 occurred or when the vehicle was driven or towed through a toll collection facility that results in a notice issued under Section 228.0545.

(c) It is a defense to prosecution under Section 228.055(c), (d-1), or (e) that the motor vehicle in question was stolen before the failure to pay the proper toll occurred and had not been recovered before the failure to pay occurred, but only if the theft was reported to the appropriate law enforcement authority before the earlier of:

- (1) the occurrence of the failure to pay; or
- (2) eight hours after the discovery of the theft.

Sec. 228.057. ELECTRONIC TOLL COLLECTION. (a) For purposes of this section, a "transponder" means a device, placed on or within an automobile, that is capable of transmitting information used to assess or to collect tolls. A transponder is "insufficiently funded" when there are no remaining funds in the account in connection with which the transponder was issued.

(b) Any peace officer of this state may seize a stolen or insufficiently funded transponder and return it to the department, except that an insufficiently funded transponder may not be seized sooner than the 30th day after the date the department has sent a notice of delinquency to the holder of the account.

(c) The department may enter into an agreement with one or more persons to market and sell transponders for use on department toll roads.

(d) The department may charge reasonable fees for administering electronic toll collection customer accounts.

(e) Electronic toll collection customer account information, including contact and payment information and trip data, is confidential and not subject to disclosure under Chapter 552, Government Code.

(f) A contract for the acquisition, construction, maintenance, or operation of a toll project must ensure the confidentiality of all electronic toll collection customer account information under Subsection (e).

(g) The department may, following closure of an electronic toll

collection customer account and at the request of the account holder, refund the balance of funds in the account after satisfaction of any outstanding tolls and fees.

(h) The department may enter into an agreement with a governmental or private entity regarding the use of a transponder issued by the department and the corresponding electronic toll collection customer account to pay for parking services offered by the entity.

(a) To aid in the collection of tolls and in the enforcement of toll violations, the department may use automated enforcement technology that it determines is necessary, including automatic vehicle license plate identification photography and video surveillance, by electronic imaging or photographic copying.

(b) Automated enforcement technology approved by the department under Subsection (a) may be used only for the purpose of producing, depicting, photographing, or recording an image that depicts that portion of a vehicle necessary to establish the classification of vehicle and the proper toll to be charged, the license plate number, and the state of registration, including an image:

(1) of a license plate attached to the front or rear of a vehicle; and

(2) showing the vehicle dimensions, the presence of a trailer, and the number of axles.

An entity operating a toll lane pursuant to Section 228.007(b) has, with regard to toll collection and enforcement for that toll lane, the same powers and duties as the department under this chapter. A person who fails to pay a toll or administrative fee imposed by the entity commits an offense. Each failure to pay a toll or administrative fee imposed by the entity is a separate offense. An offense under this section is a misdemeanor punishable by a fine not to exceed \$250, and the provisions of Section 228.056 apply to the prosecution of the offense under this section. (2) acquisition of real property, rights-of-way, property

rights, easements, and interests;

(3) the acquisition of machinery, equipment, software, and intellectual property;

(4) interest before, during, and for one year after construction, improvement, extension, or expansion;

(5) traffic estimates, engineering, legal and other advisory services, plans, specifications, surveys, appraisals, cost and revenue estimates, and other expenses necessary or incident to determining the feasibility of the construction, improvement, extension, or expansion;

(6) necessary or incidental administrative, legal, and other expenses;

(7) financing; and

(8) placement of the project or system in operation and expenses related to the initial operation of the project or system.

(b) Costs attributable to a toll project or system for which bonds are issued that are incurred before the issuance of the bonds may be reimbursed from the proceeds of the sale of the bonds.

Sec. 228.102. ISSUANCE OF BONDS. (a) The commission by order may authorize the issuance of toll revenue bonds to pay all or part of the cost of a toll project or system. The proceeds of a bond issue may be used solely for the payment of the project or system for which the bonds were issued and may not be divided between or among two or more projects. Each project is a separate undertaking, the cost of which shall be determined separately.

(b) As determined in the order authorizing the issuance, the bonds of each issue shall:

(1) be dated;

(2) bear interest at the rate or rates provided by the order and beginning on the dates provided by the order and as authorized by law, or bear no interest;

(3) mature at the time or times provided by the order, not

exceeding 40 years from their date or dates; and

(4) be made redeemable before maturity, at the price or prices and under the terms provided by the order.

(c) The commission may sell the bonds at public or private sale in the manner and for the price it determines to be in the best interest of the department.

(d) The proceeds of each bond issue shall be disbursed in the manner and under the restrictions, if any, the commission provides in the order authorizing the issuance of the bonds or in the trust agreement securing the bonds.

(e) If the proceeds of a bond issue are less than the toll project or system cost, additional bonds may be issued in the same manner to pay the costs of a project or system. Unless otherwise provided in the order authorizing the issuance of the bonds or in the trust agreement securing the bonds, the additional bonds are on a parity with and are payable, without preference or priority, from the same fund as the bonds first issued. In addition, the commission may issue bonds for a project or system secured by a lien on the revenue of the project or system subordinate to the lien on the revenue securing other bonds issued for the project or system.

(f) If the proceeds of a bond issue exceed the cost of the toll project or system for which the bonds were issued, the surplus shall be segregated from the other money of the commission and used only for the purposes specified in the order authorizing the issuance.

(g) In addition to other permitted uses, the proceeds of a bond issue may be used to pay costs incurred before the issuance of the bonds, including costs of environmental review, design, planning, acquisition of property, relocation assistance, construction, and operation.

(h) Bonds issued and delivered under this subchapter and interest coupons on the bonds are a security under Chapter 8, Business & Commerce Code.

(i) Bonds issued under this subchapter and income from the bonds, including any profit made on the sale or transfer of the bonds, are exempt from taxation in this state.

All laws affecting the issuance of bonds by governmental entities, including Chapters 1201, 1202, 1204, 1207, and 1371, Government Code, apply to bonds issued under this subchapter. To the extent of a conflict between those laws and this subchapter, the provisions of this subchapter prevail.

Sec. 228.104. PAYMENT OF BONDS; CREDIT OF STATE NOT PLEDGED.

(a) The principal of, interest on, and any redemption premium on bonds issued by the commission under this subchapter are payable solely from:

- (1) the revenue of the toll project or system for which the bonds are issued, including tolls pledged to pay the bonds;
- (2) the proceeds of bonds issued for the project or system;
- (3) the amounts deposited in a debt service reserve fund as required by the trust agreement securing bonds issued for the project or system;

(D) under a comprehensive development agreement entered into under Section 223.201.

(b) Bonds issued under this subchapter do not constitute a debt of the state or a pledge of the faith and credit of the state. Each bond must contain on its face a statement to the effect that:

(1) the state, the commission, and the department are not obligated to pay the bond or the interest on the bond from a source other than the amount pledged to pay the bond and the interest on the bond; and

(2) the faith and credit and the taxing power of the state are not pledged to the payment of the principal of or interest on the bond.

(c) The commission and the department may not incur financial obligations that cannot be paid from tolls or revenue derived from owning or operating toll projects or systems or from money provided by law.

(1) close, abandon, or vacate a public road; or

(2) alter a public road, except to shorten it from end to end.

(c) The commissioners court of a county may not discontinue a public road until a new road designated by the court as a replacement is ready to replace it.

(a) The residents of a precinct may apply for a new road or a change in an existing road by presenting to the commissioners court a petition signed by:

(1) eight property owners in the precinct, if the application is to request a new road or that a road be discontinued; or

(2) one property owner in the precinct, if the application is for a change in a road other than discontinuing the road.

(b) A petition presented under Subsection (a)(1) must specify the beginning and termination points of the proposed new road or road to be discontinued.

(c) The commissioners court may not grant an order on an application made under this section unless the applicants give notice of their intent to apply by posting, at the courthouse door and at two other places in the vicinity of the affected route, a written notice of their intent for at least 20 days before the date the application is made.

(b) A person who owns real property to which there is no public road or other public means of access may request that an access road be established connecting the person's real property to the county public road system by making a sworn application to the commissioners court requesting the court to establish the road. The application must:

- (1) designate the lines sought to be opened;
- (2) include the names and places of residence of the persons that would be affected by the establishment of the road; and
- (3) describe why the road is necessary.

(c) After an application is filed, the county clerk shall issue notice to the sheriff or constable commanding that officer to summon each property owner affected by the application. The sheriff or constable shall serve the summons and make a return in the manner in which process is served in a civil action in a justice court. A property owner summoned must appear at the next regular term of the commissioners court if the property owner elects to contest the application.

(d) At a regular term of court following the service of the summons under Subsection (c), the commissioners court may hear evidence as to the truth of the application. If the court determines that the applicants do not have access to their real property and premises, the court may issue an order declaring the lines designated in the application, or other lines established by the court, to be a public road. The court may direct the public road to be opened by the property owners and to remain open for a width of not less than 15 feet or more than 30 feet on each side of a designated line. The marked trees or other objects used to designate the lines or the corners of the survey may not be removed or defaced. (g) In the case of a public road established under this section that involves an enclosure of 1,280 acres or more, a person who for 12 months after the person receives notice of the court's order issued under Subsection (d) fails, neglects, or refuses to leave open the person's real property free from all obstructions for 15 feet on the person's side of the line designated by the order commits an offense. An offense under this subsection is a misdemeanor punishable by a fine not to exceed \$20 for each month that the person fails, neglects, or refuses to do so after the first 12 months after the person receives the notice.

(b) The authority in charge of real property described by Subsection (a) may close a road opened on that real property before September 1, 1925, if the authority considers it necessary to protect the interests of the state. An institution that closes a road under this subsection shall compensate the county in which the real

property is located in an amount equal to the amount paid by the county to condemn the real property, as shown by the records of the commissioners court, together with eight percent interest.

The abandoned road may be reestablished as a public road only in the manner provided for establishing a new road.

(b) This section does not apply to:

(1) a road to a cemetery, unless a property owner whose property adjoins the road enclosed with a fence under Subsection (a) files notice with the county clerk of the county in which the road is located that the owner agrees to provide reasonable access to the cemetery in accordance with Section 711.041, Health and Safety Code; or

(1) the person owns property that abuts the portion of the road being closed, abandoned, and vacated; or

(2) the portion of the road being closed, abandoned, and vacated provides the only ingress to or egress from the person's property.

(b) Title to a public road or portion of a public road that is

closed, abandoned, and vacated to the center line of the road vests on the date the order is signed by the county judge in the owner of the property that abuts the portion of the road being closed, abandoned, and vacated. A copy of the order shall be filed in the deed records of the county and serves as the official instrument of conveyance from the county to the owner of the abutting property. The order shall:

(4) if a public utility or common carrier that has the right of eminent domain is using the property being conveyed for a right-of-way or easement purpose, state that the title to the property is subject to the right-of-way or easement and the continued use by the public utility or common carrier of utility infrastructure in existence on the date the order is signed.

(b-1) Not later than the 30th day before the date an order is signed under Subsection (b), the commissioners court shall notify a public utility or common carrier described by Subsection (b)(4) of the proposal to close, abandon, and vacate the public road or portion of the public road.

(c) This section does not deprive a person whose property abuts the road at a point other than the portion of the road being closed, abandoned, and vacated of a right to seek compensation for damages caused by:

(1) any depreciation in the value of the property; or

(2) any impairment to the property owner's right of ingress to or egress from the property.

(d) If a commissioners court closes, abandons, and vacates a public road or a portion of a public road at the request of an owner of property that abuts the portion of the road being closed, abandoned, and vacated, the commissioners court may require the owner to:

(1) pay all reasonable administrative costs incurred for

processing the request and recording the order described by Subsection (b) in the county deed records; and

(2) reimburse the county for the market value of any property interest conveyed to the owner.

(e) A county by order of the commissioners court may adopt standard fees required to be paid under Subsection (d)(1) for processing a request and recording an order.

(f) For purposes of Subsection (b), "utility infrastructure" includes any facility owned by:

benefit to the counties.

Sec. 254.005. AUTHORITY TO PROVIDE DRAINAGE. (a) The commissioners court of a county may order the construction or maintenance of ditches as provided by this chapter at any regular session of the court.

(b) If a ditch is constructed under this chapter, the ditch must be placed on or within the exterior lines of a public road in the county and must have the capacity to carry off into a natural waterway all surface water reasonably adjacent that may collect in the ditch from natural causes.

(c) The commissioners court shall:

(1) make a drain on each side of a public road when necessary and use the dirt from the drain excavation to build the road; and

(2) drain a public road when necessary and have one or more ditches cut for that purpose, taking into account the natural waterflow and causing as little damage as possible to adjacent property owners.

(d) In connection with its authority to construct and maintain ditches, the commissioners court may construct any necessary side, lateral, spur, or branch ditch.

(e) The commissioners court may acquire by purchase or condemnation any new or wider right-of-way not wider than 100 feet for streambed diversion and drainage channels, but only for locating, constructing, or maintaining a county road. The cost of acquisition may be paid from the county road and bridge fund or any available county money.

(f) If damages are suffered by a property owner, the commissioners court shall determine the damages and pay the property owner out of the county general fund. If the commissioners court and the property owner disagree as to the amount of damages, the amount may be determined by civil suit.

Acts 1995, 74th Leg., ch. 165, Sec. 1, eff. Sept. 1, 1995.

Sec. 254.006. RESTRICTIONS ON DRAINAGE AUTHORITY. (a) The commissioners court of a county may not construct a ditch without an outlet to a natural waterway large enough to carry off all water that may collect in the ditch.

(b) The commissioners court may not change the natural course of any branch, creek, or stream. The public road must cross a branch, creek, or stream at the water's natural crossing.

(c) A culvert must be of sufficient size to allow water to flow, at its natural rate at its normal peak level, from the side of the road where the road intersects the natural channel to the natural channel at the other side of the road.

Acts 1995, 74th Leg., ch. 165, Sec. 1, eff. Sept. 1, 1995.

Sec. 254.007. PRIVATE DITCHES. An owner of real property abutting a road or ditch or the owner of a tract of property that is located wholly or partly within one mile of a road or ditch may construct at the owner's cost lateral drainage ditches and may connect those ditches with a main ditch constructed under this chapter.

Acts 1995, 74th Leg., ch. 165, Sec. 1, eff. Sept. 1, 1995.

Sec. 254.008. REGULATION OF PRIVATE DITCHES IN COUNTIES OF 100,000 OR LESS. (a) In a county with a population of 100,000 or less, the commissioners court by order may:

(1) remove the blockage of a ditch on real property that is not owned by the county, if the ditch connects with a drainage ditch constructed or maintained by the county; or

(2) provide for the removal or clearance of a blockage from a ditch that is in violation of an order adopted under this section.

(b) Before a commissioners court acts to remove or clear a blockage under this section, the court shall send a notice by certified mail to the record owners of the property on which the blockage is located in violation of an order adopted under this section. The notice must inform the owners of the order and of the other relevant provisions of this section. The court may not remove or clear the blockage before the 20th day after the date the notice is sent.

(c) The commissioners court shall pay the costs incurred in clearing or removing a blockage under this section.

(d) In this section:

(1) "Blockage" means an accumulation of refuse, vegetation, or other matter in a ditch that substantially decreases or stops the flow of water through the ditch.

(2) "Ditch" includes a culvert.

Acts 1995, 74th Leg., ch. 165, Sec. 1, eff. Sept. 1, 1995.

Sec. 254.009. DRAINAGE SYSTEM SURVEY. (a) After approval of a petition under Section 254.004, the commissioners court shall hire a surveyor to conduct a survey under this section for an amount determined by the court at the same meeting or at a subsequent term of court. The surveyor must be an engineer.

(b) The survey shall be applied first to the first-class roads, followed by the second-class and third-class roads.

(c) The surveyor shall make the survey and system of levels required by this section as soon as practicable after the surveyor is employed.

(d) The surveyor shall:

(1) run a line of levels along the county's public roads, measure the roads from beginning to end, and measure the distance of each waterway crossed by a public road from the location of the beginning of the waterway;

(2) place stakes or monuments along the line at intervals of 100 feet, with intermediate stakes that may be necessary, numbered progressively;

(3) establish permanent benchmarks along the line at intervals of one mile or less as necessary;

(4) establish by stakes or monuments different in character and appearance from all other stakes or monuments the highest point on the road between each of the natural waterways crossed by the road;

(5) measure and establish by suitable marks the frontage of each tract of real property abutting the road; and

(6) if there is a natural waterway adjacent to the line of the road and ditch and the waterway is necessary as an outlet for the water at any point on the ditch, measure the distance to the waterway and run the line of levels to the waterway at the nearest practicable point on the road and ditch.

(e) The surveyor shall prepare a map showing:

(1) the location of the ditch or ditches, with the position of stakes or monuments with numbers corresponding with those on the ground;

(2) the location of benchmarks with their elevations referred to an assumed or previously determined datum; and

(3) the lines and boundaries of adjacent property and the courses and distances of any adjacent watercourse, with a profile of the line of the ditch showing the assumed datum and the grade line of the bottom of the ditch, and the elevation of each stake, monument, or other important feature along the line, such as the top of the banks, the bottom of all ditches or watercourses, the surface of the water, the top of the rail, the bottom of the tie, the foot of the embankment, and the bottom of each borrow pit of each railroad.

(f) The map or an explanation accompanying the map must:

(1) give in tabular form the depth of the cut and the width at the bottom, at the top, at the source, at the outlet, and at each 100-foot stake or monument to the ditch;

(2) show the total number of cubic yards of earth to be excavated and removed from the ditch between each natural waterway

into which the water is to be conveyed;

(3) show an estimate of the cost of each portion of each ditch located between natural waterways crossed by the road; and

(4) show an estimate of total cost of the whole work.

(g) The surveyor shall also prepare detailed specifications for the execution of the project.

(h) If in the surveyor's opinion it is advantageous to run a ditch underground through drainage tiles, the surveyor shall so state in the surveyor's report, map, and specifications, with a statement of the location of the underground ditch, its length, and the dimensions or character of tiling or other material required for the underground ditch.

(i) The surveyor shall file a report and the survey, map, and explanation with the county clerk as soon as those items are completed.

Acts 1995, 74th Leg., ch. 165, Sec. 1, eff. Sept. 1, 1995.

Sec. 254.010. APPOINTMENT OF JURY OF VIEW. (a) At any regular or called session of the commissioners court after the filing of the surveyor's report, the court shall appoint five real property owners of the county as a jury of view. An appointee may not:

(1) have a direct interest in property adjacent to a proposed ditch or within one mile of a proposed ditch; or

(2) have a family relationship with a person having a direct interest in property described by Subdivision (1).

(b) The court may appoint a single jury of view for the entire proposed drainage system or a separate jury of view for each ditch.

(c) If the jurors selected fail or refuse to perform their duties or the report of the jury is rejected by the commissioners court, the court may appoint another jury of view with the same duties as the initial jury.

(d) A member of a jury of view is entitled to compensation in the amount of \$3 for each day of service.

(e) After the appointment of a jury of view, the county clerk shall provide the jurors with a certified copy of the petition, court order, and the original surveyor's report with maps, specifications, and the surveyor's estimate of costs.

Acts 1995, 74th Leg., ch. 165, Sec. 1, eff. Sept. 1, 1995.

Sec. 254.011. OATH OF JURY. Members of the jury of view must take the following oath before assuming their duties: "I do solemnly swear that I am not directly interested in the construction of the proposed ditch, either as the owner or otherwise, or in adjacent land lying within one mile of the proposed ditch, and that I am not related to any person who is so interested. I further swear that I have no bias or prejudice toward any person directly interested in the ditch, and that I will assess the amount of expense due on and by all adjacent lands lying within one mile of the ditch, according to law, without fear, favor, hatred, or hope of reward, to the best of my knowledge and ability. So help me God."

Acts 1995, 74th Leg., ch. 165, Sec. 1, eff. Sept. 1, 1995.

Sec. 254.012. NOTICE TO PROPERTY OWNERS OF JURY PROCEEDINGS.

(a) Not later than the fifth day before the date of the meeting to determine costs of ditch construction, the jury of view shall issue notice of the time and place of the meeting to each property owner or to the agent of each property owner who owns real property adjacent to or within one mile of the proposed ditch. The notice must state that:

(1) the purpose of the meeting is to determine each property owner's share of the expense of constructing the ditch; and

(2) each property owner's share of the total expense of constructing the ditch is to be a proportional share of one-half of the total expense of constructing the ditch.

(b) The notice may be served by anyone competent to testify and shall be returned and filed with the jury's final report.

(c) Notice to a property owner who is not a resident of the county and does not have an agent or representative in the county shall be published in a newspaper in the county in the manner provided for giving notice to a nonresident defendant in a district court action. The notice must be published at least four weeks before the jury's meeting date.

Acts 1995, 74th Leg., ch. 165, Sec. 1, eff. Sept. 1, 1995.

Sec. 254.013. CLAIMS BY PROPERTY OWNERS. (a) A person whose real property may be affected by the ditch may appear before the jury of view and express the person's opinion on any matter relating to the assessment of expense against the person. The owner at or before the time stated in the notice of the jury's meeting may present to the jury a written statement of an objection to or dissatisfaction with the ditch and any claim for damage sustained because of the construction of the ditch.

(b) Failure to make an objection or claim for damages under Subsection (a) is a waiver of all claim or right to make the objection or claim.

(c) The jury shall return each claim or objection to the commissioners court with the jury's report.

(d) An adjacent property owner may appear before and be heard by the commissioners court on the property owner's protest or claim against the action of the jury.

Acts 1995, 74th Leg., ch. 165, Sec. 1, eff. Sept. 1, 1995.

Sec. 254.014. DETERMINATION OF DAMAGES AND ASSESSMENTS; ACTION OF COMMISSIONERS COURT. (a) After giving the required notice and conducting a meeting at which all interested persons have been heard, the jury of view shall:

(1) consider all of the partial estimates and the surveyor's total cost estimate;

(2) draw parallel lines one mile on each side of the ditch; and

(3) apportion to each parcel of real property abutting or within the parallel lines and to the owner of each parcel a proportional share of one-half of the total expense of the ditch, considering the relative amount of benefit to the property derived from the ditch.

(b) The jury shall determine the damages due to any property owner whose property is crossed by any spur, branch, or lateral ditch constructed by order of the commissioners court. Before the ditch may be opened, the damages must be paid by an order of the court out of the money set aside for the ditch.

(c) The jury shall make a sworn report to the court, signed by at least three jurors, as soon as practicable after its meeting. The

report must include:

(1) an accurate description of each tract of property assessed, with the number of acres and the names of the owners; and

(2) the amount assessed against each tract and its owners.

(d) The jury shall return the surveyor's report and records to the county clerk. The county clerk shall file the jury's report and the surveyor's report and records. The reports and records are public information after filing.

(e) The commissioners court shall approve or reject the jury's report at its next regular or called term.

Acts 1995, 74th Leg., ch. 165, Sec. 1, eff. Sept. 1, 1995.

Sec. 254.015. APPEALS BY PROPERTY OWNERS. (a) A person aggrieved by an assessment may appeal from the final order of the commissioners court approving the report of the jury of view to the appropriate court in the county by:

(1) giving notice of the appeal in open court;

(2) having the notice entered as part of the judgment of the court; and

(3) filing a transcript of the proceeding in the commissioners court with the justice or clerk of the court to which the appeal is taken.

(b) The transcript must be filed not later than the 10th day after the date the judgment of the commissioners court is entered, and must be filed with an appeal bond that has at least two good sureties. The appeal bond must:

(1) be in an amount that is at least twice the amount of the probable costs to accrue;

(2) be conditioned that the appellant will prosecute the appeal to effect and pay all costs that may be adjudged against the appellant in the appeal; and

(3) be approved by the clerk or justice of the court.

(c) The issue in an appeal from an assessment of expense is whether the assessment made against the appellant for construction of the ditch is in proportion to the benefit to the real property derived from the ditch.

(d) The issue in an appeal from an assessment of compensation is whether the assessment of compensation made by the jury of view is

adequate to the damage suffered and to the value of the property.

Acts 1995, 74th Leg., ch. 165, Sec. 1, eff. Sept. 1, 1995.

Sec. 254.016. PROCEDURES GOVERNING PROPERTY OWNER APPEAL. (a) In an appeal of an assessment under Section 254.015, the appellant has the burden of proof.

(b) The court that tries the appeal shall determine the amount of expense chargeable to the appellant, or the amount of compensation due the appellant, as appropriate, and shall enter that amount as the court's judgment.

(c) Except as provided by Subsection (d), the costs of the appeal shall be adjudged against the appellant.

(d) The costs of the appeal shall be adjudged against the county if the court finds that:

(1) the amount chargeable to the appellant is less than the amount of expense charged by the jury of view; or

(2) the appellant is entitled to a greater amount of compensation as damages than determined by the jury of view.

(e) Not later than the fifth day after the date of the judgment, the clerk of the court or the justice, as appropriate, shall issue a certified copy of the judgment and return it to the commissioners court. The commissioners court shall:

(1) file the judgment with the records relating to the ditch; and

(2) enter the judgment as the judgment of the commissioners court.

(f) After the commissioners court enters the judgment on appeal:

(1) there is no further appeal from the judgment of the court for either party to the appeal; and

(2) the appellant is liable for the amount of expense or entitled to the amount of compensation, as applicable, as determined by the judgment.

its order for the construction of the ditches and adjoining roadway or at any subsequent term, the court shall enter on its minutes a list of each tract of real property for which an assessment of expense was made and reported by the jury of view and approved by the court. The list must include:

- (1) the names of the owners and original grantees of each tract;
- (2) the number of acres covered by the assessment; and
- (3) the amount of the assessment.

(b) The county clerk shall issue a certificate against each person on the list showing the amount of each assessment, the ditch or road for which the assessment was issued, and the tract of property on which the assessment was issued. The certificate must be signed by the county judge in open court and attested under the hand and seal of the county clerk, and that fact shall be noted in the minutes of the court.

(c) All amounts assessed against any property and its owner by the jury of view or the order of the court are a lien on the property unless prohibited by the Texas Constitution.

(d) The county judge shall deliver the certificates to the county treasurer, and shall take a receipt for delivery from the treasurer and file it with the county records relating to the ditch. The treasurer shall collect each amount due on the certificates and deposit the money collected to the credit of the county road and bridge fund.

(e) If a person against whom a certificate is issued does not pay the amount due to the treasurer on demand, the treasurer shall report that fact to the county attorney. The county attorney shall immediately file suit for foreclosure of the lien or for a personal judgment, as permitted by law.

Acts 1995, 74th Leg., ch. 165, Sec. 1, eff. Sept. 1, 1995.

Sec. 254.018. APPROPRIATION FOR DITCH CONSTRUCTION. In the alternative, the court may hire a suitable and competent person other than the person normally in charge of the road adjacent to the proposed ditch to oversee the construction of the ditch for compensation in an amount ordered by the court.

(b) The court by order shall assign to the person in charge of constructing the ditch all county employees assigned to the road adjacent to the ditch and all county equipment and materials. The order shall provide that the person may employ additional labor or purchase additional equipment or material to construct the ditch. The order must show the amount to be paid to the director of construction for the person's services. The court shall order the money required for additional labor, equipment, or material to be paid from the money set aside from the road and bridge fund.

(c) The drainage system shall be applied first to the county's first-class roads, followed by the second-class and third-class roads.

(b) Interest accrues at an annual rate of 10 percent on any unpaid part of the costs.

(b) On a petition signed by a majority of the registered voters of a political subdivision or other specified portion of a county, the commissioners court of the county by order shall declare the political subdivision or specified portion of the county to be a defined district and shall record the order in the court's minutes. The petition must define by metes and bounds the territory requested to be included in the proposed defined district.

(c) The commissioners court shall order an election to adopt the tax if it receives a petition requesting the election that is signed by:

(1) at least 200 registered voters of the county, if the petition requests an election to approve a tax for the county; or

(2) at least 50 registered voters of the political subdivision or defined district, if the petition requests an election

to approve a tax for a political subdivision or defined district.

(d) The commissioners court shall set the rate of the tax in the election order. The court shall order the election to be held on the first authorized uniform election date prescribed by Subchapter A, Chapter 41, Election Code, that occurs after the 20th day after the date the election is ordered.

If the election is held in time, in the year of the election the court shall impose the tax at the same time as other county taxes. Otherwise, the court may impose the tax at any time before the tax roll is made out. If a greater rate is not imposed for a year, the court may lower the rate for the next year without a petition for that action.

(h) A petition calling for an election to adopt a tax under this section may not be granted on or before the first anniversary of the date of an election held under this section at which the voters do not approve the adoption of the tax.

(b) A petition requesting an election to repeal the tax may not be granted on or before the second anniversary of the date of the election at which the tax is adopted.

(c) The commissioners court may grant a petition calling for an election to repeal the tax only if satisfactory proof is presented to the court that:

(2) it is probable that a majority of the residents of the county, political subdivision, or defined district who are qualified

to vote for the tax would vote for repeal of the tax.

Sec. 256.054. ADDITIONAL COUNTY TAXES FOR COUNTY ROADS AND FLOOD CONTROL; BONDS. (b) The commissioners court of the county may order an election under this section on its own motion. The court shall order an election under this section if it receives a petition requesting the election signed by a number of registered voters of the county equal to at least 10 percent of the number of voters who voted in the most recent general election in the county. The court may adopt the order only at a regular session of the court. The order must specify the maximum rate of the tax to be voted on.

(c) The proposition submitted to the voters at the election may provide that the tax may be used for the construction and maintenance of farm-to-market and lateral roads, for flood control purposes, or for both, as determined by the commissioners court. At an election to adopt a tax for only one of those purposes, the ballot shall be printed to permit voting for or against the proposition: "Adopting a tax not exceeding ___ cents on each \$100 valuation," specifying the purpose of the tax to be voted on. At an election to adopt a tax for each of those purposes, the ballot shall be printed to permit voting for or against the proposition: "Adopting a farm-to-market and lateral roads tax not exceeding ___ cents and a flood control tax not exceeding ___ cents on each \$100 valuation."

(d) In addition to the notice of the election required by Section 4.003, Election Code, the county judge shall post a copy of the election order at a public place in each county election precinct not later than the 14th day before the date of the election.

(e) If a majority of the votes received in the election favor adoption of the tax, the commissioners court shall impose the tax each year in the same manner as other county ad valorem taxes.

(f) The commissioners court may call a subsequent election to

change the maximum rate of a farm-to-market and lateral road tax or flood control tax previously adopted by the county in the manner provided by this section for an election to adopt a tax.

(g) The commissioners court of a county that adopts a tax as provided by this section may issue negotiable county bonds or county time warrants for the construction or improvement of farm-to-market and lateral roads or the construction of permanent improvements for flood control purposes if the bonds or warrants are authorized by a majority of the votes received in an election ordered by the commissioners court. The commissioners court shall submit each proposition separately at the election. The commissioners court shall issue the bonds or warrants and impose the taxes for those bonds or warrants as provided by Subtitles A and C, Title 9, Government Code.

(a) A county commissioners court may exclude from a proposed road district any territory that is part of or adjacent to an existing road district that includes all or part of a levee improvement district, drainage district, or other improvement district created under a law authorized by Section 52, Article III, Texas Constitution. The excluded territory shall continue to bear and pay its proportion of existing debt created for the construction of macadamized, graveled, or paved roads or turnpikes or in aid of these purposes, but may not be used to pay debt created for those purposes after the territory is excluded from the new road district.

(b) Except as specifically permitted by Sections 1471.086 and 1471.087, Government Code, a road district may not contain a fractional part of a preexisting road district.

(b) If the commissioners court determines that a hearing should be held, the court shall give notice of the time and place of the hearing in the manner provided for notice of a hearing for the creation of a road district.

(c) The court shall exclude real property from the district if:

(1) the retention of the real property in the district's taxing jurisdiction would:

(A) be arbitrary and unnecessary to protect the public welfare;

(B) impair the value of the real property; and

(C) arbitrarily impose a confiscatory burden on the real property;

(2) the retention of the real property in the district and the extension to it of the benefits, service, or protection of the district's roads would create an undue and uneconomical burden on the remainder of the district; or

(3) the real property cannot be benefited by the district's proposed improvements.

(d) If, after considering the engineering information and other evidence presented at the hearing, the commissioners court determines that a ground for exclusion of the real property exists, the court shall enter an order:

(1) excluding the real property from the road district;

and

(2) redefining the boundaries of the district.

The petition must describe the real property by:

(1) metes and bounds; or

(2) lot and block number if there is a recorded plat of the real property.

(b) Before the real property may be annexed to the road district, each petitioner must agree to:

(1) assume the petitioner's share of:

(A) any outstanding bonds, notes, or other obligations of the district; and

(B) any bonds of the district payable in whole or part from taxes that have been approved by the voters but have not been issued; and

(2) authorize the commissioners court to impose a tax on the petitioner's property in each year in which the bonds, notes, or other obligations payable in whole or part from taxes are outstanding to pay the petitioner's share of the indebtedness.

(c) The commissioners court shall hold a hearing to consider the petition and shall give notice of the hearing in the manner required for a hearing for creation of a road district.

(d) The commissioners court may annex the real property described by the petition to the district if the court determines that:

(1) it is to the advantage of the real property to be annexed to the district; and

(2) the real property already in the district will not be injured by the annexation.

(e) If each petitioner agrees to the items specified by Subsection (b), the commissioners court may issue any unissued bonds that have been approved by the voters of the district even though the boundary of the district has been altered by the annexation since the bonds were approved.

(f) If no qualified voter resides on the real property proposed to be annexed to the district, the commissioners court may order the annexation of the real property without further proceedings.

(g) If a qualified voter resides on the real property to be added and there are any outstanding bonds, notes, or other

obligations of the district that are payable from taxes, the commissioners court shall order an election to be held in the district, including the real property to be annexed to the district, on the question of the assumption by the real property to be annexed of the district's outstanding and approved but unissued bonds, notes, or other obligations and of the taxes imposed to pay those obligations. Notice of the election shall be given and the election shall be held as provided by law for a bond election in the district.

(h) The order annexing the real property to the district shall provide that the annexation does not take effect unless a majority of the votes cast at the election held under Subsection (g) favor the assumption of the district's outstanding bonds, notes, and other obligations and the imposition of a tax to pay those obligations.

Acts 1995, 74th Leg., ch. 165, Sec. 1, eff. Sept. 1, 1995.

Sec. 257.026. ADDING TERRITORY TO ROAD DISTRICT BY PETITION OR ON COMMISSIONERS COURT MOTION. (a) The commissioners court of a county on its own motion may hold a hearing on the question of annexing a defined area to a road district and shall hold a hearing on the question on receipt of a petition requesting the annexation signed by:

(1) owners of real property the taxable value of which is a majority of the taxable value of real property in the defined area according to the county tax roll; or

(2) at least 50 property owners in the defined area if there are more than 50 property owners in the defined area.

(b) The commissioners court shall give notice of the hearing in the manner required for notice of a hearing on creation of a road district.

(c) If after the hearing the commissioners court finds that annexation of the defined area to the district is feasible and practical and would benefit the area and the district, the court may annex the area to the district. The order annexing the area to the district is not required to include all of the real property described by a petition requesting the annexation if the court finds that a modification is necessary or desirable.

(d) The annexed area is subject to any bonds, notes, or other obligations issued or taxes imposed before the area was annexed to

the district.

(e) The commissioners court shall, in the order annexing the area to the district, order an election to be held in the district, including the area to be annexed, on the questions whether the annexed area should assume:

(1) the bonds, notes, or other obligations issued or taxes imposed by the district before the area was annexed to the district; and

(2) its part of the bonds of the district payable in whole or part from taxes that have been approved by the voters but have not been issued, and the imposition of the district's ad valorem tax on the taxable property in the annexed area for the payment of the bonds.

(f) At the election held under Subsection (e) the commissioners court, in a separate proposal, may submit the question whether the court should be authorized to issue bonds for the construction, purchase, maintenance, and operation of macadamized, graveled, or paved roads and turnpikes, or in aid of those purposes, in the annexed area.

(g) Notice of an election held under this section shall be given and the election shall be held in the manner provided by law for a bond election in the district.

(h) If the majority of the votes received in the election favor the assumptions proposed under Subsection (e), the district may issue its approved but unissued bonds even though the boundaries of the district have been changed by the annexation since the original election approving the bonds.

(i) The commissioners court shall provide in its order annexing an area to the district that the annexation does not take effect unless the voters approve the assumptions proposed under Subsection (e).

(j) The commissioners court may provide in its order annexing an area to the district that the annexation does not take effect unless the voters approve an issuance of bonds proposed under Subsection (f).

**CHAPTER 258. CLARIFICATION OF EXISTENCE OF PUBLIC INTEREST IN ROAD BY
ADOPTION OF COUNTY ROAD MAP**

Sec. 258.001. CLARIFICATION OF PUBLIC INTEREST IN ROAD.

Notwithstanding Chapter 281, a county may clarify the existence of a public interest in a road as provided by this chapter.

Added by Acts 2003, 78th Leg., ch. 236, Sec. 1, eff. Sept. 1, 2003.

Sec. 258.002. ADOPTION OF COUNTY ROAD MAP. (a) The commissioners court of a county may propose a county road map that includes each road in which the county claims the existence of a public interest:

(1) under Chapter 281 or other law; or

(2) as a result of having continuously maintained the road with public funds beginning before September 1, 1981.

(b) A commissioners court that proposes a county road map under this section shall hold a public meeting at which a person asserting a private right, title, or interest in a road in which the county has claimed the existence of a public interest may appear before the commissioners court to protest the county's claim. A person asserting a private right, title, or interest in a road may also file a written protest with the county judge at any time before the public meeting. The commissioners court shall appoint a jury of view consisting of five property owners who have no interest in the outcome of the protest to determine, by a majority vote after a public hearing and an examination of the county's road maintenance records and other information, the validity of the county's claim of the existence of a public interest in the road. A county has a valid claim of the existence of a public interest in a road if it provides written records or other information documenting the county's continuous maintenance of the road beginning before September 1, 1981. The determination of the jury of view is binding on the commissioners court, and the commissioners court shall revise the proposed county road map accordingly.

(c) The commissioners court shall publish at least once a week in a newspaper of general circulation in the county for at least four consecutive weeks preceding the date of the public meeting a notice:

(1) advising the public that the commissioners court has proposed a county road map including each road in which the county claims the existence of a public interest;

(2) identifying a location at the courthouse at which the proposed map will be available to the public during regular business hours; and

(3) stating the date and location of the public meeting.

(d) The commissioners court shall display the proposed map at the location and during the time described in the notice from the date on which notice is first published through the date on which the commissioners court formally adopts the proposed map. The map must be legible, and the map scale must be that not less than one inch equals 2,000 feet.

(e) The commissioners court may formally adopt the proposed map, as revised after public comment and a determination by the jury of view, only at a public meeting held before the 90th day following the date of the initial public meeting required by Subsection (b).

(f) The county clerk shall keep a county road map adopted under this section in a place accessible to the public.

(g) The failure to include on a county road map adopted under this section a road in which the county has previously acquired a public interest by purchase, condemnation, dedication, or a court's final judgment of adverse possession does not affect the status of the omitted road.

(h) In this section, "continuous maintenance" means grading or other routine road maintenance beginning before September 1, 1981, and continuing until the date of protest.

Added by Acts 2003, 78th Leg., ch. 236, Sec. 1, eff. Sept. 1, 2003.

Sec. 258.003. CONCLUSIVE EVIDENCE. Except as provided by Section 258.004, a county road map adopted under Section 258.002 is conclusive evidence of:

(1) the public's right of access over a road included on the map; and

(2) the county's authority to spend public money to maintain a road included on the map.

Added by Acts 2003, 78th Leg., ch. 236, Sec. 1, eff. Sept. 1, 2003.

Sec. 258.004. CONTEST. (a) A person asserting a private right, title, or interest in a road in which the existence of a public interest is asserted under this chapter may contest the inclusion of the road in the county road map by filing a suit in a district court in the county in which the road is located not later than the second anniversary of the date on which the county road map including the road was adopted.

(b) The county has the burden of proving that the county has continuously maintained, as that term is defined by Section 258.002, the road in question.

Added by Acts 2003, 78th Leg., ch. 236, Sec. 1, eff. Sept. 1, 2003.

Sec. 258.005. TRANSFER OF INTEREST. (A) exclusively in the county;

(B) in the county and outside the county; or

(C) in one or more counties adjacent to the county;

(2) issue tax bonds, revenue bonds, or combination tax and revenue bonds to pay the cost of the construction, acquisition, or improvement of a project;

(3) impose tolls or charges as otherwise authorized by this chapter;

(4) construct a bridge over a deepwater navigation channel, if the bridge does not hinder maritime transportation;

(b) The county or a local government corporation may exercise a power provided by Subsection (a)(6) only in a manner consistent with the other powers provided by this chapter. To the extent of a conflict between this chapter and Chapter 370, this chapter prevails.

(c) A project or any portion of a project that is owned by the county and licensed or leased to a private entity or operated by a private entity under this chapter to provide transportation services to the general public is public property used for a public purpose and exempt from taxation by this state or a political subdivision of this state.

(d) If the county constructs, acquires, improves, operates, maintains, or pools a project under this chapter, before December 31 of each even-numbered year the county shall submit to the department a plan for the project that includes the time schedule for the project and describes the use of project funds. The plan may provide for and permit the use of project funds and other money, including state or federal funds, available to the county for roads, streets, highways, and other related facilities in the county that are not part of a project under this chapter. A plan is not subject to approval, supervision, or regulation by the commission or the department, except that:

(1) any use of state or federal highway funds must be approved by the commission;

(2) any work on a highway in the state highway system must be approved by the department; and

(3) the department shall supervise and regulate work on a highway in the state highway system.

(e) Except as provided by federal law, an action of a county taken under this chapter is not subject to approval, supervision, or regulation by a metropolitan planning organization.

(f) The county may enter into a protocol or other agreement with the commission or the department to implement this section through the cooperation of the parties to the agreement.

(g) An action of a county taken under this chapter must comply with the requirements of applicable federal law. The foregoing compliance requirement shall apply to the role of metropolitan planning organizations under federal law, including the approval of projects for conformity to the state implementation plan relating to air quality, the use of toll revenue, and the use of the right-of-way of and access to federal-aid highways. Notwithstanding an action of a county taken under this chapter, the commission or department may take any action that is necessary in its reasonable judgment to comply with any federal requirement to enable the state to receive federal-aid highway funds.

Subsequent appointments to the board of directors are subject to the requirements of Subchapter F, Chapter 370.

(c) In computing the cost of the ferry, the commission shall:

(1) include the total amount spent by the department for the original construction of the ferry, including the costs associated with the preliminary engineering and design engineering for plans, specifications, and estimates, the acquisition of necessary rights-of-way, and actual construction of the ferry and all necessary appurtenant facilities; and

(2) consider the anticipated future costs of expanding, improving, maintaining, or operating the ferry to be incurred by the county or local government corporation and not by the department if the ferry is conveyed.

(d) The commission shall, at the time the ferry is conveyed, remove the ferry from the state highway system. After a conveyance, the commission has no liability or responsibility for the maintenance or operation of the ferry.

(e) Before conveying a ferry that is a part of the state highway system under this section, the commission shall conduct a public hearing at which interested persons shall be allowed to speak on the proposed conveyance. Notice of the hearing must be published in the Texas Register and in one or more newspapers of general circulation in the county in which the ferry is located.

(f) The commission shall adopt rules to implement this section. The rules must include criteria and guidelines for the approval of a conveyance of a ferry.

(b) The commissioners court may secure bonds issued under this chapter through a trust indenture between the county and a corporate trustee. The corporate trustee may be any trust company or bank that has the powers of a trust company. (b) A part of a project that has not been designated as part of the state highway system and that is not a turnpike project as defined in Chapter 361 is a part of the county road system of the county in which the part is located. A law relating to the maintenance and operation of a county road applies to a project constructed or acquired under this chapter to the extent the law does not conflict with this chapter.

(c) Any county into which the project extends, by condemnation or another method under general law, may acquire the property necessary for the project, except that a county may not condemn property in another county until after the resolution required by Subsection (a) is adopted. The county issuing the bonds may use the bond proceeds to acquire property necessary for the project in any county into which the project extends.

(d) Payment of the purchase price, award, or other cost of the project may be on the terms to which the commissioners courts of the county issuing the bonds and the other county or counties agree. Proceeds from bonds issued under this chapter may be used to pay a cost incurred under this section.

(e) Two-tenths of one percent of the toll revenue shall be shared equally between the permanent school fund and the General Land Office. The General Land Office shall use its share for the acquisition of real property in a natural state in the county of the project. The acquired land shall be maintained in a natural state.

Sec. 284.069. TOLLS AND CHARGES. If bonds under this chapter are payable in whole or in part from project revenue, the county shall impose tolls and charges that are, together with other money or revenues available for the project, including ad valorem tax, sufficient to:

- (2) pay the principal of, premium of, if any, and interest on the bonds when due;
- (3) establish a reserve for payment of bond principal, premium, and interest; and

(d) In a county with a population over 2.8 million, an offense under this section may be prosecuted in any precinct in the county in which the offense was committed.

(e) An authorized emergency vehicle, as defined by Section 541.201, is exempt from payment of a toll imposed under this chapter regardless of whether the vehicle is:

- (1) responding to an emergency;
- (2) displaying a flashing light; or
- (3) marked as an emergency vehicle.

Sec. 284.0701. ADMINISTRATIVE COSTS; NOTICE; OFFENSE. (a) In the event of an offense committed under Section 284.070, on issuance of a written notice of nonpayment, the registered owner of the nonpaying vehicle is liable for the payment of both the proper toll and an administrative cost.

(b) The county may impose and collect the administrative cost so as to recover the expense of collecting the unpaid toll, not to exceed \$100. The county shall send a written notice of nonpayment to the registered owner of the vehicle at that owner's address as shown in the vehicle registration records of the Texas Department of Motor Vehicles by first-class mail not later than the 30th day after the date of the alleged failure to pay and may require payment not sooner than the 30th day after the date the notice was mailed. The registered owner shall pay a separate toll and administrative cost for each event of nonpayment under Section 284.070.

(c) The registered owner of a vehicle for which the proper toll was not paid who is mailed a written notice of nonpayment under Subsection (b) and fails to pay the proper toll and administrative cost within the time specified by the notice of nonpayment commits an offense. Each failure to pay a toll or administrative cost under this subsection is a separate offense.

(d) It is an exception to the application of Subsection (a) or (c) if the registered owner of the vehicle is a lessor of the vehicle and not later than the 30th day after the date the notice of nonpayment is mailed provides to the authority:

- (1) a copy of the rental, lease, or other contract document

covering the vehicle on the date of the nonpayment under Section 284.070, with the name and address of the lessee clearly legible; or

(2) electronic data, other than a photocopy or scan of a rental or lease contract, that contains the information required under Sections 521.460(c)(1), (2), and (3) covering the vehicle on the date of the nonpayment under Section 284.070.

(d-1) If the lessor provides the required information within the period prescribed under Subsection (d), the authority may send a notice of nonpayment to the lessee at the address provided under Subsection (d) by first class mail before the 30th day after the date of receipt of the required information from the lessor. The lessee of the vehicle for which the proper toll was not paid who is mailed a written notice of nonpayment under this subsection and fails to pay the proper toll and administrative cost within the time specified by the notice of nonpayment commits an offense. The lessee shall pay a separate toll and administrative cost for each event of nonpayment. Each failure to pay a toll or administrative cost under this subsection is a separate offense.

(e) It is an exception to the application of Subsection (a) or (c) if the registered owner of the vehicle transferred ownership of the vehicle to another person before the event of nonpayment under Section 284.070 occurred, submitted written notice of the transfer to the Texas Department of Motor Vehicles in accordance with Section 501.147, and before the 30th day after the date the notice of nonpayment is mailed, provides to the county the name and address of the person to whom the vehicle was transferred. If the former owner of the vehicle provides the required information within the period prescribed, the county may send a notice of nonpayment to the person to whom ownership of the vehicle was transferred at the address provided by the former owner by first-class mail before the 30th day after the date of receipt of the required information from the former owner. The subsequent owner of the vehicle for which the proper toll was not paid who is mailed a written notice of nonpayment under this subsection and fails to pay the proper toll and administrative cost within the time specified by the notice of nonpayment commits an offense. The subsequent owner shall pay a separate toll and administrative cost for each event of nonpayment under Section 284.070. Each failure to pay a toll or administrative cost under this subsection is a separate offense.

(f) An offense under this section is a misdemeanor punishable

by a fine not to exceed \$250.

(g) The court in which a person is convicted of an offense under this section shall also collect the proper toll and administrative cost and forward the toll and cost to the county.

(h) In this section, "registered owner" means the owner of a vehicle as shown on the vehicle registration records of the Texas Department of Motor Vehicles or the analogous department or agency of another state or country.

(b) In the prosecution of an offense under Section 284.0701(c), (d-1), or (e):

(2) a copy of the rental, lease, or other contract document, or the electronic data provided to the authority under Section 284.0701(d), covering the vehicle on the date of the underlying event of nonpayment under Section 284.070 is prima facie evidence of its contents and that the defendant was the lessee of the vehicle when the underlying event of nonpayment under Section 284.070 occurred.

(c) It is a defense to prosecution under Section 284.0701(c),

(d-1), or (e) that the vehicle in question was stolen before the failure to pay the proper toll occurred and had not been recovered before the failure to pay occurred, but only if the theft was reported to the appropriate law enforcement authority before the earlier of:

(2) the prerequisites to imposing the assessment lien against the property described in the certificate and the personal liability of the property owner have been performed.

(d) In a suit on an assessment or reassessment in evidence of which a certificate is issued under this subchapter, it is sufficient to allege the substance of the recitals in the certificate and that the recitals are true. (b) The special commissioners appointed under Chapter 21, Property Code, as part of the eminent domain proceeding shall apportion the cost of the improvement between the municipality and

the landowners. The municipality's share of the cost may not exceed one-third of the cost. The municipality shall pay its share of the cost, and the landowners shall pay the balance.

(c) The special commissioners shall determine the land that is located in the territory of the improvement and is specially benefitted in enhanced value.

(d) The assessment creates a lien on the owner's land for the assessed cost.

(e) The municipality may issue assignable certificates for the payment of the assessed cost and may provide for the payment of the cost in deferred payments, which bear interest at a rate determined by the municipal charter but not to exceed eight percent.

Acts 1995, 74th Leg., ch. 165, Sec. 1, eff. Sept. 1, 1995.

Sec. 311.093. ASSESSMENT FOR SIDEWALK IN HOME-RULE MUNICIPALITY. (a) A home-rule municipality may assess a landowner for the entire cost of constructing a sidewalk, including a curb, abutting the owner's land.

The municipality shall pay the other one-third of the cost. The municipality shall pay the entire cost of an improvement at the intersection of streets.

(c) The landowner shall pay the assessment in not fewer than five equal annual payments. A collected assessment shall be appropriated for the payment of the bonds issued to finance the cost of the improvement.

(d) After the governing body determines to make an improvement, the governing body shall require the municipal engineer, another municipal officer, or a committee of three aldermen to prepare a report. The report must:

(1) contain an estimate of the cost of the improvement;

(2) list each lot or part of a lot abutting the street or alley to be improved and list the number and size of the lot, the number of the block in which the lot is located, the owner of the lot or a statement that the owner is unknown, and other information required by the governing body; and

(3) state, opposite a lot's listing, one-third the estimated cost of the improvement of the street or alley abutting the lot.

(e) On the acceptance and approval of the report, the governing body shall impose the assessment as taxes. After the assessment is imposed, the individual or committee that prepared the report shall give, as may be required by ordinance, notice of the time in which the payment of the assessment is due and shall begin to collect the payment.

(f) The assessment is a lien on the land until it is paid. After an assessment on the land becomes delinquent, the individual or committee that prepared the report on the assessments may seize any part of the land that is sufficient to pay the assessment. The individual or committee shall sell the seized land if the assessment

is not paid before the day of the sale. The municipality shall give the same notice of the sale that is required to be given in other sales to collect delinquent taxes. The sale is subject to the same ordinance provisions that govern the name, circumstances, and conditions under which a sale of land may be made and the extent to which a sale may be made to collect delinquent taxes owed the municipality. The individual or committee shall execute a deed to the purchaser at the sale. The deed used in the sale is subject to another statute that governs a deed prepared by an assessor or collector of taxes for a general-law municipality.

(g) The governing body may initiate a suit in the municipality's corporate name to recover from a landowner an assessment.

(h) The governing body may adopt resolutions, ordinances, or regulations necessary to carry out the authority granted by this section.

The municipality may keep an amount of the sale proceeds that covers the cost of the construction and the cost of collection. The municipality shall pay to the owner the balance of the sale proceeds.

(c) The sale of the lot, or the part of the lot or block, under this section conveys a good title to the purchaser.

(2) the equities of the owners; and

(3) the adjustment of the apportionment so as to produce a substantial equality of benefits received and burdens imposed.

(e) If the governing body of the other municipality does not ratify the assessment within 30 days after the date of the ordinance or resolution imposing the assessment, the municipality that initiated the improvement may repeal and annul all of the assessment proceedings, including a contract for the improvement.

(f) The failure of the governing body of the other municipality to ratify an assessment does not affect the validity of an assessment imposed against property that is in the municipality that initiated the improvement.

If the name of the railway does not appear on the rendered tax roll of the municipality, the notice shall be addressed to the railway as its name and address are shown on the unrendered tax roll of the municipality.

(f) The notice is sufficient, valid, and binding on each person who owns or claims an interest in the property or the railway if the notice:

Sec. 313.048. HEARING. (a) A hearing under this subchapter shall be before the governing body of the municipality.

(b) The owner of property abutting a proposed improvement or the owner of an affected railway is entitled to:

- (1) be heard on any matter for which a hearing is a constitutional prerequisite to the validity of an assessment under this chapter; and
- (2) contest:
 - (A) the amount of the proposed assessment;
 - (B) the lien and liability for the assessment;
 - (C) the special benefit of the proposed improvement to the abutting property and the owner of the abutting property; and
 - (D) the accuracy, sufficiency, regularity, or validity of the proceedings or contract for the improvement and proposed assessment.

(c) The governing body may:

- (1) correct an error, inaccuracy, irregularity, or invalidity;
- (2) supply a deficiency;
- (3) determine the amount of an assessment;
- (4) determine any other necessary matter; and
- (5) by ordinance, end the hearing and impose the assessment before, during, or after the construction of the improvement.

(d) An assessment may not:

- (1) exceed the enhanced value to the property as determined at the hearing; or
- (2) be made to mature before the municipality accepts the improvement for which the assessment is imposed.

Acts 1995, 74th Leg., ch. 165, Sec. 1, eff. Sept. 1, 1995.

Sec. 313.049. APPEAL OF ASSESSMENT. (a) A person who owns or claims an interest in assessed property or in an assessed railway may bring suit to contest:

- (1) the amount of the assessment;
- (2) an inaccuracy, irregularity, invalidity, or insufficiency of the proceedings or contract relating to the assessment or the improvements; or
- (3) any matter or thing not in the discretion of the governing body.

(b) The suit must be brought not later than the 15th day after the date the assessment is imposed.

(c) After the period provided by Subsection (b), a person who fails to bring suit:

- (1) waives every matter the hearing might have addressed; and
- (2) is barred from contesting or questioning in any manner or for any reason:
 - (A) the assessment;
 - (B) the amount, accuracy, validity, regularity, or sufficiency of the assessment;
 - (C) the assessment proceedings; or
 - (D) a contract relating to the assessment or the improvement.

(d) This section applies to an assessment made under Section 313.048 or 313.050.

Acts 1995, 74th Leg., ch. 165, Sec. 1, eff. Sept. 1, 1995.

Sec. 313.050. CORRECTION OF ASSESSMENTS. If an assessment is determined to be invalid or unenforceable, the governing body of the municipality may:

- (1) supply any deficiency in the assessment proceedings;
- (2) correct any mistake or irregularity in connection with the assessment; and
- (3) at any time, make and impose a subsequent assessment after notice and hearing as nearly as possible in the manner this chapter provides for an original assessment and subject to the provisions of this chapter regarding special benefits.

Acts 1995, 74th Leg., ch. 165, Sec. 1, eff. Sept. 1, 1995.

Sec. 313.051. NO LIEN ON EXEMPT PROPERTY; LIABILITY OF OWNER.

(a) This chapter does not authorize a lien against an interest in property that, at the time an improvement is ordered, is exempt from any lien created by an assessment for a street improvement.

(b) Notwithstanding Subsection (a), the owner of exempt property is personally liable for an assessment in connection with the property.

(c) The omission of an improvement fronting exempt property does not invalidate the lien or liability for an assessment made against nonexempt property.

Acts 1995, 74th Leg., ch. 165, Sec. 1, eff. Sept. 1, 1995.

Sec. 313.052. ASSESSMENT CERTIFICATES. (a) The governing body may issue in the name of the municipality an assignable certificate to evidence an assessment imposed. The certificate may declare the lien on the property and the liability of the owner of the property regardless of whether the owner is correctly named. The governing body may determine the terms of the certificate.

(b) A recital in a certificate that states substantially that the procedure for making the improvement was in compliance with law and that all prerequisites to creating the assessment lien on the property the certificate describes and to creating the personal liability of the property owner were performed is prima facie evidence of those matters.

(c) Subsection (b) applies to a recital in a certificate that evidences an assessment under Section 313.048 or 313.050.

Acts 1995, 74th Leg., ch. 165, Sec. 1, eff. Sept. 1, 1995.

Sec. 313.053. CHANGES IN PROCEEDINGS; PROCEDURE. (a) The governing body of a municipality may change a plan, method, or contract for an improvement or other proceeding related to a plan, method, or contract for an improvement.

(b) A change that substantially affects the nature or quality of an improvement may not be made unless the governing body determines, by a two-thirds vote, that it is impractical to proceed

with the improvement.

(c) If a substantial change is made after a hearing has been ordered or held, the governing body, in the same manner and with the same effect as provided for an original notice and hearing, shall:

- (1) make a new estimate of cost;
- (2) order and hold a new hearing; and
- (3) give new notices.

(d) If an improvement is abandoned, the new estimate, hearing, and notices are not required.

(e) A change in or abandonment of an improvement must be with the consent of the person who contracted with the municipality for the construction of the improvement.

(f) If an improvement is abandoned, a municipality shall adopt an ordinance that has the effect of canceling:

- (1) any assessment imposed for the abandoned improvement; and
- (2) all other proceedings relating to the abandoned improvement.

Acts 1995, 74th Leg., ch. 165, Sec. 1, eff. Sept. 1, 1995.

Sec. 313.054. ENFORCEMENT OF ASSESSMENT; PRIORITY OF LIEN; DEFENSES. (a) An assessment under this subchapter:

- (1) is collectible with interest, expense of collection, and reasonable attorney's fees, if incurred;
- (2) is a first and prior lien on the property on which the lien is created from the date the municipality orders the improvement; and
- (3) is superior to any other lien or claim other than a lien or claim for county, school district, or municipal ad valorem taxes.

(b) A lien against property or the personal liability of a property owner that arises from an assessment made under this subchapter may be enforced by:

- (1) suit; or
- (2) sale of the property assessed in the manner provided by law for sale of property for municipal ad valorem taxes.

(c) In a suit on an assessment for which a certificate has been issued, it is sufficient to allege the substance of the recitals in

the certificate and that the recitals are true. Additional allegations about the assessment proceedings are not necessary in the suit.

(d) In a suit to enforce an assessment, the only defenses are that:

- (1) the notice of the hearing:
 - (A) was not mailed as required;
 - (B) was not published; or
 - (C) did not contain the substance of a requirement prescribed for the notice; or
- (2) the assessment exceeded the amount of the estimate.

Acts 1995, 74th Leg., ch. 165, Sec. 1, eff. Sept. 1, 1995.

Sec. 313.055. CHAPTER NOT AFFECTED BY STATEMENTS OR ACTIONS OF MUNICIPAL OFFICERS OR EMPLOYEES. Nothing said or done by an employee or officer of a municipality, including a member of the governing body of the municipality, as shown in the municipality's written proceedings and other records, affects this chapter.

Acts 1995, 74th Leg., ch. 165, Sec. 1, eff. Sept. 1, 1995.

paid from any municipal fund available for that purpose.

(c) A municipality may sell property originally purchased for improvements but not used for the improvements on the terms it considers appropriate. The proceeds from the sale shall be deposited in a fund that may be used only to pay for costs described by Subsection (b).

Acts 1995, 74th Leg., ch. 165, Sec. 1, eff. Sept. 1, 1995.

Sec. 314.012. RESOLUTION. (a) A governing body that determines to proceed under this chapter shall declare its determination by resolution that may:

(1) state the nature, extent, and limits of the improvement to be made; and

(2) describe the real property proposed to be condemned by:

(A) the lot or block number;

(B) the number of front feet;

(C) the name of the owner; or

(D) any other description that substantially identifies the property.

(b) A mistake or omission in the resolution does not invalidate it.

(c) Passage of the resolution is conclusive evidence of the public use and necessity of the proposed improvement.

Acts 1995, 74th Leg., ch. 165, Sec. 1, eff. Sept. 1, 1995.

Sec. 314.013. SURVEY. (a) On passage of the resolution, the municipal engineer or engineer designated by the governing body shall prepare and submit to the governing body:

(B) the location of the proposed improvements; and

(C) the property through which the improvements are to be extended and that is to be condemned for the improvements; and

(2) a written estimate of the total cost of:

(A) the improvements; and

(B) each parcel of property to be condemned.

(b) The governing body shall examine the plat and report and correct any errors. An error or omission does not invalidate the plat or report or a subsequent proceeding held under the plat or report.

Acts 1995, 74th Leg., ch. 165, Sec. 1, eff. Sept. 1, 1995.

SUBCHAPTER C. PROCEDURE

Sec. 314.021. APPOINTMENT OF CONDEMNATION COMMISSION. (a) In addition to qualifying under Section 21.014(a), Property Code, a member of a condemnation commission must be a qualified voter.

(b) If a commissioner dies, becomes disabled, refuses to act, becomes incapacitated, or is absent for more than 30 days from the county, the judge shall promptly, in term time or vacation, appoint a new commissioner having the qualifications prescribed by Subsection (a). An action of the commission taken before the vacancy is valid. After the vacancy is filled, the commission shall proceed and take all actions provided by this chapter as if a vacancy had not occurred.

(c) A commissioner is entitled to receive as compensation not more than \$10 for each day the commissioner is employed in the performance of the commissioner's duties.

Acts 1995, 74th Leg., ch. 165, Sec. 1, eff. Sept. 1, 1995.

(d) Notice of the hearing shall be given by publication for not less than three days in a newspaper of general circulation in the county in which the property is located beginning not later than the 10th day before the date of the hearing.

(e) Notice by publication is valid and binding on each owner or other person with an interest in or lien on the property if it generally notifies the person to appear and be heard without specifically designating the person by name. An error in the name of a person to whom the notice is directed does not invalidate the notice.

(f) A copy of the notice shall be delivered to:

- (1) each owner, lienholder, or interested party who is a resident of the county where the property is located;

- (2) the agent or attorney of a person described by Paragraph (1); or

- (3) the guardian of the owner if the owner is a minor.

- (1) the value of the property proposed to be condemned;
- (2) the damages to property not condemned resulting from

the improvement;

- (3) the legality of the proceedings; or
- (4) any right of the owner or other party.

(b) An objection must be in writing and filed with the commission.

(c) The commission may not close the hearing until all interested parties appearing have been heard. At the conclusion of the hearing, the commission shall:

- (1) determine the damages due the owners, lienholders, or other interested parties for property taken or damaged;
- (2) apportion the damages determined under Subdivision (1) among the owners, lienholders, or other interested parties;
- (3) date and sign two copies of a written report; and
- (4) file one copy of the report with the clerk, secretary, or recording officer of the municipality and the second copy with the clerk of the court that appointed the commission.

(d) The governing body may record in its minutes the following items relating to a condemnation proceeding:

- (1) proceedings of the governing body;
- (2) notices issued and returns of the notices;
- (3) orders, reports, and other proceedings of the commission; and
- (4) certified copies of all orders or proceedings of a court.

(e) A record made under Subsection (d) or a certified copy of the record is prima facie evidence of the facts in the record.

Sec. 314.024. OBJECTIONS. (a) Not later than the 10th day after the date the commission files a report under Section 314.023 with the court, a party affected by the decision of the commission may file with the court an objection to the decision.

(b) If an objection is not timely filed:

- (1) the determinations of the commission become final and binding on the parties and their heirs, successors, and assigns and may not subsequently be questioned in any proceeding; and
- (2) the judge shall enter the report in the records of the court and adopt the report as the court's.

(c) The judge may issue process as necessary to enforce a judgment under Subsection (b)(2).

Acts 1995, 74th Leg., ch. 165, Sec. 1, eff. Sept. 1, 1995.

Sec. 314.025. LAW APPLICABLE. Except as otherwise provided by this chapter, Chapter 21, Property Code, applies to proceedings under this chapter.

Acts 1995, 74th Leg., ch. 165, Sec. 1, eff. Sept. 1, 1995.

Sec. 314.026. ERRORS. The governing body, the condemnation commission, and the judge before whom a condemnation proceeding is pending shall take all appropriate actions to correct any error or invalidity in the proceeding. An error or omission in a proceeding does not invalidate the proceeding, but a proceeding may be corrected, repeated, or adjourned until the correction is made or omission supplied.

Acts 1995, 74th Leg., ch. 165, Sec. 1, eff. Sept. 1, 1995.

(a) Except as provided by this section, the governing body may by resolution order an assessment to pay all or part of the costs of making an improvement as described by Section 314.011(b), with reasonable attorney's fees and the costs incurred in making the assessment, against the owner and property if the property is:

- (1) adjacent to or in the vicinity of an improvement; and
- (2) specially benefited by the improvement.

(b) In its resolution, the governing body may designate:

- (1) the property to be assessed; or
- (2) a district containing property to be assessed.

(c) The governing body may apportion the costs of the assessment among the owners of the property assessed.

(d) In making an assessment, the governing body may not include the cost of property purchased but not actually used for making the improvement.

(e) An assessment may not be made against:

(1) property or its owner in excess of the special benefit to the property in the enhanced value of the property resulting from the improvement; or

(2) property that is exempt from execution.

(f) The owner of property exempt from assessment under Subsection (e)(2):

(1) shall be assessed an amount equal to the amount the assessment would have been if the property were not exempt; and

(2) is personally liable for the assessment.

Acts 1995, 74th Leg., ch. 165, Sec. 1, eff. Sept. 1, 1995.

Sec. 314.042. NOTICE TO OWNER OF ASSESSMENT. (a) An assessment may not be made against the property benefited or the owners of the property until after the owners, lienholders, and other interested parties are given a reasonable opportunity to be heard before the governing body or before the commission as provided by Section 314.047.

(b) The governing body or commission shall publish three times before the hearing reasonable notice of the hearing in a newspaper of general circulation in the municipality beginning not later than the 10th day before the date of the hearing.

(1) in person to the owner's local agent; or

(2) by mailing the notice through the post office in the municipality to the address of the office of the railway or street railway as it appears on the most recent tax roll of the municipality.

(d) The name of an owner, lienholder, or other interested party need not be specifically set out in the notice required by Subsection (b) or (c), but the real property proposed to be assessed shall be briefly described in the notice by:

(1) lot and block;

(2) number;

(3) front feet;

(4) reference to a plat, report, or record filed in

connection with the proceedings; or

(5) any other description reasonably identifying the property.

Acts 1995, 74th Leg., ch. 165, Sec. 1, eff. Sept. 1, 1995.

Sec. 314.043. NOTICE TO COUNTY CLERK OF ASSESSMENT. (a) A governing body that proposes to assess property abutting an improvement shall file notice with the county clerk of each county in which the property is located. The notice must be signed in the name of the municipality by its clerk, secretary, or mayor or the officer performing the duties of the clerk, secretary, or mayor.

(b) The notice required by Subsection (a) must:

(1) show substantially that the governing body has determined it necessary that the street be improved;

(2) give the name of:

(A) the street and the names of the two cross streets or other approximate lengthwise limits between which the street is to be or has been improved or otherwise identify or designate the street and the portion of the street to be improved; and

(B) the subdivision and affected blocks if the street abuts a subdivision for which a plat has been recorded in the county clerk's office; and

(3) state that a portion of the cost of the improvement is to be or has been specifically assessed as a lien on property abutting the street.

(c) A notice filed under Subsection (a) may include one or more streets or improvements.

(d) A governing body that proposes to assess property not abutting the improvement shall file a notice signed as required by Subsection (a) with the clerk of each county where the property is located.

(e) The notice required by Subsection (d) must:

(1) designate the property proposed to be assessed or the district within which assessments have been or may be made; or

(2) otherwise identify the property against which a lien is

proposed to be assessed.

(f) A notice required by Subsection (a) or (d) need not give details or be sworn to or acknowledged. The notice may be filed at any time, and the county clerk with whom the notice is filed shall:

(1) record the notice in the same class of records as a mortgage or deed of trust; and

(2) index the notice in the name of the municipality and in the name or other designation of the street to which the notice relates.

Acts 1995, 74th Leg., ch. 165, Sec. 1, eff. Sept. 1, 1995.

(b) The lien takes effect on the filing of the notice provided by Section 314.043(a) or (d).

Acts 1995, 74th Leg., ch. 165, Sec. 1, eff. Sept. 1, 1995.

- (2) bear interest at not more than eight percent a year.

Acts 1995, 74th Leg., ch. 165, Sec. 1, eff. Sept. 1, 1995.

Sec. 314.047. HEARING ON ASSESSMENT BEFORE CONDEMNATION COMMISSION. (a) The governing body may provide that the condemnation commissioners hold the hearing required under Section 314.042(a).

Sec. 314.051. REASSESSMENTS. (a) An error in a proceeding under this chapter, the description of property, or the name of the owner does not invalidate an assessment, and an assessment is in effect against the property and the owner of the property.

(b) A governing body that is advised of an error shall correct the error.

(c) At the request of an interested party, the governing body shall, after notice and hearing that comply with this chapter, reassess an owner or property erroneously assessed in accordance with special benefits as provided by this chapter as to original assessments. The governing body may set the terms of payment of a reassessment and may issue assignable certificates evidencing the reassessment in the same manner as for an original assessment.

(d) The governing body may not make a reassessment later than six years after the date of the ordinance making the original assessment. If the reassessment is contested in an action at law, the time consumed in the action is not included in computing the six years.

(e) In making a reassessment, the governing body is not required to repeat an action relating to the original assessment, except as required by Subsection (c).

Acts 1995, 74th Leg., ch. 165, Sec. 1, eff. Sept. 1, 1995.

Sec. 314.052. DEFICIENCY ASSESSMENTS. (a) If, after an assessment is made under this chapter, the amount assessed and apportioned is insufficient to defray all the costs of an improvement:

(1) the governing body may assess the deficiency against property specially benefited and the owners of the property and apportion the deficiency among them, after notice and hearing as provided by this chapter and after complying with each provision of this chapter applicable to original assessments; or

(2) a deficiency assessment may be made after notice and hearing before the commission in the manner provided by Section 314.047.

(b) A municipality may issue assignable certificates evidencing the deficiency assessment.

(b) After the deadline prescribed by Subsection (a), the owner and the owner's heirs, successors, and assigns are barred from bringing an action described by that subsection or objecting to the validity of an assessment, reassessment, or proceeding.

(A) the making of an improvement provided by this

chapter;

(B) the taking or condemnation of property for an improvement; or

(C) the determination and payment of damages for property taken or damaged; or

Sec. 315.063. **ADJUSTMENT OF EQUITIES.** If the governing body of a municipality considers that assessing and apportioning costs as provided by Section 315.062 would be unjust or unequal in a particular case, the governing body shall assess and apportion the costs justly and equally, considering the special benefit to each owner, the equities of the owners, and the adjustment of the apportionment, so as to produce a substantial equality of benefits received by and burdens imposed on each owner.

(b) A lien under this section reverts back and takes effect as of the date of the original resolution ordering the lighting improvement. Adoption of the resolution is notice of the lien to all persons.

(c) A person who owns property on the date of an ordinance providing for an assessment against the property under Section 315.069 is personally liable for that person's respective portion of the assessment.

(d) Assessing in one assessment more than one parcel of property owned by a single owner or owned jointly by two or more persons does not invalidate the assessment or a lien or claim of personal liability under the assessment.

(e) An error in the name of an owner of assessed property in the ordinance providing for the assessment does not invalidate the lien or personal liability created by the ordinance. The lien or personal liability exists against the true owner of the property as

if the owner had been correctly described.

Acts 1995, 74th Leg., ch. 165, Sec. 1, eff. Sept. 1, 1995.

Sec. 315.073. PRIORITY OF LIEN. A lien under Section 315.072 is superior to any other lien, claim, or title, except a municipal, county, or state tax.

(c) A recital in a certificate that states that the procedure for making the lighting improvement was in compliance with law and that all prerequisites to imposing the lien and to creating the personal liability of the property owner were performed is prima facie evidence in all courts that the procedure and prerequisites were performed as stated in the certificate.

(d) A certificate authorized under this section shall be:

(1) executed by the municipality's chief executive; and

(2) attested with the corporate seal by the municipal secretary or other officer designated by the governing body.

Sec. 366.031. CREATION AND EXPANSION OF A REGIONAL TOLLWAY AUTHORITY. (a) Two or more counties, acting through their respective commissioners courts, may by order passed by each commissioners court create a regional tollway authority under this chapter if:

(1) one of the counties has a population of not less than 300,000;

(2) the counties form a contiguous territory; and

(3) unless one of the counties has a population of two million or more, the commission approves the creation.

(b) The commission shall adopt rules to implement the provisions of this section by March 1, 1998.

(c) A commissioners court may by resolution petition an established authority for inclusion in the authority if the county is contiguous to a county that initially created the authority.

(d) On approval of the board of an authority receiving a petition under Subsection (c), the county becomes part of the authority.

(e) A county that is not part of an authority and in which an authority turnpike project is located becomes part of the authority on the date the authority determines that:

(1) recorded electronic toll collections at toll assessment facilities located in the county account for not less than four percent of all recorded electronic toll collections on all of the authority's turnpike projects; and

(2) the population of the county is at least four percent of the aggregate population of all the counties of the authority, not including the county that will become part of the authority.

Sec. 366.0311. ADVISORY COMMITTEE FOR PROJECTS LOCATED OUTSIDE AUTHORITY. (a) At the time an authority enters into a primary

construction contract for its first project to be located in a county that is not part of the authority, the authority shall create an advisory committee to advise the board on matters related to projects located in counties that are not part of the authority.

(b) The advisory committee must be composed of:

(1) the director of the authority appointed by the governor, who serves as the chair of the committee;

(2) an additional director of the authority appointed by the presiding officer of the board as the presiding officer deems appropriate; and

(3) one member from each county that is not part of the authority and in which a project is proposed to be located, to be appointed by the commissioners court of that county at the time a primary construction contract for the project is entered into.

(c) An advisory committee member appointed under Subsection (b)(3) is not a director of the authority for the purposes of Section 366.251 or any other purpose.

(d) The board may adopt rules governing the operation and duties of an advisory committee.

Sec. 366.032. NATURE OF REGIONAL TOLLWAY AUTHORITY. (a) An authority created under this chapter is a body politic and corporate and a political subdivision of this state.

(b) An authority is a governmental unit as that term is defined in Chapter 101, Civil Practice and Remedies Code.

(c) The exercise by an authority of the powers conferred by this chapter in the acquisition, design, financing, construction, operation, and maintenance of a turnpike project or system is:

(1) in all respects for the benefit of the people of the counties in which an authority operates and of the people of this state, for the increase of their commerce and prosperity, and for the improvement of their health, living conditions, and public safety; and

(2) an essential governmental function of the state.

(d) The operations of an authority are governmental, not proprietary, functions.

Added by Acts 1997, 75th Leg., ch. 1171, Sec. 7.24, eff. Sept. 1, 1997.

Sec. 366.033. GENERAL POWERS. (a) An authority, acting through its board, without state approval, supervision, or regulation, may:

- (1) adopt rules for the regulation of its affairs and the conduct of its business;
- (2) adopt an official seal;
- (3) study, evaluate, design, acquire, construct, maintain, repair, and operate turnpike projects, individually or as one or more systems;
- (4) acquire, hold, and dispose of property in the exercise of its powers and the performance of its duties under this chapter;
- (5) enter into contracts or operating agreements with similar authorities or agencies of the United States, a state of the United States, the United Mexican States, or a state of the United Mexican States;
- (6) enter into contracts or agreements necessary or incidental to its duties and powers under this chapter;
- (7) cooperate and work directly with property owners and governmental agencies and officials to support an activity required to promote or develop a turnpike project or system;
- (8) employ and set the compensation and benefits of administrators, consulting engineers, attorneys, accountants, construction and financial experts, superintendents, managers, full-time and part-time employees, agents, consultants, and such other persons as the authority considers necessary or useful;
- (9) receive loans, gifts, grants, and other contributions for the construction of a turnpike project or system and receive contributions of money, property, labor, or other things of value from any source, including the United States, a state of the United States, the United Mexican States, a state of the United Mexican States, the commission, the department, any subdivision of the state, or any other local governmental or private entity, to be used for the purposes for which the grants or contributions are made, and enter into any agreement necessary for the grants or contributions;
- (10) install, construct, maintain, repair, renew, relocate, and remove public utility facilities in, on, along, over, or under a

turnpike project;

(11) organize a corporation under Chapter 431 for the promotion and development of turnpike projects and systems;

(12) adopt and enforce rules not inconsistent with this chapter for the use of any turnpike project or system, including traffic and other public safety rules;

(13) enter into leases, operating agreements, service agreements, licenses, franchises, and similar agreements with public or private parties governing the parties' use of all or any portion of a turnpike project and the rights and obligations of the authority with respect to a turnpike project; and

(14) do all things necessary or appropriate to carry out the powers expressly granted by this chapter.

(b) Rules adopted by the authority must be published in a newspaper with general circulation in the area in which the authority is located once each week for two consecutive weeks after adoption of the rule. The notice must contain a condensed statement of the substance of the rule and must advise that a copy of the complete text of the rule is filed in the principal office of the authority where the text may be read by any person. A rule takes effect 10 days after the date of the second publication of the notice under this subsection.

(c) Property comprising a part of a turnpike project or a system is not subject to condemnation or the power of eminent domain by any person, including a governmental entity.

(d) An authority may, if requested by the commission, perform any function not specified by this chapter to promote or develop turnpike projects and systems in this state.

(e) An authority may sue and be sued and plead and be impleaded in its own name.

(f) An authority may rent, lease, franchise, license, or otherwise make portions of any property of the authority, including tangible or intangible property, available for use by others in furtherance of its powers under this chapter by increasing:

(1) the feasibility or efficient operation of a turnpike project or system; or

(2) the revenue of the authority.

(g) An authority and any local governmental entity may enter into a contract under which the authority will operate a turnpike project or system on behalf of the local governmental entity. An

authority may enter into a contract with the department under which the authority will operate a turnpike project or system on behalf of the department.

(h) The payments to be made to an authority under a contract described by Subsection (g) shall constitute operating expenses of the facility or system that is to be operated under the contract, and the contract may extend for a number of years as the parties agree.

(i) An authority shall adopt a written drug and alcohol policy restricting the use of controlled substances by employees of the authority, prohibiting the consumption of alcoholic beverages by employees while on duty, and prohibiting employees from working for the authority while under the influence of controlled substances or alcohol. An authority may adopt policies regarding the testing of employees suspected of being in violation of the authority's drug and alcohol policy. The policy shall provide that, unless required by court order or permitted by the person who is the subject of the testing, the authority shall keep the results of the test confidential.

(j) An authority shall adopt written procedures governing its procurement of goods and services that are consistent with general laws applicable to the authority.

(k) If an authority enters into a contract or agreement to design, finance, construct, operate, maintain, or perform any other function for a turnpike project, system, or improvement authorized by law on behalf of a local governmental entity, the commission, the department, a regional mobility authority, or any other entity, the contract or agreement may provide that the authority, in performing the function, is governed by the applicable provisions of this chapter and the rules and procedures adopted by the authority under this chapter, in lieu of the laws, rules, or procedures applicable to the other party for the performance of the same function.

(l) An authority, acting through its board, may agree with another entity to acquire a turnpike project or system from that entity and to assume any debts, obligations, and liabilities of the entity relating to a turnpike project or system transferred to the authority.

Sec. 366.034. ESTABLISHMENT OF TURNPIKE SYSTEMS. (a) If an authority determines that the traffic needs of the counties in which it operates and the traffic needs of the surrounding region could be most efficiently and economically met by jointly operating two or more turnpike projects as one operational and financial enterprise, it may create a system comprised of those turnpike projects. An authority may create more than one system and may combine two or more systems into one system. An authority may finance, acquire, construct, and operate additional turnpike projects as additions to and expansions of a system if the authority determines that the turnpike project could most efficiently and economically be acquired and constructed if it were a part of the system and that the addition will benefit the system.

(b) The revenue of a system shall be accounted for separately and may not be commingled with the revenue of a turnpike project that is not a part of the system or with the revenue of another system.

Added by Acts 1997, 75th Leg., ch. 1171, Sec. 7.24, eff. Sept. 1, 1997.

Sec. 366.036. TRANSFER OF TURNPIKE PROJECT OR SYSTEM. (a) An authority may transfer any of its turnpike projects or systems to one or more local governmental entities if:

(1) the authority has commitments from the governing bodies of the local governmental entities to assume jurisdiction over the transferred projects or systems;

(2) property and contract rights in the transferred projects or systems and bonds issued for the projects or systems are not affected unfavorably;

(3) the transfer is not prohibited under the bond proceedings applicable to the transferred projects or systems;

(4) adequate provision has been made for the assumption of all debts, obligations, and liabilities of the authority relating to

the transferred projects or systems by the local governmental entities assuming jurisdiction over the transferred projects or systems;

(5) the local governmental entities are authorized to assume jurisdiction over the transferred projects or systems and to assume the debts, obligations, and liabilities of the authority relating to the transferred projects or systems; and

(6) the transfer has been approved by the commissioners court of each county that is part of the authority.

(b) An authority may transfer to one or more local governmental entities any traffic estimates, revenue estimates, plans, specifications, surveys, appraisals, and other work product developed by the authority in determining the feasibility of the construction, improvement, extension, or expansion of a turnpike project or system, and the authority's rights and obligations under any related agreements, if the requirements of Subsections (a)(1) and (6) are met.

(c) A local governmental entity shall, using any lawfully available funds, reimburse any expenditures made by an authority from its feasibility study fund or otherwise to pay the costs of work product transferred to the local governmental entity under Subsection (b) and any other amounts expended under related agreements transferred to the local governmental entity. The reimbursement may be made over time, as determined by the local governmental entity and the authority.

Added by Acts 2005, 79th Leg., Ch. 281 (H.B. [2702](#)), Sec. 2.59, eff. June 14, 2005.

Sec. 366.037. OTHER HIGHWAY PROJECTS. (a) In addition to the powers granted under this chapter and without supervision or regulation by any state agency or local governmental entity, but subject to an agreement entered into under Subsection (c), the board of an authority may by resolution, and on making the findings set forth in this subsection, authorize the use of surplus revenue of a turnpike project or system for the study, design, construction, maintenance, repair, and operation of a highway or similar facility that is not a turnpike project if the highway or similar facility is:

(1) situated in a county in which the authority is

authorized to design, construct, and operate a turnpike project;

(2) anticipated to either:

(A) enhance the operation or revenue of an existing, or the feasibility of a proposed, turnpike project by bringing traffic to that turnpike project or enhancing the flow of traffic either on that turnpike project or to or from that turnpike project to another facility; or

(B) ameliorate the impact of an existing or proposed turnpike project by enhancing the capability of another facility to handle traffic traveling, or anticipated to travel, to or from that turnpike project; and

(3) not anticipated to result in an overall reduction of revenue of any turnpike project or system.

(b) The board in the resolution may prescribe terms for the use of the surplus revenue, including the manner in which the highway or related facility shall be studied, designed, constructed, maintained, repaired, or operated.

(c) An authority shall enter into an agreement to implement this section with the department, the commission, a local governmental entity, or another political subdivision that owns a street, road, alley, or highway that is directly affected by the authority's turnpike project or related facility.

(d) An authority may not:

(1) take an action under this section that violates, impairs, or is inconsistent with a bond resolution, trust agreement, or indenture governing the use of the revenue of a turnpike project or system; or

(2) commit in any fiscal year expenditures under this section exceeding 10 percent of its surplus revenue from the preceding fiscal year.

(e) In authorizing expenditures under this section, the board shall consider:

(1) balancing throughout the counties of the authority the application of funds generated by its turnpike projects and systems, taking into account where those amounts are already committed or programmed as a result of this section or otherwise; and

(2) connectivity to an existing or proposed turnpike project or system.

(f) Except as provided by this section, an authority has the same powers and may use the same procedures with respect to the

study, financing, design, construction, maintenance, repair, and operation of a highway or similar facility under this section as are available to the authority with respect to a turnpike project or system.

(g) Notwithstanding other provisions of this section:

(1) any work on a highway in the state highway system must be approved by the department; and

(2) the department shall supervise and regulate any work on a highway in the state highway system.

Added by Acts 2007, 80th Leg., R.S., Ch. 264 (S.B. 792), Sec. 9.05, eff. June 11, 2007.

Sec. 366.038. TOLLING SERVICES. (a) In this section, "tolling services" means the tolling services normally provided through an authority's customer service center, including customer service, customer account maintenance, transponder supply, and toll collection and enforcement.

(b) An authority shall provide, for reasonable compensation, tolling services for a toll project in the boundaries of the authority, regardless of whether the toll project is developed, financed, constructed, and operated under an agreement, including a comprehensive development agreement, with the authority or another entity. This section does not restrict an authority from agreeing to provide additional tolling services in an agreement described in Subsection (d). Additional tolling services provided under an agreement under that subsection are subject to the provisions that apply to tolling services under this section.

(c) An authority may not provide financial security, including a cash collateral account, for the performance of tolling services the authority provides under this section if:

(1) the authority determines that providing security could restrict the amount, or increase the cost, of bonds or other debt obligations the authority may subsequently issue under this chapter; or

(2) the authority is not reimbursed its cost of providing the security.

(d) Before providing tolling services for a toll project under this section, an authority must enter into a written agreement that

sets out the terms and conditions for the tolling services to be provided and the terms of compensation for those services.

(e) Toll revenues are the property of the entity that is entitled to the revenues under a tolling services agreement for the toll project, regardless of who holds or collects the revenues. Toll revenues that are held or collected by an authority under a tolling services agreement and are not the property of the authority are not subject to a claim adverse to the authority or a lien on or encumbrance against property of the authority. Toll revenues that are the property of the authority are not subject to a claim adverse to any other entity or a lien on or encumbrance against property of any other entity.

(f) An authority may agree in a tolling services agreement that its right and obligation to provide tolling services for the applicable toll project under this section are subject to termination for default and that after a termination for default this section does not apply to that toll project.

(g) Any public or private entity, including an authority or the department, may agree to fund a cash collateral account for the purpose of providing money that may be withdrawn as provided in the tolling services agreement because of an authority's failure to make any payment as required by the tolling services agreement. An authority's written commitment to fully or partially fund a cash collateral account is conclusive evidence of the authority's determination that the commitment does not violate Subsection (c). The department may use money from any available source to fund a cash collateral account under this subsection.

(h) For purposes of Subchapter C, Chapter 372, a toll project for which an authority provides tolling services under a tolling services agreement is considered a toll project of the authority and the authority is considered the toll project entity with respect to all rights and remedies arising under that subchapter regarding the toll project. The authority may not stop, detain, or impound a motor vehicle as authorized under that subchapter on a toll project's active traffic lanes unless a tolling service agreement addresses that action.

SUBCHAPTER C. FEASIBILITY OF REGIONAL TURNPIKE PROJECTS

Sec. 366.071. EXPENDITURES FOR FEASIBILITY STUDIES. (a) An authority may pay the expenses of studying the cost and feasibility and any other expenses relating to the preparation and issuance of bonds for a proposed turnpike project or system by:

- (1) using legally available revenue derived from an existing turnpike project or system;
- (2) borrowing money and issuing bonds or entering into a loan agreement payable out of legally available revenue anticipated to be derived from the operation of an existing turnpike project or system; or
- (3) pledging to the payment of the bonds or loan agreements legally available revenue anticipated to be derived from the operation of an existing turnpike project or system or revenue legally available to the authority from another source.

(b) Money spent under this section for a proposed turnpike project or system must be reimbursed to the turnpike project or system from which the money was spent from the proceeds of bonds issued for the acquisition and construction of the proposed turnpike project or system.

(c) The use of any money of a turnpike project or system to study the feasibility of another turnpike project or system or used to repay any money used for that purpose does not constitute an operating expense of the turnpike project or system producing the revenue and may only be paid from the surplus money of the turnpike project or system.

Added by Acts 1997, 75th Leg., ch. 1171, Sec. 7.24, eff. Sept. 1, 1997.

Sec. 366.072. FEASIBILITY STUDY FUND. (a) An authority may maintain a feasibility study fund. The fund is a revolving fund held in trust by a banking institution chosen by the authority and shall

be kept separate from the money for any turnpike project or system.

(b) An authority may transfer an amount from a surplus fund established for a turnpike project or system to the authority's feasibility study fund if the remainder of the surplus fund is not less than any minimum amount required by the bond proceedings to be retained for that turnpike project or system.

(c) Money in the feasibility study fund may be used only to pay the expenses of studying the cost and feasibility and any other expenses relating to:

(1) the preparation and issuance of bonds for the acquisition and construction of a proposed turnpike project or system;

(2) the financing of the improvement, extension, or expansion of an existing turnpike project or system; and

(3) private participation, as authorized by law, in the financing of a proposed turnpike project or system, the refinancing of an existing turnpike project or system, or the improvement, extension, or expansion of a turnpike project or system.

(d) Money spent under Subsection (c) for a proposed turnpike project or system must be reimbursed from the proceeds of turnpike revenue bonds issued for, or other proceeds that may be used for, the acquisition, construction, improvement, extension, expansion, or operation of the turnpike project or system.

(e) For a purpose described by Subsection (c), an authority may borrow money and issue promissory notes or other interest-bearing evidences of indebtedness payable out of its feasibility study fund, pledging money in the fund or to be placed in the fund.

Added by Acts 1997, 75th Leg., ch. 1171, Sec. 7.24, eff. Sept. 1, 1997.

Sec. 366.073. FEASIBILITY STUDY BY MUNICIPALITY, COUNTY, OTHER LOCAL GOVERNMENTAL ENTITY, OR PRIVATE GROUP. (a) One or more municipalities, counties, or local governmental entities, a combination of municipalities, counties, and local governmental entities, or a private group or combination of individuals in this state may pay all or part of the expenses of studying the cost and feasibility and any other expenses relating to:

(1) the preparation and issuance of bonds for the

acquisition and construction of a proposed turnpike project or system by an authority;

(2) the improvement, extension, or expansion of an authority's existing turnpike project or system; or

(3) the use of private participation under applicable law in connection with the acquisition, construction, improvement, expansion, extension, maintenance, repair, or operation of a turnpike project or system by an authority.

(b) Money spent under Subsection (a) for an authority's proposed turnpike project or system is reimbursable without interest and with the consent of the authority to the person paying the expenses described in Subsection (a) out of the proceeds from turnpike revenue bonds issued for or other proceeds that may be used for the acquisition, construction, improvement, extension, expansion, or operation of the turnpike project or system.

Added by Acts 1997, 75th Leg., ch. 1171, Sec. 7.24, eff. Sept. 1, 1997.

SUBCHAPTER D. TURNPIKE FINANCING

Sec. 366.111. TURNPIKE REVENUE BONDS. (a) An authority, by adoption of a bond resolution, may authorize the issuance of bonds to pay all or part of the cost of a turnpike project or system, to refund any bonds previously issued for the turnpike project or system, or to pay for all or part of the cost of a turnpike project or system that will become a part of another system.

(b) As determined in the bond resolution, the bonds of each issue shall:

(1) be dated;

(2) bear interest at the rate or rates and beginning on the dates, as authorized by law, or bear no interest;

(3) mature at the time or times, not exceeding 40 years from their date or dates; and

(4) be made redeemable before maturity at the price or prices and under the terms provided by the bond resolution.

(c) An authority may sell the bonds at public or private sale in the manner and for the price it determines to be in the best interest of the authority.

(d) The proceeds of each bond issue shall be disbursed in the

manner and under the restrictions, if any, the authority provides in the bond resolution.

(e) Additional bonds may be issued in the same manner to pay the costs of a turnpike project or system. Unless otherwise provided in the bond resolution, the additional bonds shall be on a parity, without preference or priority, with bonds previously issued and payable from the revenue of the turnpike project or system. In addition, an authority may issue bonds for a turnpike project or system secured by a lien on the revenue of the turnpike project or system subordinate to the lien on the revenue securing other bonds issued for the turnpike project or system.

(f) If the proceeds of a bond issue exceed the cost of the turnpike project or system for which the bonds were issued, the surplus shall be segregated from the other money of the authority and used only for the purposes specified in the bond resolution.

(g) Bonds issued and delivered under this chapter and interest coupons on the bonds are a security under Chapter 8, Business & Commerce Code.

(h) Bonds issued under this chapter and income from the bonds, including any profit made on the sale or transfer of the bonds, are exempt from taxation in this state.

Added by Acts 1997, 75th Leg., ch. 1171, Sec. 7.24, eff. Sept. 1, 1997.

Sec. 366.112. INTERIM BONDS. (a) An authority may, before issuing definitive bonds, issue interim bonds, with or without coupons, exchangeable for definitive bonds.

(b) The interim bonds may be authorized and issued in accordance with this chapter, without regard to the requirements, restrictions, or procedural provisions contained in any other law.

(c) A bond resolution authorizing interim bonds may provide that the interim bonds recite that the bonds are issued under this chapter. The recital is conclusive evidence of the validity and the regularity of the bonds' issuance.

Added by Acts 1997, 75th Leg., ch. 1171, Sec. 7.24, eff. Sept. 1, 1997.

Sec. 366.113. PAYMENT OF BONDS; STATE AND COUNTY CREDIT NOT PLEDGED. (a) The principal of, interest on, and any redemption premium on bonds issued by an authority are payable solely from:

(1) the revenue of the turnpike project or system for which the bonds are issued, including tolls pledged to pay the bonds;

(2) payments made under an agreement with the commission or a local governmental entity as provided by Subchapter G;

(3) money derived from any other source available to the authority, other than money derived from a turnpike project that is not part of the same system or money derived from a different system, except to the extent that the surplus revenue of a turnpike project or system has been pledged for that purpose; and

(4) amounts received under a credit agreement relating to the turnpike project or system for which the bonds are issued.

(b) Bonds issued under this chapter do not constitute a debt of the state or any of the counties of an authority or a pledge of the faith and credit of the state or any of the counties. Each bond must contain on its face a statement to the effect that the state, the authority, and the counties of the authority are not obligated to pay the bond or the interest on the bond from a source other than the amount pledged to pay the bond and the interest on the bond, and neither the faith and credit and taxing power of the state or the counties of the authority are pledged to the payment of the principal of or interest on the bond.

(c) An authority may not incur financial obligations that cannot be paid from revenue derived from owning or operating the authority's turnpike projects and systems or from other revenue provided by law.

Added by Acts 1997, 75th Leg., ch. 1171, Sec. 7.24, eff. Sept. 1, 1997.

Sec. 366.114. EFFECT OF LIEN. (a) A lien on or a pledge of revenue from a turnpike project or system under this chapter or on a reserve, replacement, or other fund established in connection with a bond issued under this chapter:

(1) is enforceable at the time of payment for and delivery of the bond;

(2) applies to an item on hand or subsequently received;

(3) applies without physical delivery of an item or other act; and

(4) is enforceable against any person having any claim, in tort, contract, or other remedy, against the applicable authority without regard to whether the person has notice of the lien or pledge.

(b) A bond resolution is not required to be recorded except in the regular records of the authority.

Added by Acts 1997, 75th Leg., ch. 1171, Sec. 7.24, eff. Sept. 1, 1997.

Sec. 366.115. BOND INDENTURE. (a) Bonds issued under this chapter may be secured by a bond indenture between the authority and a corporate trustee that is a trust company or a bank that has the powers of a trust company.

(b) A bond indenture may pledge or assign the tolls and other revenue to be received but may not convey or mortgage any part of a turnpike project or system.

(c) A bond indenture may:

(1) set forth the rights and remedies of the bondholders and the trustee;

(2) restrict the individual right of action by bondholders as is customary in trust agreements or indentures of trust securing corporate bonds and debentures; and

(3) contain provisions the authority determines reasonable and proper for the security of the bondholders, including covenants:

(A) establishing the authority's duties relating to:

(i) the acquisition of property;

(ii) the construction, maintenance, operation, and repair of and insurance for a turnpike project or system; and

(iii) custody, safeguarding, and application of money;

(B) prescribing events that constitute default;

(C) prescribing terms on which any or all of the bonds become or may be declared due before maturity; and

(D) relating to the rights, powers, liabilities, or duties that arise on the breach of an authority's duty.

(d) The expenses incurred in carrying out a trust agreement may

be treated as part of the cost of operating the turnpike project.

(e) In addition to all other rights by mandamus or other court proceeding, an owner or trustee of a bond issued under this chapter may enforce the owner's rights against an issuing authority, the authority's employees, the authority's board, or an agent or employee of the authority's board and is entitled to:

(1) require the authority and the board to impose and collect tolls, charges, and other revenue sufficient to carry out any agreement contained in the bond proceedings; and

(2) apply for and obtain the appointment of a receiver for the turnpike project or system.

Added by Acts 1997, 75th Leg., ch. 1171, Sec. 7.24, eff. Sept. 1, 1997.

Sec. 366.116. APPROVAL OF BONDS BY ATTORNEY GENERAL. (a) An authority shall submit to the attorney general for examination a transcript of proceedings relating to bonds authorized under this chapter. The transcript shall include the bond proceedings and any contract securing or providing revenue for the payment of the bonds.

(b) If the attorney general determines that the bonds, the bond proceedings, and any supporting contract are authorized by law, the attorney general shall approve the bonds and deliver to the comptroller:

(1) a copy of the legal opinion of the attorney general stating the approval; and

(2) the record of proceedings relating to the authorization of the bonds.

(c) On receipt of the legal opinion of the attorney general and the record of proceedings relating to the authorization of the bonds, the comptroller shall register the record of proceedings.

(d) After approval by the attorney general, the bonds, the bond proceedings, and any supporting contract are valid, enforceable, and incontestable in any court or other forum for any reason and are binding obligations according to their terms for all purposes.

Sec. 366.117. FURNISHING OF INDEMNIFYING BONDS OR PLEDGES OF SECURITIES. (a) A bank or trust company incorporated under the laws of this state that acts as depository of the proceeds of bonds or of revenue may furnish indemnifying bonds or pledge securities that an authority requires.

(b) Bonds of an authority may secure the deposit of public money of the state or a political subdivision of the state to the extent of the lesser of the face value of the bonds or their market value.

Added by Acts 1997, 75th Leg., ch. 1171, Sec. 7.24, eff. Sept. 1, 1997.

All laws affecting the issuance of bonds by local governmental entities, including Chapters 1201, 1202, 1204, and 1371, Government Code, apply to bonds issued under this chapter. To the extent of a conflict between those laws and this chapter, the provisions of this chapter prevail.

SUBCHAPTER E. ACQUISITION, CONSTRUCTION, AND OPERATION OF TURNPIKE PROJECTS

Sec. 366.161. TURNPIKE PROJECTS EXTENDING INTO OTHER COUNTIES. An authority may acquire, construct, operate, maintain, expand, or extend a turnpike project in:

- (1) a county that is a part of the authority; or
- (2) subject to Sections 366.031(e) and 366.0311, a county in which the authority operates or is constructing a turnpike project if the turnpike project in the affected county is a continuation of the authority's turnpike project or system extending from an adjacent county.

Added by Acts 1997, 75th Leg., ch. 1171, Sec. 7.24, eff. Sept. 1, 1997.

Amended by:

Acts 2015, 84th Leg., R.S., Ch. 727 (H.B. 1394), Sec. 3, eff. September 1, 2015.

Sec. 366.162. POWERS AND PROCEDURES OF AUTHORITY IN ACQUIRING PROPERTY. (a) An authority may construct or improve a turnpike project on real property, including a right-of-way acquired by the authority or provided to the authority for that purpose by the commission, a political subdivision of this state, or any other local governmental entity.

(b) Except as provided by this chapter, an authority has the same powers and may use the same procedures as the commission in acquiring property.

Added by Acts 1997, 75th Leg., ch. 1171, Sec. 7.24, eff. Sept. 1, 1997.

Sec. 366.163. ACQUISITION OF PROPERTY. (a) An authority may acquire in the name of the authority public or private real and other property it determines necessary or convenient for the construction, operation, maintenance, expansion, or extension of a turnpike project or for otherwise carrying out this chapter.

(b) The property an authority may acquire under this subchapter includes all or any portion of, and rights in and to:

- (1) public or private land, streets, alleys, rights-of-way, parks, playgrounds, and reservations;
- (2) franchises;
- (3) easements;
- (4) licenses; and
- (5) other interests in real and other property.

(c) An authority may acquire real property by any method, including purchase and condemnation. An authority may purchase public or private real property on the terms and at the price the authority and the property owner consider reasonable.

(d) Covenants, conditions, restrictions, or limitations affecting property acquired in any manner by the authority are not binding against the authority and do not impair the authority's ability to use the property for a purpose authorized by this chapter. The beneficiaries of the covenants, conditions, restrictions, or

limitations are not entitled to enjoin the authority from using the property for a purpose authorized under this chapter, but this section does not affect the right of a person to seek compensation for damages to the person's property under Section 17, Article I, Texas Constitution.

(e) Subsection (d) does not affect the obligation of the authority under other state law to compensate the state for acquiring or using property owned by or on behalf of the state.

Added by Acts 1997, 75th Leg., ch. 1171, Sec. 7.24, eff. Sept. 1, 1997.

Sec. 366.164. RIGHT OF ENTRY. (a) To acquire property necessary or useful in connection with a turnpike project, an authority may enter any real property, water, or premises to make a survey, geotechnical evaluation, sounding, or examination.

(b) An entry under Subsection (a) is not:

- (1) a trespass; or
- (2) an entry under a pending condemnation proceeding.

(c) The authority shall make reimbursements for any actual damages to real property, water, or premises that result from an activity described by Subsection (a).

Added by Acts 1997, 75th Leg., ch. 1171, Sec. 7.24, eff. Sept. 1, 1997.

Sec. 366.165. CONDEMNATION OF REAL PROPERTY. (a) Subject to Subsection (c), an authority may acquire public or private real property in the name of the authority by the exercise of the power of condemnation under the laws applicable to the exercise of that power on property for public use if:

- (1) the authority and the property owner cannot agree on a reasonable price for the property; or
- (2) the property owner is legally incapacitated, absent, unknown, or unable to convey title.

(b) An authority may condemn real property that the authority determines is:

- (1) necessary or appropriate to construct or to efficiently operate a turnpike project;

(2) necessary to restore public or private property damaged or destroyed, including property necessary or convenient to mitigate an environmental effect that directly results from the construction, operation, or maintenance of a turnpike project;

(3) necessary for access, approach, and interchange roads;

(4) necessary to provide proper drainage and ground slope for a turnpike project; or

(5) necessary otherwise to implement this chapter.

(c) An authority may construct a supplemental facility only on real property the authority purchases.

(d) An authority shall, in a statement or petition in condemnation, exclude from the interest to be condemned all the oil, gas, and sulphur that can be removed from beneath the real property. This exclusion shall be made without providing the owner of the oil, gas, or sulphur any right of ingress or egress to or from the surface of the land to explore, develop, drill, or mine the real property.

Sec. 366.166. DECLARATION OF TAKING. (a) An authority may file a declaration of taking with the clerk of the court:

(1) in which the authority files a condemnation petition under Chapter 21, Property Code; or

(2) to which the case is assigned.

(b) An authority may file the declaration of taking concurrently with or subsequent to the filing of the condemnation petition but may not file the declaration after the special commissioners have made an award in the condemnation proceeding.

(c) The declaration of taking must include:

(1) a specific reference to the legislative authority for the condemnation;

(2) a description and plot plan of the real property to be condemned, including the following information if applicable:

- (A) the municipality in which the property is located;
 - (B) the street address of the property; and
 - (C) the lot and block number of the property;
- (3) a statement of the property interest to be condemned;
 - (4) the name and address of each property owner that the authority can obtain after reasonable investigation and a description of the owner's interest in the property; and
 - (5) a statement that immediate possession of all or part of the property to be condemned is necessary for the timely construction of a turnpike project.

(d) A deposit to the registry of the court of an amount equal to the appraised fair market value, as determined by the authority, of the property to be condemned and any damages to the remainder must accompany the declaration of taking.

(e) Instead of the deposit under Subsection (d), at its option, the authority may, concurrently with the declaration of a taking, tender in favor of the owner of the subject property a bond or other security in an amount sufficient to secure the owner for the value of the property taken and damages to remaining property, if the authority obtains the court's approval.

(f) The date on which the declaration is filed is the date of taking for the purpose of assessing the value of the property taken and damages to any remaining property to which an owner is entitled.

(g) An owner may draw upon the deposit held by the court under Subsection (d) on the same terms and conditions as are applicable under state law to a property owner's withdrawal of a commissioners' award deposited under Section 21.021(a)(1), Property Code.

(h) A property owner that is a defendant in an eminent domain action filed by an authority under this chapter has 20 days after the date of service of process of both a condemnation petition and a notice of declaration of taking to give notice to the court in which the action is pending of the defendant's desire to have the condemnation petition placed on the court's docket in the same manner as other cases pending in the court. On receipt of timely notice from the defendant, the court in which the eminent domain action is pending shall place the case on its docket in the same manner as other cases pending in the court.

Added by Acts 1997, 75th Leg., ch. 1171, Sec. 7.24, eff. Sept. 1, 1997.

Sec. 366.167. POSSESSION OF PROPERTY. (a) Immediately on the filing of a declaration of taking, an authority shall serve a copy of the declaration on each person possessing an interest in the condemned property by a method prescribed by Section 21.016(d), Property Code. The authority shall file evidence of the service with the clerk of the court. On filing of that evidence, the authority may take possession of the property on the same terms as if a commissioners hearing had been conducted, pending the litigation.

(b) If the condemned property is a homestead or a portion of a homestead as defined by Section 41.002, Property Code, an authority may not take possession before the 31st day after the date of service under Subsection (a).

(c) A property owner or tenant who refuses to vacate the property or yield possession is subject to forcible entry and detainer under Chapter 24, Property Code.

Added by Acts 1997, 75th Leg., ch. 1171, Sec. 7.24, eff. Sept. 1, 1997.

Sec. 366.168. SEVERANCE OF REAL PROPERTY. (a) If an authority's turnpike project severs a property owner's real property, the authority shall pay:

(1) the value of the property acquired; and
(2) the damages, if any, to the remainder of the owner's property caused by the severance, including damages caused by the inaccessibility of one tract from the other.

(b) At its option, an authority may negotiate for and purchase the severed real property or any part of the severed real property if the authority and the property owner agree on terms for the purchase. An authority may sell and dispose of severed real property that it determines is not necessary or useful to the authority. Severed property must be appraised before being offered for sale by an authority.

Added by Acts 1997, 75th Leg., ch. 1171, Sec. 7.24, eff. Sept. 1, 1997.

Sec. 366.169. ACQUISITION OF RIGHTS IN PUBLIC REAL PROPERTY.

(a) An authority may use real property, including submerged land, streets, alleys, and easements, owned by the state or a local governmental entity that the authority considers necessary for the construction or operation of a turnpike project.

(b) The state or a local governmental entity having charge of public real property may consent to the use of the property for a turnpike project.

(c) Except as provided by Section 228.201, the state or a local governmental entity may convey, grant, or lease to an authority real property, including highways and other real property already devoted to public use and rights or easements in real property, that may be necessary or convenient to accomplish the authority's purposes, including the construction or operation of a turnpike project. A conveyance, grant, or lease under this section may be made without advertising, court order, or other action other than the normal action of the state or local governmental entity necessary for a conveyance, grant, or lease.

(d) This section does not deprive the School Land Board of the power to execute leases for the development of oil, gas, and other minerals on state-owned real property adjoining a turnpike project or in tidewater limits. The leases may provide for directional drilling from the adjoining property or tidewater area.

(e) This section does not affect the obligation of the authority under other state law to compensate the state for acquiring or using property owned by or on behalf of the state. An authority's use of property owned by or on behalf of the state is subject to any covenants, conditions, restrictions, or limitations affecting that property.

Added by Acts 1997, 75th Leg., ch. 1171, Sec. 7.24, eff. Sept. 1, 1997.

Acts 2005, 79th Leg., Ch. 281 (H.B. [2702](#)), Sec. 2.60, eff. June 14, 2005.

Sec. 366.170. COMPENSATION FOR AND RESTORATION OF PUBLIC PROPERTY. (a) Except as provided by Section 366.035 or Section 366.165(c), an authority may not pay compensation for public real

property, parkways, streets, highways, alleys, or reservations it takes, except for:

(1) parks and playgrounds;

(2) property owned by or on behalf of the state that under state law requires compensation to the state for the use or acquisition of the property; or

(3) as provided by this chapter.

(b) Public property damaged in the exercise of powers granted by this chapter shall be restored or repaired and placed in its original condition as nearly as practicable.

(c) An authority has full easements and rights-of-way through, across, under, and over any property owned by the state or any local governmental entity that are necessary or convenient to construct, acquire, or efficiently operate a turnpike project or system under this chapter. This subsection does not affect the obligation of the authority under other state law, including Section 373.102, to compensate or reimburse the state for the use or acquisition of an easement or right-of-way on property owned by or on behalf of the state. An authority's use of property owned by or on behalf of the state is subject to any covenants, conditions, restrictions, or limitations affecting that property.

Amended by:

Acts 2011, 82nd Leg., R.S., Ch. 1196 (S.B. 19), Sec. 7, eff. June 17, 2011.

Sec. 366.171. PUBLIC UTILITY FACILITIES. (a) An authority may adopt rules for the installation, construction, operation, maintenance, repair, renewal, relocation, and removal of a public utility facility in, on, along, over, or under a turnpike project.

(b) If an authority determines it is necessary that a public utility facility located in, on, along, over, or under a turnpike project be relocated in the turnpike project, removed from the turnpike project, or carried along or across the turnpike project by grade separation, the owner or operator of the utility facility shall relocate or remove the facility in accordance with the requirements of the authority and in a manner that does not impede the design,

financing, construction, operation, or maintenance of the turnpike project. The authority, as a part of the cost of the turnpike project or the cost of operating the turnpike project, shall pay the cost of the relocation, removal, or grade separation, including the cost of:

- (1) installation of the facility in a new location;
- (2) damages incurred by the utility to its facilities and services;
- (3) interests in real property and other rights acquired to accomplish the relocation or removal; and
- (4) maintenance of grade separation structures.

(c) The authority may reduce the total costs to be paid by the authority under Subsection (b) by 10 percent for each 30-day period or portion of a 30-day period by which the relocation exceeds the limit specified by the authority. If an owner or operator of a public utility facility does not timely remove or relocate as required under Subsection (b), the authority may do so at the expense of the public utility. If the authority determines that a delay in relocation is the result of circumstances beyond the control of the utility, full costs shall be paid by the authority.

(d) Subchapter C, Chapter 181, Utilities Code, applies to the erection, construction, maintenance, and operation of lines and poles owned by an electric utility, as that term is defined by Section 181.041, Utilities Code, over, under, across, on, and along a turnpike project or system constructed by an authority. An authority has the powers and duties delegated to the commissioners court by that subchapter, and an authority has exclusive jurisdiction and control of utilities located in its rights-of-way.

(e) Subchapter B, Chapter 181, Utilities Code, applies to the laying and maintenance of facilities used for conducting gas by a gas utility, as that term is defined by Section 181.021, Utilities Code, through, under, along, across, and over a turnpike project or system constructed by an authority except as otherwise provided by this section. An authority has the power and duties delegated to the commissioners court by that subchapter and an authority has exclusive jurisdiction and control of utilities located in its right-of-way.

(f) The laws of this state applicable to the use of public roads, streets, and waters by a telephone and telegraph corporation apply to the erection, construction, maintenance, location, and operation of a line, pole, or other fixture by a telephone and

telegraph corporation over, under, across, on, and along a turnpike project or system constructed by an authority under this chapter.

(g) In this section "public utility facility" means a track, pipe, main, conduit, cable, wire, tower, pole, or other item of plant or equipment or an appliance of a public utility or other person.

Added by Acts 1997, 75th Leg., ch. 1171, Sec. 7.24, eff. Sept. 1, 1997. Amended by Acts 1999, 76th Leg., ch. 62, Sec. 18.51, eff. Sept. 1, 1999.

Sec. 366.172. LEASE, SALE, OR CONVEYANCE OF TURNPIKE PROJECT.

(a) An authority may lease, sell, or convey in another manner a turnpike project to the department, a county, or a local government corporation created under Chapter 431 only with the approval of the governing body of the entity to which the project is transferred.

(b) An agreement to lease, sell, or convey a turnpike project under this section must provide for the discharge and final payment or redemption of the authority's outstanding bonded indebtedness for the turnpike project and must not be prohibited under the bond proceedings applicable to the system, if any, of which the turnpike project is a part.

Added by Acts 1997, 75th Leg., ch. 1171, Sec. 7.24, eff. Sept. 1, 1997.

Sec. 366.173. REVENUE. (a) An authority may:

(1) impose tolls for the use of each of its turnpike projects and systems and the different parts or sections of each of its turnpike projects and systems; and

(2) contract with a person for the use of part of a turnpike project or system or lease or sell part of a turnpike project or system, including the right-of-way adjoining the paved portion, for any purpose, including placing on the adjoining right-of-way a gas station, garage, store, hotel, restaurant, parking facility, railroad track, billboard, livestock pasturage, telephone line or facility, telecommunication line or facility, data transmission line or facility, and electric line or facility, under terms set by the authority.

(b) Tolls must be set so that the aggregate of tolls from an

authority's turnpike project or system, together with other revenue of the turnpike project or system:

(1) provides revenue sufficient to pay:

(A) the cost of maintaining, repairing, and operating the turnpike project or system; and

(B) the principal of and interest on the bonds issued for the turnpike project or system as those bonds become due and payable; and

(2) creates reserves for a purpose listed under Subdivision (1).

(c) Tolls are not subject to supervision or regulation by any state agency or other local governmental entity.

(d) Tolls and other revenue derived from a turnpike project or system for which bonds are issued, except the part necessary to pay the cost of maintenance, repair, and operation and to provide reserves for those costs as may be provided in the bond proceedings, shall be set aside at regular intervals as may be provided in the bond resolution or trust agreement in a sinking fund that is pledged to and charged with the payment of:

(1) interest on the bonds as it becomes due;

(2) principal of the bonds as it becomes due;

(3) necessary charges of paying agents for paying principal and interest; and

(4) the redemption price or the purchase price of bonds retired by call or purchase as provided by the bond proceedings.

(e) Use and disposition of money to the credit of the sinking fund is subject to the bond proceedings.

(f) To the extent permitted under the applicable bond proceedings, revenue from one turnpike project of an authority may be used to pay the cost of other turnpike projects of the authority.

(g) An authority may not use revenue from its turnpike projects in a manner not authorized by this chapter. Revenue generated from a turnpike project may not be applied for a purpose or to pay a cost other than a cost or purpose that is reasonably related to or anticipated to be for the benefit of a turnpike project.

Added by Acts 1997, 75th Leg., ch. 1171, Sec. 7.24, eff. Sept. 1, 1997.

Sec. 366.174. AUTHORITY REVOLVING FUND. (a) An authority may maintain a revolving fund to be held in trust by a banking institution chosen by the authority separate from any other funds and administered by the authority's board.

(b) An authority may transfer into its revolving fund money from any permissible source, including:

(1) money from a turnpike project if the transfer does not diminish the money available for the project or the system, if any, of which it is a part to less than an amount required to be retained by the bond proceedings pertaining to the project or system;

(2) money received by the authority from any source and not otherwise committed, including money from the transfer of a turnpike project or system or sale of authority assets;

(3) money received from the state highway fund; and

(4) contributions, loans, grants, or assistance from the United States, another state, a political subdivision of this state, a foreign governmental entity, including the United Mexican States or a state of the United Mexican States, a local governmental entity, any private enterprise, or any person.

(c) The authority may use money in the revolving fund to:

(1) finance the acquisition, construction, maintenance, or operation of a turnpike project or system, including the extension, expansion, or improvement of a project or system;

(2) provide matching money required in connection with any federal, state, local, or private aid, grant, or other funding, including aid or funding by or with public-private partnerships;

(3) provide credit enhancement either directly or indirectly for bonds issued to acquire, construct, extend, expand, or improve a turnpike project or system;

(4) provide security for or payment of future or existing debt for the design, acquisition, construction, operation, maintenance, extension, expansion, or improvement of a turnpike project or system;

(5) borrow money and issue promissory notes or other indebtedness payable out of the revolving fund for any purpose authorized by this chapter; and

(6) provide for any other reasonable purpose that assists in the financing of an authority as authorized by this chapter.

(d) Money spent or advanced from the revolving fund for a turnpike project or system must be reimbursed from the money of that

turnpike project or system, and there must be a reasonable expectation of such repayment at the time of authorization.

Added by Acts 1997, 75th Leg., ch. 1171, Sec. 7.24, eff. Sept. 1, 1997. Amended by Acts 2001, 77th Leg., ch. 1237, Sec. 5, eff. Nov. 6, 2001.

Sec. 366.175. USE OF SURPLUS REVENUE. The board of an authority may by resolution authorize the use of surplus revenue of a turnpike project or system to pay the costs of another turnpike project or system other than a project financed under Subchapter G. The board may in the resolution prescribe terms for the use of the revenue, including the pledge of the revenue, but may not take an action under this section that violates, impairs, or is inconsistent with a bond resolution, trust agreement, or indenture governing the use of the surplus revenue.

Added by Acts 1997, 75th Leg., ch. 1171, Sec. 7.24, eff. Sept. 1, 1997.

Sec. 366.176. EXEMPTION FROM TAXATION OR ASSESSMENT. (a) An authority is exempt from taxation of or assessments on:

- (1) a turnpike project or system;
- (2) property the authority acquires or uses under this chapter; or
- (3) income from property described by Subdivision (1) or (2).

(b) An authority is exempt from payment of development fees, utility connection fees, assessments, and service fees imposed or assessed by a county, municipality, road and utility district, river authority, any other state or local governmental entity, or any property owners' or homeowners' association.

Added by Acts 1997, 75th Leg., ch. 1171, Sec. 7.24, eff. Sept. 1, 1997.

Sec. 366.177. ACTIONS AFFECTING EXISTING ROADS. (a) An authority may impose a toll for transit over an existing free road,

street, or public highway transferred to the authority under this chapter.

(b) An authority may construct a grade separation at an intersection of a turnpike project with a railroad or highway and change the line or grade of a highway to accommodate the design of the grade separation. The action may not affect a segment of the state highway system without the department's consent. The authority shall pay the cost of a grade separation and any damage incurred in changing a line or grade of a railroad or highway as part of the cost of the turnpike project.

(c) If feasible, an authority shall provide access to properties previously abutting a county or other public road that is taken for a turnpike project and shall pay abutting property owners the expenses or any resulting damages for a denial of access to the road.

Added by Acts 1997, 75th Leg., ch. 1171, Sec. 7.24, eff. Sept. 1, 1997.

Sec. 366.178. FAILURE OR REFUSAL TO PAY TOLL. (a) A motor vehicle other than an authorized emergency vehicle, as defined by Section 541.201, that passes through a toll assessment facility, whether driven or towed, shall pay the proper toll. The exemption from payment of a toll for an authorized emergency vehicle applies regardless of whether the vehicle is:

- (1) responding to an emergency;
- (2) displaying a flashing light; or
- (3) marked as a police or emergency vehicle.

(b) A person who fails or refuses to pay a toll provided for the use of a project is liable for a fine not to exceed \$250, plus any administrative fees incurred in connection with the violation.

(b-1) As an alternative to requiring payment of a toll at the time a vehicle is driven or towed through a toll assessment facility, the authority shall use video recordings, photography, electronic data, transponders, or other tolling methods to permit the registered owner of the nonpaying vehicle to pay the toll at a later date or provide toll exemptions. Information collected under this subsection, including contact, payment, and other account information and trip data, is confidential and not subject to disclosure under

Chapter 552, Government Code.

(b-2) If the authority does not collect the proper toll at the time a vehicle is driven or towed through a toll assessment facility, the authority shall send an invoice by first class mail to the registered owner of the vehicle. The invoice may include one or more tolls assessed by the authority for use of the project by the nonpaying vehicle and must specify the date by which the toll or tolls must be paid. Except as provided by Subsection (b-3), the registered owner shall pay the unpaid tolls included in the invoice not later than the 25th day after the date the invoice is mailed.

(b-3) If the address to which the invoice issued under Subsection (b-2) is mailed to the registered owner is determined to be incorrect, the registered owner shall pay the invoice not later than the 25th day after the date the invoice is mailed to the correct address.

(b-4) If the registered owner of the nonpaying vehicle fails to pay the unpaid tolls included in the invoice mailed under Subsection (b-2) or (b-3) by the date specified in the invoice, the authority shall send the first notice of nonpayment by first class mail to the registered owner of the nonpaying vehicle as provided by Subsection (d).

(c) On issuance of the first notice of nonpayment, the registered owner of the nonpaying vehicle shall pay both the unpaid tolls included in the invoice and an administrative fee. The authority may charge only one administrative fee of not more than \$25 for the first notice of nonpayment that is sent to the registered owner of the nonpaying vehicle.

(d) Unless an authority requires additional time to send a notice of nonpayment because of events outside the authority's reasonable control, the authority shall send the first notice of nonpayment not later than the 30th day after the date the 25-day period expires for the registered owner to pay the invoice issued under Subsection (b-2) or (b-3). If an authority requires additional time as provided by this subsection, the authority must send the notice not later than the 60th day after the date the 25-day period expires for the registered owner to pay the invoice issued under Subsection (b-2) or (b-3). The first notice of nonpayment shall require payment of the unpaid tolls included in the invoice and the administrative fee before the 25th day after the date the first notice of nonpayment is mailed.

(d-1) If the registered owner of the nonpaying vehicle fails to pay the unpaid tolls and the administrative fee by the date specified in the first notice of nonpayment, the authority shall send a second notice of nonpayment by first class mail to the registered owner of the nonpaying vehicle. The second notice of nonpayment must specify the date by which payment must be made and may require payment of:

(1) the unpaid tolls and administrative fee included in the first notice of nonpayment; and

(2) an additional administrative fee of not more than \$25 for each unpaid toll included in the notice, not to exceed a total of \$200.

(d-2) If the registered owner of the nonpaying vehicle fails to pay the amount included in the second notice of nonpayment by the date specified in that notice, the authority shall send a third notice of nonpayment by first class mail to the registered owner of the nonpaying vehicle. The third notice of nonpayment must specify the date by which payment must be made and may require payment of:

(1) the amount included in the second notice of nonpayment; and

(2) any third-party collection service fees incurred by the authority.

(e) If the registered owner of the vehicle fails to pay the amount included in the third notice of nonpayment by the date specified in the notice, the owner may be cited as for other traffic violations as provided by law, and the owner shall pay a fine of not more than \$250 for each nonpayment of a toll.

(f) Except as provided by Subsection (f-1), in the prosecution of a violation for nonpayment, proof that the vehicle passed through a toll assessment facility and that the amount included in the third notice of nonpayment was not paid before the date specified in the notice, together with proof that the defendant was the registered owner or the driver of the vehicle when the unpaid toll was assessed, establishes the nonpayment of the registered owner. The proof may be by testimony of a peace officer or authority employee, video surveillance, or any other reasonable evidence, including a copy of the rental, lease, or other contract document or the electronic data provided to the authority under Subsection (i) that shows the defendant was the lessee of the vehicle when the unpaid toll was assessed.

(f-1) Nonpayment by the registered owner of the vehicle may be

established by:

(1) a copy of a written agreement between the authority and the registered owner for the payment of unpaid tolls and administrative fees; and

(2) evidence that the registered owner is in default under the agreement.

(g) The court of the local jurisdiction in which the unpaid toll was assessed may assess and collect the fine in addition to any court costs. The court may collect and forward to the authority properly assessed unpaid tolls, administrative fees, and third-party collection service fees incurred by the authority as determined by:

(1) the court after a hearing; or

(2) written agreement of the registered owner.

(h) It is a defense to nonpayment under this section that the motor vehicle in question was stolen before the failure to pay the proper toll occurred and was not recovered by the time of the failure to pay, but only if the theft was reported to the appropriate law enforcement authority before the earlier of:

(1) the occurrence of the failure to pay; or

(2) eight hours after the discovery of the theft.

(i) A registered owner who is the lessor of a vehicle for which an invoice is mailed under Subsection (b-2) or (b-3) is not liable if, not later than the 30th day after the date the invoice is mailed, the registered owner provides to the authority:

(1) a copy of the rental, lease, or other contract document covering the vehicle on the date the unpaid toll was assessed, with the name and address of the lessee clearly legible; or

(2) electronic data, other than a photocopy or scan of a rental or lease contract, that contains the information required under Sections 521.460(c)(1), (2), and (3) covering the vehicle on the date the unpaid toll was assessed under this section.

(i-1) If the lessor timely provides the required information under Subsection (i), the lessee of the vehicle on the date the unpaid toll was assessed is considered to be the registered owner of the vehicle for purposes of this section, and the authority shall follow the procedures provided by this section as if the lessee were the registered owner of the vehicle, including sending an invoice to the lessee by first-class mail not later than the 30th day after the date of the receipt of the information from the lessor.

(j) In addition to the other powers and duties provided by this

chapter, an authority has the same powers and duties as the department under Chapter 228, a county under Chapter 284, and a regional mobility authority under Chapter 370, regarding the authority's toll collection and enforcement powers for:

- (1) the authority's turnpike projects; and
- (2) other toll projects developed, financed, constructed, or operated under an agreement, including a comprehensive development agreement, with the authority.

(k) As authorized under Section 322.008(d)(2), Business & Commerce Code, an authority may provide information, including an invoice or notice, required under this section to be sent first class mail instead as an electronic record:

- (1) if the recipient of the information agrees to the transmission of the information as an electronic record; and
- (2) on terms acceptable to the recipient.

A transponder is insufficiently funded if there is no money in the account for which the transponder was issued.

- (b) Any law enforcement or peace officer of an entity with

which an authority has contracted under Section 366.182(c) may seize a stolen or insufficiently funded transponder and return it to the authority that issued the transponder. An insufficiently funded transponder may not be seized before the 30th day after the date that an authority has sent a notice of delinquency to the holder of the account.

(1) the authority;

(2) an entity to which a project authorized by this chapter is transferred; or

(d-1) The rules adopted under Subsection (d) may not materially conflict with the design-build procedures provided by Subchapter H, Chapter 2269, Government Code, and shall provide materially similar injunctive and declaratory action enforcement rights regarding the improper disclosure or use of unique or nonordinary information as provided in that subchapter.

(d-2) Notwithstanding Subsection (d-1), if the contract amount exceeds \$50 million, the rules adopted under Subsection (d) may provide for a stipend to be offered to an unsuccessful design-build firm that submits a response to the authority's request for additional information, in an amount that:

A construction manager-at-risk shall be selected on the basis of criteria established by the authority, which may include the construction manager-at-risk's experience, past performance, safety record, proposed personnel and methodology, proposed fees, and other appropriate factors that demonstrate the construction manager-at-risk's ability to provide the best value to the authority and to deliver the required services in accordance with the authority's specifications.

SUBCHAPTER H. COMPREHENSIVE DEVELOPMENT AGREEMENTS

Sec. 366.401. COMPREHENSIVE DEVELOPMENT AGREEMENTS. (a) An authority may use a comprehensive development agreement with a private entity to design, develop, finance, construct, maintain, repair, operate, extend, or expand a turnpike project.

(b) A comprehensive development agreement is an agreement with a private entity that, at a minimum, provides for the design, construction, rehabilitation, expansion, or improvement of a turnpike project and may also provide for the financing, acquisition, maintenance, or operation of a turnpike project.

(c) An authority may negotiate provisions relating to professional and consulting services provided in connection with a comprehensive development agreement.

(d) An authority may authorize the investment of public and private money, including debt and equity participation, to finance a function described by this section.

Added by Acts 2007, 80th Leg., R.S., Ch. 264 (S.B. 792), Sec. 9.03, eff. June 11, 2007.

Sec. 366.402. PROCESS FOR ENTERING INTO COMPREHENSIVE DEVELOPMENT AGREEMENTS. (a) If an authority enters into a comprehensive development agreement, the authority shall use a competitive procurement process that provides the best value for the authority. An authority may accept unsolicited proposals for a proposed turnpike project or solicit proposals in accordance with this section.

(b) An authority shall establish rules and procedures for accepting unsolicited proposals that require the private entity to include in the proposal:

(1) information regarding the proposed project location, scope, and limits;

(2) information regarding the private entity's qualifications, experience, technical competence, and capability to develop the project; and

(3) any other information the authority considers relevant or necessary.

(c) An authority shall publish a notice advertising a request for competing proposals and qualifications in the Texas Register that

includes the criteria to be used to evaluate the proposals, the relative weight given to the criteria, and a deadline by which proposals must be received if:

(1) the authority decides to issue a request for qualifications for a proposed project; or

(2) the authority authorizes the further evaluation of an unsolicited proposal.

(d) A proposal submitted in response to a request published under Subsection (c) must contain, at a minimum, the information required by Subsections (b)(2) and (3).

(e) An authority may interview a private entity submitting an unsolicited proposal or responding to a request under Subsection (c). The authority shall evaluate each proposal based on the criteria described in the request for competing proposals and qualifications and may qualify or shortlist private entities to submit detailed proposals under Subsection (f). The authority must qualify or shortlist at least two private entities to submit detailed proposals for a project under Subsection (f) unless the authority does not receive more than one proposal or one response to a request under Subsection (c).

(f) An authority shall issue a request for detailed proposals from all private entities qualified or shortlisted under Subsection (e) if the authority proceeds with the further evaluation of a proposed project. A request under this subsection may require additional information the authority considers relevant or necessary, including information relating to:

(1) the private entity's qualifications and demonstrated technical competence;

(2) the feasibility of developing the project as proposed;

(3) engineering or architectural designs;

(4) the private entity's ability to meet schedules; or

(5) a financial plan, including costing methodology and cost proposals.

(g) In issuing a request for proposals under Subsection (f), an authority may solicit input from entities qualified under Subsection (e) or any other person. An authority may also solicit input regarding alternative technical concepts after issuing a request under Subsection (f).

(h) An authority shall evaluate each proposal based on the criteria described in the request for detailed proposals and select

the private entity whose proposal offers the apparent best value to the authority.

(i) An authority may enter into negotiations with the private entity whose proposal offers the apparent best value.

(j) If at any point in negotiations under Subsection (i), it appears to the authority that the highest ranking proposal will not provide the authority with the overall best value, the authority may enter into negotiations with the private entity submitting the next-highest-ranking proposal.

(k) An authority may withdraw a request for competing proposals and qualifications or a request for detailed proposals at any time. The authority may then publish a new request for competing proposals and qualifications.

(l) An authority may require that an unsolicited proposal be accompanied by a nonrefundable fee sufficient to cover all or part of its cost to review the proposal.

(m) An authority may pay an unsuccessful private entity that submits a responsive proposal in response to a request for detailed proposals under Subsection (f) a stipulated amount in exchange for the work product contained in that proposal. A stipulated amount must be stated in the request for proposals and may not exceed the value of any work product contained in the proposal that can, as determined by the authority, be used by the authority in the performance of its functions. The use by the authority of any design element contained in an unsuccessful proposal is at the sole risk and discretion of the authority and does not confer liability on the recipient of the stipulated amount under this subsection. After payment of the stipulated amount:

(1) the authority, with the unsuccessful private entity, jointly owns the rights to, and may make use of any work product contained in, the proposal, including the technologies, techniques, methods, processes, ideas, and information contained in the project design; and

(2) the use by the unsuccessful private entity of any portion of the work product contained in the proposal is at the sole risk of the unsuccessful private entity and does not confer liability on the authority.

(n) An authority may prescribe the general form of a comprehensive development agreement and may include any matter the authority considers advantageous to the authority. The authority and

the private entity shall finalize the specific terms of a comprehensive development agreement.

(o) Section 366.185 and Subchapter A, Chapter 223, of this code and Chapter 2254, Government Code, do not apply to a comprehensive development agreement entered into under this subchapter.

Added by Acts 2007, 80th Leg., R.S., Ch. 264 (S.B. 792), Sec. 9.03, eff. June 11, 2007.

Sec. 366.403. CONFIDENTIALITY OF INFORMATION. (a) To encourage private entities to submit proposals under this subchapter, the following information is confidential, is not subject to disclosure, inspection, or copying under Chapter 552, Government Code, and is not subject to disclosure, discovery, subpoena, or other means of legal compulsion for its release until a final contract for a proposed project is entered into:

(1) all or part of a proposal that is submitted by a private entity for a comprehensive development agreement, except information provided under Sections 366.402(b)(1) and (2), unless the private entity consents to the disclosure of the information;

(2) supplemental information or material submitted by a private entity in connection with a proposal for a comprehensive development agreement unless the private entity consents to the disclosure of the information or material; and

(3) information created or collected by an authority or its agent during consideration of a proposal for a comprehensive development agreement or during the authority's preparation of a proposal to the department relating to a comprehensive development agreement.

(b) After an authority completes its final ranking of proposals under Section 366.402(h), the final rankings of each proposal under each of the published criteria are not confidential.

Added by Acts 2007, 80th Leg., R.S., Ch. 264 (S.B. 792), Sec. 9.03, eff. June 11, 2007.

into a comprehensive development agreement under this subchapter to provide a performance and payment bond or an alternative form of security in an amount sufficient to:

- (1) ensure the proper performance of the agreement; and
- (2) protect:

- (A) the authority; and

- (B) payment bond beneficiaries who have a direct contractual relationship with the private entity or a subcontractor of the private entity to supply labor or material.

(b) A performance and payment bond or alternative form of security shall be in an amount equal to the cost of constructing or maintaining the project.

(c) If an authority determines that it is impracticable for a private entity to provide security in the amount described by Subsection (b), the authority shall set the amount of the bonds or the alternative forms of security.

(d) A payment or performance bond or alternative form of security is not required for the portion of an agreement that includes only design or planning services, the performance of preliminary studies, or the acquisition of real property.

(e) The amount of the payment security must not be less than the amount of the performance security.

(f) In addition to, or instead of, performance and payment bonds, an authority may require the following alternative forms of security:

- (1) a cashier's check drawn on a financial entity specified by the authority;

- (2) a United States bond or note;

- (3) an irrevocable bank letter of credit; or

- (4) any other form of security determined suitable by the authority.

(g) An authority by rule shall prescribe requirements for alternative forms of security provided under this section.

Sec. 366.405. OWNERSHIP OF TURNPIKE PROJECTS. (a) A turnpike project that is the subject of a comprehensive development agreement

with a private entity, including the facilities acquired or constructed on the project, is public property and is owned by the authority.

(b) Notwithstanding Subsection (a), an authority may enter into an agreement that provides for the lease of rights-of-way, the granting of easements, the issuance of franchises, licenses, or permits, or any lawful uses to enable a private entity to construct, operate, and maintain a turnpike project, including supplemental facilities. At the termination of the agreement, the turnpike project, including the facilities, are to be in a state of proper maintenance as determined by the authority and shall be returned to the authority in satisfactory condition at no further cost.

Added by Acts 2007, 80th Leg., R.S., Ch. 264 (S.B. 792), Sec. 9.03, eff. June 11, 2007.

Sec. 366.406. LIABILITY FOR PRIVATE OBLIGATIONS. An authority may not incur a financial obligation for a private entity that designs, develops, finances, constructs, operates, or maintains a turnpike project. The authority or a political subdivision of the state is not liable for any financial or other obligation of a turnpike project solely because a private entity constructs, finances, or operates any part of the project.

Added by Acts 2007, 80th Leg., R.S., Ch. 264 (S.B. 792), Sec. 9.03, eff. June 11, 2007.

Sec. 366.407. TERMS OF PRIVATE PARTICIPATION. (a) An authority shall negotiate the terms of private participation in a turnpike project under this subchapter, including:

(1) methods to determine the applicable cost, profit, and project distribution among the private participants and the authority;

(2) reasonable methods to determine and classify toll rates and the responsibility for setting toll rates;

(3) acceptable safety and policing standards; and

(4) other applicable professional, consulting, construction, operation, and maintenance standards, expenses, and costs.

(b) A comprehensive development agreement entered into under this subchapter may include any provision the authority considers appropriate, including a provision:

(1) providing for the purchase by the authority, under terms and conditions agreed to by the parties, of the interest of a private participant in the comprehensive development agreement and related property, including any interest in a turnpike project designed, developed, financed, constructed, operated, or maintained under the comprehensive development agreement;

(2) establishing the purchase price, as determined in accordance with the methodology established by the parties in the comprehensive development agreement, for the interest of a private participant in the comprehensive development agreement and related property;

(3) providing for the payment of an obligation incurred under the comprehensive development agreement, including an obligation to pay the purchase price for the interest of a private participant in the comprehensive development agreement, from any available source, including securing the obligation by a pledge of revenues of the authority derived from the applicable project, which pledge shall have priority as established by the authority;

(4) permitting the private participant to pledge its rights under the comprehensive development agreement;

(5) concerning the private participant's right to operate and collect revenue from the turnpike project; and

(6) restricting the right of the authority to terminate the private participant's right to operate and collect revenue from the turnpike project unless and until any applicable termination payments have been made.

(c) An authority may enter into a comprehensive development agreement under this subchapter with a private participant only if the project is identified in the department's unified transportation program or is located on a transportation corridor identified in the statewide transportation plan.

(d) Section 366.406 does not apply to an obligation of an authority under a comprehensive development agreement, nor is an authority otherwise constrained from issuing bonds or other financial obligations for a turnpike project payable solely from revenues of that turnpike project or from amounts received under a comprehensive development agreement.

(e) Notwithstanding any other law, and subject to compliance with the dispute resolution procedures set out in the comprehensive development agreement, an obligation of an authority under a comprehensive development agreement entered into under this subchapter to make or secure payments to a person because of the termination of the agreement, including the purchase of the interest of a private participant or other investor in a project, may be enforced by mandamus against the authority in a district court of any county of the authority, and the sovereign immunity of the authority is waived for that purpose. The district courts of any county of the authority shall have exclusive jurisdiction and venue over and to determine and adjudicate all issues necessary to adjudicate any action brought under this subsection. The remedy provided by this subsection is in addition to any legal and equitable remedies that may be available to a party to a comprehensive development agreement.

(f) If an authority enters into a comprehensive development agreement with a private participant that includes the collection by the private participant of tolls for the use of a toll project, the private participant shall submit to the authority for approval:

(1) the methodology for:

- (A) the setting of tolls; and
- (B) increasing the amount of the tolls;

(2) a plan outlining methods the private participant will use to collect the tolls, including:

(A) any charge to be imposed as a penalty for late payment of a toll; and

(B) any charge to be imposed to recover the cost of collecting a delinquent toll; and

(3) any proposed change in an approved methodology for the setting of a toll or a plan for collecting the toll.

(g) Except as provided by this subsection, a comprehensive development agreement with a private participant that includes the collection by the private participant of tolls for the use of a toll project may be for a term not longer than 50 years from the later of the date of final acceptance of the project or the start of revenue operations by the private participant, not to exceed a total term of 52 years. The contract must contain an explicit mechanism for setting the price for the purchase by the authority of the interest of the private participant in the contract and related property, including any interest in a highway or other facility designed,

developed, financed, constructed, operated, or maintained under the contract.

The rules must contain criteria relating to the qualifications of the participants and the award of the contracts.

(b) An authority shall have up-to-date procedures for participation in negotiations under this subchapter.

(c) An authority has exclusive judgment to determine the terms of an agreement.

Added by Acts 2007, 80th Leg., R.S., Ch. 264 (S.B. 792), Sec. 9.03, eff. June 11, 2007.

Sec. 366.409. USE OF CONTRACT PAYMENTS. (a) Payments received by an authority under a comprehensive development agreement shall be used by the authority to finance the construction, maintenance, or operation of a turnpike project or a highway.

(b) The authority shall allocate the distribution of funds received under Subsection (a) to the counties of the authority based on the percentage of toll revenue from users, from each county, of the project that is the subject of the comprehensive development agreement. To assist the authority in determining the allocation, each entity responsible for collecting tolls for a project shall calculate on an annual basis the percentage of toll revenue from users of the project from each county within the authority based on the number of recorded electronic toll collections.

Sec. 370.034. ESTABLISHMENT OF TRANSPORTATION SYSTEMS. An authority may create more than one system and may combine two or more systems into one system. An authority may finance, acquire, construct, and operate additional transportation projects as additions to or expansions of a system if the authority determines that the transportation project could most efficiently and economically be acquired or constructed if it were a part of the system and that the addition will benefit the system.

(b) The revenue of a system shall be accounted for separately and may not be commingled with the revenue of a transportation project that is not a part of the system or with the revenue of another system.

- (3) does not cause a rating agency maintaining a rating on

outstanding obligations of the commission to lower the existing rating.

(c) If the commission agrees to the transfer under Subsection (a), the authority shall convey the turnpike project and any real property acquired to construct or operate the turnpike project to the department.

(d) At the time of a conveyance under this section, the commission shall designate the turnpike project as part of the state highway system. After the designation, the authority has no liability, responsibility, or duty to maintain or operate the transferred turnpike project.

(2) the authority:

(A) agrees to the transfer; and

(B) agrees to assume all liability and responsibility for the maintenance and operation of the ferry on its transfer.

(b) An authority shall reimburse the commission for the cost of a transferred ferry unless the commission determines that the transfer will result in a substantial net benefit to the state, the department, and the traveling public that equals or exceeds that cost.

(1) include the total amount spent by the department for the original construction of the ferry, including the costs associated with the preliminary engineering and design engineering for plans, specifications, and estimates, the acquisition of necessary rights-of-way, and actual construction of the ferry and all necessary appurtenant facilities; and

(2) consider the anticipated future costs of expanding, improving, maintaining, or operating the ferry to be incurred by the

authority and not by the department if the ferry is transferred.

(d) The commission shall, at the time the ferry is transferred, remove the ferry from the state highway system. After a transfer, the commission has no liability, responsibility, or duty for the maintenance or operation of the ferry.

(e) Before transferring a ferry that is a part of the state highway system under this section, the commission shall conduct a public hearing at which interested persons shall be allowed to speak on the proposed transfer. Notice of the hearing must be published in the Texas Register, one or more newspapers of general circulation in the counties in which the ferry is located, and a newspaper, if any, published in the counties of the applicable authority.

(f) The commission shall adopt rules to implement this section. The rules must include criteria and guidelines for the approval of a transfer of a ferry.

(g) An authority shall adopt rules establishing criteria and guidelines for approval of the transfer of a ferry under this section.

(h) An authority may permanently charge a toll for use of a ferry transferred under this section. An authority may permanently charge a fee or toll for priority use of ferry facilities under Section 370.193.

(b) As determined in the bond resolution, the bonds of each issue shall:

(1) be dated;

(2) bear interest at the rate or rates provided by the bond resolution and beginning on the dates provided by the bond resolution and as authorized by law, or bear no interest;

(4) be made redeemable before maturity at the price or prices and under the terms provided by the bond resolution.

(c) An authority may sell the bonds at public or private sale in the manner and for the price it determines to be in the best interest of the authority.

(d) The proceeds of each bond issue shall be disbursed in the manner and under any restrictions provided in the bond resolution.

(e) Additional bonds may be issued in the same manner to pay the costs of a transportation project. Unless otherwise provided in the bond resolution, the additional bonds shall be on a parity, without preference or priority, with bonds previously issued and payable from the revenue of the transportation project. In addition, an authority may issue bonds for a transportation project secured by a lien on the revenue of the transportation project subordinate to

the lien on the revenue securing other bonds issued for the transportation project.

(f) If the proceeds of a bond issue exceed the cost of the transportation project for which the bonds were issued, the surplus shall be segregated from the other money of the authority and used only for the purposes specified in the bond resolution.

(g) Bonds issued and delivered under this chapter and interest coupons on the bonds are a security under Chapter 8, Business & Commerce Code.

(4) amounts received under a credit agreement relating to the transportation project for which the bonds are issued; and

(5) the proceeds of the sale of other bonds.

(b) Bonds issued under this chapter do not constitute a debt of this state or of a governmental entity, or a pledge of the faith and credit of this state or of a governmental entity. Each bond must contain on its face a statement to the effect that the state, the authority, or any governmental entity is not obligated to pay the bond or the interest on the bond from a source other than the amount pledged to pay the bond and the interest on the bond, and neither the faith and credit and taxing power of this state or of any governmental entity are pledged to the payment of the principal of or interest on the bond. (2) applies to each item on hand or subsequently received;

(e) In addition to all other rights by mandamus or other court proceeding, an owner or trustee of a bond issued under this chapter may enforce the owner's rights against an issuing authority, the authority's employees, the authority's board, or an agent or employee of the authority's board and is entitled to:

(1) require the authority or the board to impose and collect tolls, fares, fees, charges, and other revenue sufficient to carry out any agreement contained in the bond proceedings; and

Sec. 370.164. DECLARATION OF TAKING. (a) An authority may file a declaration of taking with the clerk of the court:

(1) in which the authority files a condemnation petition under Chapter 21, Property Code; or

(2) to which the case is assigned.

(b) An authority may file the declaration of taking concurrently with or subsequent to the filing of the condemnation petition but may not file the declaration after the special commissioners have made an award in the condemnation proceeding.

(c) An authority may not file a declaration of taking before the completion of all:

(1) environmental documentation, including a final environmental impact statement or a record of decision, that is required by federal or state law;

(2) public hearings and meetings, including those held in connection with the environmental rules adopted by the authority under Section 370.188, that are required by federal or state law; and

(3) notifications required by the rules adopted by the authority under Section 370.188.

(d) The declaration of taking must include:

(1) a specific reference to the legislative authority for the condemnation;

(2) a description and plot plan of the real property to be condemned, including the following information if applicable:

(B) the street address of the property; and

(C) the lot and block number of the property;

(e) A deposit to the registry of the court of an amount equal to the appraised value as determined by the authority of the property to be condemned must accompany the declaration of taking.

(f) The date on which the declaration is filed is the date of taking for the purpose of assessing damages to which a property owner is entitled.

Added by Acts 2003, 78th Leg., ch. 1325, Sec. 2.01, eff. June 21, 2003.

Sec. 370.165. POSSESSION OF PROPERTY. (a) Immediately on the filing of a declaration of taking, the authority shall serve a copy of the declaration on each person possessing an interest in the condemned property by a method prescribed by Section 21.016(d), Property Code. The authority shall file evidence of the service with

the clerk of the court. On filing of that evidence, the authority may take possession of the property pending the litigation.

(b) If the condemned property is a homestead or a portion of a homestead as defined by Section 41.002, Property Code, the authority may not take possession before the 91st day after the date of service under Subsection (a).

(b) A right to receive a participation payment under this section is subordinate to any right to receive a fee as payment on the principal of or interest on a bond that is issued for the construction of the applicable segment.

(c) In this section, "participation payment" means an intangible legal right to receive a percentage of one or more identified fees related to a segment constructed by the authority.

Added by Acts 2003, 78th Leg., ch. 1325, Sec. 2.01, eff. June 21, 2003.

Sec. 370.167. SEVERANCE OF REAL PROPERTY. (a) If a transportation project of an authority severs a property owner's real property, the authority shall pay:

(1) the value of the property acquired; and
(2) the damages, if any, to the remainder of the owner's property caused by the severance, including damages caused by the inaccessibility of one tract from the other.

(b) At its option, an authority may negotiate for and purchase the severed real property or any part of the severed real property if the authority and the property owner agree on terms for the purchase.

An authority may sell and dispose of severed real property that it determines is not necessary or useful to the authority. Severed property must be appraised before being offered for sale by the authority.

Added by Acts 2003, 78th Leg., ch. 1325, Sec. 2.01, eff. June 21, 2003.

Sec. 370.168. ACQUISITION OF RIGHTS IN PUBLIC REAL PROPERTY.

(a) An authority may use real property, including submerged land, streets, alleys, and easements, owned by this state or a local government that the authority considers necessary for the construction or operation of a transportation project.

(b) This state or a local government having charge of public real property may consent to the use of the property for a transportation project.

(c) Except as provided by Section 228.201, this state or a local government may convey, grant, or lease to an authority real property, including highways and other real property devoted to public use and rights or easements in real property, that may be necessary or convenient to accomplish a purpose of the authority, including the construction or operation of a transportation project. A conveyance, grant, or lease under this section may be made without advertising, court order, or other action other than the normal action of this state or local government necessary for a conveyance, grant, or lease.

(d) This section does not deprive the School Land Board of the power to execute a lease for the development of oil, gas, and other minerals on state-owned real property adjoining a transportation project or in tidewater limits. A lease may provide for directional drilling from the adjoining property or tidewater area.

(e) This section does not affect the obligation of the authority under another law to compensate this state for acquiring or using property owned by or on behalf of this state. An authority's use of property owned by or on behalf of this state is subject to any covenants, conditions, restrictions, or limitations affecting that property.

Sec. 370.169. COMPENSATION FOR AND RESTORATION OF PUBLIC PROPERTY. (a) Except as provided by Section 370.035, an authority may not pay compensation for public real property, parkways, streets, highways, alleys, or reservations it takes, other than:

- (1) a park, playground, or designated environmental preserve;
- (2) property owned by or on behalf of this state that under law requires compensation to this state for the use or acquisition of the property; or
- (3) as provided by this chapter.

(b) Public property damaged in the exercise of a power granted by this chapter shall be restored or repaired and placed in its original condition as nearly as practicable.

(c) An authority has full easements and rights-of-way through, across, under, and over any property owned by the state or any local government that are necessary or convenient to construct, acquire, or efficiently operate a transportation project or system under this chapter. This subsection does not affect the obligation of the authority under other law, including Section 373.102, to compensate or reimburse this state for the use or acquisition of an easement or right-of-way on property owned by or on behalf of this state. An authority's use of property owned by or on behalf of this state is subject to any covenants, conditions, restrictions, or limitations affecting that property.

Sec. 370.170. PUBLIC UTILITY FACILITIES. (a) An authority may adopt rules for the authority's approval of the installation, construction, relocation, and removal of a public utility facility

in, on, along, over, or under a transportation project.

(b) If the authority determines that a public utility facility located in, on, along, over, or under a transportation project must be relocated, the utility and the authority shall negotiate in good faith to establish reasonable terms and conditions concerning the responsibilities of the parties with regard to sharing of information about the project and the planning and implementation of any necessary relocation of the public utility facility.

(c) The authority shall use its best efforts to provide an affected utility with plans and drawings of the project that are sufficient to enable the utility to develop plans for, and determine the cost of, the necessary relocation of a public utility facility. If the authority and the affected utility enter into an agreement after negotiations under Subsection (b), the terms and conditions of the agreement govern the relocation of each public utility facility covered by the agreement.

(d) If the authority and an affected utility do not enter into an agreement under Subsection (b), the authority shall provide to the affected utility:

(1) written notice of the authority's determination that the public utility facility must be removed;

(2) a final plan for relocation of the public utility facility; and

(3) reasonable terms and conditions for an agreement with the utility for the relocation of the public utility facility.

(e) Not later than the 90th day after the date a utility receives the notice from the authority, including the plan and agreement terms and conditions under Subsection (d), the utility shall enter into an agreement with the authority that provides for the relocation.

(f) If the utility fails to enter into an agreement within the 90-day period under Subsection (e), the authority may relocate the public utility facility at the sole cost and expense of the utility less any reimbursement of costs that would have been payable to the utility under applicable law. A relocation by the authority under this subsection shall be conducted in full compliance with applicable law, using standard equipment and construction practices compatible with the utility's existing facilities, and in a manner that minimizes disruption of utility service.

(g) The 90-day period under Subsection (e) may be extended:

(1) by mutual agreement between the authority and the utility; or

(2) for any period of time during which the utility is negotiating in good faith with the authority to relocate its facility.

(h) Subject to Subsections (a)-(g), the authority, as a part of the cost of the transportation project or the cost of operating the transportation project, shall pay the cost of the relocation, removal, or grade separation of a public utility facility under Subsection (a).

(i) The authority may reduce the total costs to be paid by the authority under Subsection (h) by 10 percent for each 30-day period or portion of a 30-day period by which the relocation or removal exceeds the reasonable limit specified by agreement between the authority and the owner or operator of the public utility facility, unless the failure of the owner or operator of the facility to timely relocate or remove the facility results directly from:

(1) a material action or inaction of the authority;

(2) an inability of the public utility facility owner or operator to obtain necessary line clearances to perform the removal or relocation; or

(3) conditions beyond the reasonable control of the owner or operator of the facility, including:

(A) an act of God; or

(B) a labor shortage or strike.

(j) The owner or operator of a public utility facility relocated or removed under Subsection (f) shall reimburse the authority for the expenses the authority reasonably incurred for the relocation or removal of the facility, less any costs that would have been payable to the owner or operator under Subsection (h) had the owner or operator relocated or removed the facility, except that the owner or operator is not required to reimburse the authority if the failure of the owner or operator to timely relocate or remove the facility was the result of circumstances beyond the control of the owner or operator.

(k) Subchapter C, Chapter 181, Utilities Code, applies to the erection, construction, maintenance, and operation of a line or pole owned by an electric utility, as that term is defined by Section 181.041, Utilities Code, over, under, across, on, and along a transportation project or system constructed by an authority. An

authority has the powers and duties delegated to the commissioners court by that subchapter.

(1) Subchapter B, Chapter 181, Utilities Code, applies to the laying and maintenance of facilities used for conducting gas by a gas utility, as that term is defined by Section 181.021, Utilities Code, through, under, along, across, and over a transportation project or system constructed by an authority except as otherwise provided by this section. An authority has the powers and duties delegated to the commissioners court by that subchapter.

(m) The laws of this state applicable to the use of public roads, streets, and waters by a telephone or telegraph corporation apply to the erection, construction, maintenance, location, and operation of a line, pole, or other fixture by a telephone or telegraph corporation over, under, across, on, and along a transportation project constructed by an authority under this chapter.

Added by Acts 2003, 78th Leg., ch. 1325, Sec. 2.01, eff. June 21, 2003.

Sec. 370.171. LEASE, SALE, OR CONVEYANCE OF TRANSPORTATION PROJECT. An authority may lease, sell, or convey in any other manner a transportation project to a governmental entity with the approval of the governing body of the governmental entity to which the project is transferred.

Added by Acts 2003, 78th Leg., ch. 1325, Sec. 2.01, eff. June 21, 2003.

Sec. 370.172. REVENUE. (a) An authority may:

(1) impose tolls, fees, fares, or other charges for the use of each of its transportation projects and the different parts or sections of each of its transportation projects; and

(2) subject to Subsection (j), contract with a person for the use of part of a transportation project, or lease or sell part of a transportation project, including the right-of-way adjoining the portion used to transport people and property, for any purpose, including placing on the adjoining right-of-way a gas station, garage, store, hotel, restaurant, parking facility, railroad track,

billboard, livestock pasturage, telephone line or facility, telecommunication line or facility, data transmission line or facility, or electric line or facility, under terms set by the authority.

(b) Tolls, fees, fares, or other charges must be set at rates or amounts so that the aggregate of tolls, fees, fares, or other charges from an authority's transportation project, together with other revenue of the transportation project:

(1) provides revenue sufficient to pay:

(A) the cost of maintaining, repairing, and operating the transportation project;

(B) the principal of and interest on any bonds issued for the transportation project as those bonds become due and payable; and

(C) any other payment obligations of an authority under a contract or agreement authorized under this chapter; and

(2) creates reserves for a purpose listed under Subdivision (1).

(c) Any toll, fee, fare, or other charge imposed on an owner of a public utility facility under this section must be imposed in a manner that is competitively neutral and nondiscriminatory among similarly situated users of the transportation project.

(d) Tolls, fees, fares, or other usage charges are not subject to supervision or regulation by any agency of this state or another governmental entity.

(e) Revenue derived from tolls, fees, and fares, and other revenue derived from a transportation project for which bonds are issued, other than any part necessary to pay the cost of maintenance, repair, and operation and to provide reserves for those costs as provided in the bond proceedings, shall be set aside at regular intervals as provided in the bond resolution or trust agreement in a sinking fund that is pledged to and charged with the payment of:

(1) interest on the bonds as it becomes due;

(2) principal of the bonds as it becomes due;

(3) necessary charges of paying agents for paying principal and interest;

(4) the redemption price or the purchase price of bonds retired by call or purchase as provided in the bond proceedings; and

(5) any amounts due under credit agreements.

(f) Use and disposition of money deposited to the credit of the

sinking fund is subject to the bond proceedings.

(g) To the extent permitted under the applicable bond proceedings, revenue from one transportation project of an authority may be used to pay the cost of another transportation project of the authority.

(h) An authority may not use revenue from a transportation project in a manner not authorized by this chapter. Except as provided by this chapter, revenue derived from a transportation project may not be applied for a purpose or to pay a cost other than a cost or purpose that is reasonably related to or anticipated to be for the benefit of a transportation project.

(i) An authority may not require the owner of a public utility facility to pay a fee as a condition of placing a facility across the rights-of-way.

(j) If the transportation project is a project other than a public utility facility, an authority may contract for the use of part of a transportation project or lease or sell part of a transportation project under Subsection (a)(2) only to the extent that the contract, lease, or sale benefits the users of the transportation project.

(k) Notwithstanding any other provision of this chapter, an authority may pledge all or any part of its revenues and any other funds available to the authority to the payment of any obligations of the authority under a contract or agreement authorized by this chapter.

Sec. 370.173. AUTHORITY REVOLVING FUND. (a) An authority may maintain a revolving fund to be held in trust by a banking institution chosen by the authority separate from any other funds and administered by the authority's board.

(b) An authority may transfer into its revolving fund money from any permissible source, including:

(1) money from a transportation project if the transfer

does not diminish the money available for the project to less than any amount required to be retained by the bond proceedings pertaining to the project;

(2) money received by the authority from any source and not otherwise committed, including money from the transfer of a transportation project or system or sale of authority assets;

(3) money received from the state highway fund; and

(4) contributions, loans, grants, or assistance from the United States, another state, another political subdivision of this state, a foreign governmental entity, including the United Mexican States or a state of the United Mexican States, a local government, any private enterprise, or any person.

(c) The authority may use money in the revolving fund to:

(1) finance the acquisition, construction, maintenance, or operation of a transportation project, including the extension, expansion, or improvement of a transportation project;

(2) provide matching money required in connection with any federal, state, local, or private aid, grant, or other funding, including aid or funding by or with public-private partnerships;

(3) provide credit enhancement either directly or indirectly for bonds issued to acquire, construct, extend, expand, or improve a transportation project;

(4) provide security for or payment of future or existing debt for the design, acquisition, construction, operation, maintenance, extension, expansion, or improvement of a transportation project or system;

(5) borrow money and issue bonds, promissory notes, or other indebtedness payable out of the revolving fund for any purpose authorized by this chapter; and

(6) provide for any other reasonable purpose that assists in the financing of an authority as authorized by this chapter.

(d) Money spent or advanced from the revolving fund for a transportation project must be reimbursed from the money of that transportation project. There must be a reasonable expectation of repayment at the time the expenditure or advancement is authorized.

Sec. 370.174. USE OF SURPLUS REVENUE. (a) Each year, if an authority determines that it has surplus revenue from transportation projects, it shall reduce tolls, spend the surplus revenue on other transportation projects in the counties of the authority in accordance with Subsection (b), or deposit the surplus revenue to the credit of the Texas Mobility Fund.

(b) Consistent with other law and commission rule, an authority may spend surplus revenue on other transportation projects by:

(1) constructing a transportation project located within the counties of the authority;

(2) assisting in the financing of a toll or toll-free transportation project of another governmental entity; or

(3) with the approval of the commission, constructing a toll or toll-free transportation project and, on completion of the project, transferring the project to another governmental entity if:

(A) the other governmental entity authorizes the authority to construct the project and agrees to assume all liability and responsibility for the maintenance and operation of the project on its transfer; and

(B) the project is constructed in compliance with all laws applicable to the governmental entity.

Added by Acts 2003, 78th Leg., ch. 1325, Sec. 2.01, eff. June 21, 2003.

Sec. 370.175. EXEMPTION FROM TAXATION OR ASSESSMENT. (a) An authority is exempt from taxation of or assessments on:

(1) a transportation project or system;

(2) property the authority acquires or uses under this chapter for a transportation project or system; or

(3) income from property described by Subdivision (1) or (2).

(b) An authority is exempt from payment of development fees, utility connection fees, assessments, and service fees imposed or assessed by any governmental entity or any property owners' or homeowners' association. This subsection does not apply to fees or

assessments charged under approved rate schedules or line extension policies of a municipally owned electric or gas utility.

Added by Acts 2003, 78th Leg., ch. 1325, Sec. 2.01, eff. June 21, 2003.

Sec. 370.176. ACTIONS AFFECTING EXISTING ROADS. (a) An authority may impose a toll for transit over an existing free road, street, or public highway transferred to the authority under this chapter.

(b) An authority may construct a grade separation at an intersection of a transportation project with a railroad or highway and change the line or grade of a highway to accommodate the design of the grade separation. The action may not affect a segment of the state highway system without the department's consent. The authority shall pay the cost of a grade separation and any damage incurred in changing a line or grade of a railroad or highway as part of the cost of the transportation project.

(c) If feasible, an authority shall provide access to properties previously abutting a county road or other public road that is taken for a transportation project and shall pay abutting property owners the expenses or any resulting damages for a denial of access to the road.

(d) If an authority changes the location of a segment of a county road as part of its development of a transportation project, the authority shall, on the request of the county, reconstruct that segment of the road at a location that the authority determines, in its discretion, restores the utility of the road. The reconstruction and its associated costs are in furtherance of a transportation project.

Sec. 370.177. FAILURE OR REFUSAL TO PAY TURNPIKE PROJECT TOLL; OFFENSE; ADMINISTRATIVE PENALTY. (a) Except as provided by Subsection (a-1), the operator of a vehicle, other than an authorized emergency vehicle as defined by Section 541.201, that is driven or towed through a toll collection facility of a turnpike project shall

pay the proper toll. The operator of a vehicle who drives or tows a vehicle through a toll collection facility and does not pay the proper toll commits an offense. An offense under this subsection is a misdemeanor punishable by a fine not to exceed \$250. The exemption from payment of a toll for an authorized emergency vehicle applies regardless of whether the vehicle is:

- (1) responding to an emergency;
- (2) displaying a flashing light; or
- (3) marked as an emergency vehicle.

(a-1) Notwithstanding Subsection (a), the board may waive the requirement of the payment of a toll or may authorize the payment of a reduced toll for any vehicle or class of vehicles.

(b) In the event of nonpayment of the proper toll as required by Subsection (a), on issuance of a written notice of nonpayment, the registered owner of the nonpaying vehicle is liable for the payment of both the proper toll and an administrative fee.

(c) The authority may impose and collect the administrative fee to recover the cost of collecting the unpaid toll, not to exceed \$100. The authority shall send a written notice of nonpayment to the registered owner of the vehicle at that owner's address as shown in the vehicle registration records of the department by first class mail not later than the 30th day after the date of the alleged failure to pay and may require payment not sooner than the 30th day after the date the notice was mailed. The registered owner shall pay a separate toll and administrative fee for each event of nonpayment under Subsection (a).

(d) The registered owner of a vehicle for which the proper toll was not paid who is mailed a written notice of nonpayment under Subsection (c) and fails to pay the proper toll and administrative fee within the time specified by the notice of nonpayment commits an offense. Each failure to pay a toll or administrative fee under this subsection is a separate offense.

(e) It is an exception to the application of Subsection (b) or (d) that the registered owner of the vehicle is a lessor of the vehicle and not later than the 30th day after the date the notice of nonpayment is mailed provides to the authority:

- (1) a copy of the rental, lease, or other contract document covering the vehicle on the date of the nonpayment under Subsection (a), with the name and address of the lessee clearly legible; or
- (2) electronic data, other than a photocopy or scan of a

rental or lease contract, that contains the information required under Sections 521.460(c)(1), (2), and (3) covering the vehicle on the date of the nonpayment under Subsection (a).

(e-1) If the lessor provides the required information within the period prescribed under Subsection (e), the authority may send a notice of nonpayment to the lessee at the address provided under Subsection (e) by first class mail before the 30th day after the date of receipt of the required information from the lessor. The lessee of the vehicle for which the proper toll was not paid who is mailed a written notice of nonpayment under this subsection and fails to pay the proper toll and administrative fee within the time specified by the notice of nonpayment commits an offense. The lessee shall pay a separate toll and administrative fee for each event of nonpayment. Each failure to pay a toll or administrative fee under this subsection is a separate offense.

(f) It is an exception to the application of Subsection (b) or (d) that the registered owner of the vehicle transferred ownership of the vehicle to another person before the event of nonpayment under Subsection (a) occurred, submitted written notice of the transfer to the department in accordance with Section 501.147, and before the 30th day after the date the notice of nonpayment is mailed, provides to the authority the name and address of the person to whom the vehicle was transferred. If the former owner of the vehicle provides the required information within the period prescribed, the authority may send a notice of nonpayment to the person to whom ownership of the vehicle was transferred at the address provided by the former owner by first class mail before the 30th day after the date of receipt of the required information from the former owner. The subsequent owner of the vehicle for which the proper toll was not paid who is mailed a written notice of nonpayment under this subsection and fails to pay the proper toll and administrative fee within the time specified by the notice of nonpayment commits an offense. The subsequent owner shall pay a separate toll and administrative fee for each event of nonpayment under Subsection (a). Each failure to pay a toll or administrative fee under this subsection is a separate offense.

(g) An offense under Subsection (d), (e-1), or (f) is a misdemeanor punishable by a fine not to exceed \$250.

(h) The court in which a person is convicted of an offense under this section shall also collect the proper toll and

administrative fee and forward the toll and fee to the authority.

(i) In the prosecution of an offense under this section, proof that the vehicle passed through a toll collection facility without payment of the proper toll together with proof that the defendant was the registered owner or the driver of the vehicle when the failure to pay occurred, establishes the nonpayment of the registered owner. The proof may be by testimony of a peace officer or authority employee, video surveillance, or any other reasonable evidence, including:

(1) evidence obtained by automated enforcement technology that the authority determines is necessary, including automated enforcement technology described by Sections 228.058(a) and (b); or

(2) a copy of the rental, lease, or other contract document or the electronic data provided to the authority under Subsection (e) that shows the defendant was the lessee of the vehicle when the underlying event of nonpayment occurred.

(j) It is a defense to prosecution under this section that the motor vehicle in question was stolen before the failure to pay the proper toll occurred and was not recovered by the time of the failure to pay, but only if the theft was reported to the appropriate law enforcement authority before the earlier of:

(1) the occurrence of the failure to pay; or

(2) eight hours after the discovery of the theft.

(k) In this section, "registered owner" means the owner of a vehicle as shown on the vehicle registration records of the department or the analogous department or agency of another state or country.

(l) In addition to the other powers and duties provided by this chapter, with regard to its toll collection and enforcement powers for its turnpike projects or other toll projects developed, financed, constructed, and operated under an agreement with the authority or another entity, an authority has the same powers and duties as the department under Chapter 228, a county under Chapter 284, and a regional tollway authority under Chapter 366.

(m) Information collected for the purposes of this section, including contact, payment, and other account information and trip data, is confidential and not subject to disclosure under Chapter 552, Government Code.

A transponder is insufficiently funded if there is no money in the account for which the transponder was issued.

(b) Any law enforcement or peace officer of an entity with which an authority has contracted under Section 370.181(c) may seize a stolen or insufficiently funded transponder and return it to the authority that issued the transponder. An insufficiently funded transponder may not be seized before the 30th day after the date that an authority has sent a notice of delinquency to the holder of the account.

(c) The following entities shall consider offering motor vehicle operators the option of using a transponder to pay tolls without stopping, to mitigate congestion at toll locations, to enhance traffic flow, and to otherwise increase the efficiency of operations:

- (1) the authority;
- (2) an entity to which a project authorized by this chapter is transferred; or

Sec. 370.251. BOARD OF DIRECTORS. (a) Except as provided by Subsection (a-1), the governing body of an authority is a board of

directors consisting of representatives of each county in which a transportation project of the authority is located or is proposed to be located. The commissioners court of each county that initially forms the authority shall appoint at least two directors to the board. Additional directors may be appointed to the board at the time of initial formation by agreement of the counties creating the authority to ensure fair representation of political subdivisions in the counties of the authority that will be affected by a transportation project of the authority, provided that the number of directors must be an odd number. The commissioners court of a county that is subsequently added to the authority shall appoint at least one director to the board. The governor shall appoint one director to the board who shall serve as the presiding officer of the board and shall appoint an additional director to the board if an appointment is necessary to maintain an odd number of directors on the board.

(a-1) To be eligible to serve as director of an authority created by a municipality an individual:

(1) may be a representative of an entity that also has representation on a metropolitan planning organization in the region where the municipality is located; and

(2) is required to be a resident of Texas regardless of whether the metropolitan planning organization's geographic area includes territory in another state.

(b) The appointment of additional directors from a county subsequently added to an authority or from a county of an authority that contains an operating transportation project of the authority shall be by a process unanimously agreed to by the commissioners courts of all the counties of the authority.

(c) Directors serve two-year terms, with as near as possible to one-half of the directors' terms expiring on February 1 of each year.

(d) If six-year terms are permitted under the constitution of this state, one director appointed to the initial board of an authority by the commissioners court of a county shall be designated by the court to serve a term of two years and one director designated to serve a term of four years. If six-year terms are not permitted under the constitution, one director appointed to the initial board of an authority by the commissioners court of a county shall be designated by the court to serve a term of one year and one director designated to serve a term of two years. If one or more directors are

subsequently appointed to the board, the directors other than the subsequent appointees shall determine the length of the appointees' terms, to comply with Subsection (c).

(e) If a vacancy occurs on the board, the appointing authority shall promptly appoint a successor to serve for the unexpired portion of the term.

(f) All appointments to the board shall be made without regard to race, color, disability, sex, religion, age, or national origin.

(g) The following individuals are ineligible to serve as a director:

- (1) an elected official;
- (2) a person who is not a resident of a county within the geographic area of the authority;
- (3) a department employee;
- (4) an employee of a governmental entity any part of which is located within the geographic boundaries of the authority; and
- (5) a person owning an interest in real property that will be acquired for an authority project, if it is known at the time of the person's proposed appointment that the property will be acquired for the authority project.

(h) Each director has equal status and may vote.

(i) The vote of a majority attending a board meeting is necessary for any action taken by the board. If a vacancy exists on a board, the majority of directors serving on the board is a quorum.

(j) The commission may refuse to authorize the creation of an authority if the commission determines that the proposed board will not fairly represent political subdivisions in the counties of the authority that will be affected by the creation of the authority.

(d) Each director of a board under this section has equal status and may vote.

(e) The vote of a majority attending a board meeting is necessary for any action taken by a board under this section. If a vacancy exists on a board, the majority of directors serving on the board is a quorum.

(f) The governing body of a municipality that becomes the board of an existing authority under this section shall by resolution provide for the transfer process that establishes the governing body as the board of the authority.

(g) If the board of directors of an authority created by a municipality consists of the members of the governing body of the municipality, Sections 370.251, 370.2515, 370.252, 370.2521, 370.2522, 370.2523, 370.253, 370.254, and 370.255 do not apply to the board, except that, to the extent applicable, those provisions apply to the governor's appointee under Subsection (c).

(h) This section has no effect if the attorney general issues an opinion stating that, notwithstanding the statutory authority under this section, the Texas Constitution, the common law doctrine of incompatibility, or any other legal principle would prohibit a member of the governing body of a municipality from serving as a director of an authority.

(i) A board under this section is not required to have an odd number of directors.

 - (3) accept other employment or compensation that could reasonably be expected to impair the director's or employee's independence of judgment in the performance of the director's or employee's official duties;
 - (4) make personal investments that could reasonably be expected to create a substantial conflict between the director's or employee's private interest and the interest of the authority;
